Looking Down:

Looking Down the Corridors Kevin Wright, Peter Jefferies, 2015-05-04 Between 1945 and 1990 the Western Allies mounted some of the most audacious and successful intelligence collection operations of the Cold War Conducted in great secrecy aircrews flew specially modified transport and training aircraft along the Berlin Air Corridors and Control Zone to gather intelligence on Soviet and East German military targets in the German Democratic Republic and around Berlin The Air Corridors comprised three regulated airways for civil and military air traffic that connected West Berlin to West Germany Operating under the guise of innocent transport and training flights the pilots used their right of access to gather huge amounts of imagery for forty five years They also provided the western intelligence community with unique knowledge of the organisation and equipment used by Warsaw Pact forces For the first time using recently declassified materials and extensive interviews with those involved Looking Down the Corridors provides a detailed account and analysis of these operations and their unique contribution to the Cold War

Looking Down the Tree Mitchell B. Cruzan, 2025-10-31 The Evolutionary Biology of Human Origins explores aspects of human evolution that are not usually discussed in textbooks or biology classes We know much about our history from bones and DNA but these studies do not really tell us about the appearance of our ancestors and the origin of characteristics that are not preserved in the fossil record the fleshy parts and behaviors of our ancestors We can gain insights into our evolutionary history by understanding the pressures of natural selection that our ancestors experienced by viewing our species as an evolutionary biologist would To come to an understanding of the origin of human traits I draw upon evidence from fossils genomics phylogenetics coalescence theory and the anatomy and physiology of our ancestors and other animals I interpret these observations in the contexts of comparative biology natural and sexual selection evolutionary constraints inbreeding and inclusive fitness and genetic and cultural evolution The story of our past that we piece together provides a novel view of how savanna habitats favored a unique set of adaptations including bipedalism and the loss of fur in our early australopithecine ancestors Other characteristics were outcomes of our infants becoming increasingly underdeveloped at birth as head size increased and were favored by inbreeding and inclusive fitness in the inbred clans of our Homo ancestors The results of this exercise provide a novel and comprehensive view of the origin of our unique appearance and behaviors Provided by publisher

After Bruce Greyson, M.D.,2021-03-02 The world s leading expert on near death experiences reveals his journey toward rethinking the nature of death life and the continuity of consciousness Cases of remarkable experiences on the threshold of death have been reported since ancient times and are described today by 10% of people whose hearts stop The medical world has generally ignored these near death experiences dismissing them as tricks of the brain or wishful thinking But after his patients started describing events that he could not just sweep under the rug Dr Bruce Greyson began to investigate As a physician without a religious belief system he approached near death experiences from a scientific perspective In After he shares the transformative lessons he has learned over four decades of research Our culture has tended to view dying as the end of our consciousness the end of our existence a dreaded prospect that for many people evokes fear and anxiety But Dr Greyson shows how scientific revelations about the dying process can support an alternative theory Dying could be the threshold between one form of consciousness and another not an ending but a transition This new perspective on the nature of death can transform the fear of dying that pervades our culture into a healthy view of it as one more milestone in the course of our lives After challenges us to open our minds to these experiences and to what they can teach us and in so doing expand our understanding of consciousness and of what it means to be human **Impossible Things** Connie
