**W.H. Crossland** Sheila Binns,2020-09-24 The creative genius behind Founder's Building at Royal Holloway University of London arguably the most glorious building in England of the end of the nineteenth century is widely respected and its architectural style is regarded as archetypally Victorian Yet its architect William Henry Crossland is little known despite a substantial catalogue of buildings most of which remain standing today Bringing Crossland out of the shadows this biography explores this mysterious and elusive figure in depth for the first time Recently digitised documents and long hidden archival material have thrown a powerful light on Crossland which together with the author's first hand knowledge of his buildings offer the reader an unprecedented appreciation and understanding of the man his life and work as well as his personal and artistic influences W H Crossland fills a gap in nineteenth century architectural knowledge but it is also the touching story of an ambitious and talented man who is long overdue to be recognised as one of the greats among nineteenth century architects This book is intended for architects architectural historians and anyone who is interested in the built environment nineteenth century history and intriguing personal stories

*The Conservation Movement* Miles Glendinning,2013 Winner of the 2016 Antoinette Forrester Downing Award presented by the Society of Architectural Historians In many cities across the world particularly in Europe

old buildings form a prominent part of the built environment and we often take it for granted that their contribution is intrinsically positive How has that widely shared belief come about and is its continued general acceptance inevitable Certainly ancient structures have long been treated with care and reverence in many societies including classical Rome and Greece But only in modern Europe and America in the last two centuries has this care been elaborated and energised into a forceful dynamic ideology a Conservation Movement infused with a sense of historical destiny and loss that paradoxically shared many of the characteristics of Enlightenment modernity The close inter relationship between conservation and modern civilisation was most dramatically heightened in periods of war or social upheaval beginning with the French Revolution and rising to a tragic climax in the 20th century age of totalitarian extremism more recently the troubled relationship of heritage and global commercialism has become dominant Miles Glendinning's new book authoritatively presents for the first time the entire history of this architectural Conservation Movement and traces its dramatic fluctuations in ideas and popularity ending by questioning whether its recent international ascendancy can last indefinitely
