Case,Rebekah Willson,2023-06-30 This fifth edition is redesigned to reflect the breadth of research across information behaviour studies with a new streamlined six chapter structure presenting a refreshed look at information needs and seeking practices while also embracing contemporary concepts such as information use creation and embodiment **Doomed to Repeat?** Sean Brawley,2009-04-13 This collection of scholarly essays explores the role of history in terrorism studies and today s counterterrorism initiatives In *Doomed to Repeat* scholars policy makers and other practitioners explore how a better understanding of the past can help us combat terrorism in the future The first section establishes a broader context for discussion by examining the connections between history and Terrorism Studies The second section presents the insights of non historians who know the importance of historical perspective in understanding current events Section Three provides case studies that explore the history of terrorism and politically motivated violence Section Four concludes by placing concerns about terrorism in regional and foreign policy context This collection helps us advance our understanding of terrorism beyond simplistic and dichotomist assertions about them and us Taken together these essays highlight the importance of analyzing rather than assuming Chris Dixon Professor School of History Philosophy Religion and Classics The University of Queensland Australia *Biobanks* Herbert

Gottweis,Alan Petersen,2008-04-28 In recent years a number of large population based biobanks genetic databases that combine genetic information derived from blood samples with personal data about environment medical history lifestyle or

genealogy have been set up in order to study the interface between disease and genetic and environmental factors. Unsurprisingly these studies have sparked a good deal of controversy and the ethical and social implications have been widely debated. *Biobanks Governance in Comparative Perspective* is the first book to explore the political and governance implications of biobanks in Europe, the United States, Asia, and Australia. This book explores the interrelated conditions needed for a biobank to be created and to exist, the rise of the new bio economy, the redefinition of citizenship accompanying national biobank developments. This groundbreaking book makes clear that biobanks are a phenomenon that cannot be disconnected from considerations of power, politics, and the reshaping of current practices in governance. It will be a valuable read for scholars and students of genetics, bioethics, risk, public health, and the sociology of health and illness. **Interactive Information Seeking, Behaviour and Retrieval** Ian Ruthven, Diane Kelly, 2011. Information retrieval (IR) is a complex human activity supported by sophisticated systems. Information science has contributed much to the design and evaluation of previous generations of IR system development and to our general understanding of how such systems should be designed, and yet due to the increasing success and diversity of IR systems, many recent textbooks concentrate on IR systems themselves and ignore the human side of searching for information. This book is the first text to provide an information science perspective on IR. Unique in its scope, the book covers the whole spectrum of information retrieval, including history and background, information behaviour, and seeking task-based information searching and retrieval approaches to investigating information interaction and behaviour, information representation, access models, evaluation, interfaces for IR, interactive techniques, web retrieval, ranking and personalization, recommendation, collaboration, and social search, multimedia interfaces, and access. Readership: Senior undergraduates and masters level students of all information and library studies courses, and practising LIS professionals who need to better appreciate how IR systems are designed, implemented, and evaluated. *Collaborative Web Search* Meredith Ringel Morris, Jaime Teevan, 2022-06-01. Today Web search is treated as a solitary experience. Web browsers and search engines are typically designed to support a single user working alone. However, collaboration on information seeking tasks is actually commonplace. Students work together to complete homework assignments; friends seek information about joint entertainment opportunities; family members jointly plan vacation travel; and colleagues jointly conduct research for their projects. As improved networking technologies and the rise of social media simplify the process of remote collaboration, and large novel display form factors simplify the process of co-located group work, researchers have begun to explore ways to facilitate collaboration on search tasks. This lecture investigates the who, what, where, when, and why of collaborative search and gives insight in how emerging solutions can address collaborators' needs. Judicial Review Handbook The Hon Sir Michael Fordham, 2012-10-31 Writing in the sixth edition of this Handbook author Michael Fordham described his ambition when writing the first edition and indeed all subsequent editions of this book as to read as many judicial review cases as I could and to try to extract classify and present illustrations and statements of principle Behind this aim lay the practitioner's overwhelming need to know and understand the case law Without it as Fordham says much can be achieved in public law through instinct experience and familiarity with general principles which are broad flexible and designed to accord with common sense But with knowledge of the case law comes the vital ability to be able to point to and rely on an authoritative statement of principle and working illustration Knowing the case law is crucial the challenge is to find it This the sixth edition of the Handbook continues the tradition established by earlier editions in rendering the voluminous case law accessible and knowable This Handbook remains an indispensable source of reference and a guide to the case law in judicial review Established as an essential part of the library of any practitioner engaged in public law cases the Judicial Review Handbook offers unrivalled coverage of administrative law including but not confined to the work of the Administrative Court and its procedures Once again completely revised and up dated the sixth edition approximates to a restatement of the law of judicial review organised around 63 legal principles each supported by a comprehensive presentation of the sources and an unequalled selection of reported case quotations It also includes essential procedural rules forms and guidance issued by the Administrative Court As in the previous edition both the Civil Procedure Rules and Human Rights Act 1998 feature prominently as major influences on the shaping of the case law Their impact and the plethora of cases which explore their meaning and application were fully analysed and evaluated in the previous edition but this time around their importance has grown exponentially and is reflected in even greater attention being given to their respective roles Attention is also given to another new development the coming into existence of the Supreme Court Here Michael Fordham casts an experienced eye over the Court's work in the area of judicial review and assesses the early signs from a Court that is expected to be one of the key influences in the development of judicial review in the modern era The author a leading member of the English public law bar has been involved in many of the leading judicial review cases in recent years and is the founding editor of the Judicial Review journal an institution for those who practise public law it has the authority that comes from being compiled by an author of singular distinction Lord Woolf from the Foreword to the Fifth
