Mozarabic Architecture:

Architecture and Ideology in Early Medieval Spain Jerrilynn Denise Dodds, 1990 In analyzing the early medieval architecture of Christian and Islamic Spain Jerrilynn Dodds explores the principles of artistic response to social and cultural tension offering an account of that unique artistic experience that set Spain apart from the rest of Europe and established a visual identity born of the confrontation of cultures that perceived one another as alien Architecture and Ideology in Early Medieval Spain covers the Spanish medieval experience from the Visigothic oligarchy to the year 1000 addressing a variety of cases of cultural interchange It examines the embattled reactive stance of Hispano Romans to their Visigothic rulers and the Asturian search for a new language of forms to support a political position dissociated from the struggles of a peninsula caught in the grip of a foreign and infidel rule Dodds then examines the symbolic meaning of the Mozarabic churches of the tenth century and their reflection of the Mozarabs threatened cultural identity The final chapter focuses on two cases of artistic interchange between Islamic and Christian builders with a view toward understanding the dynamics of such interchange between conflicting cultures Dodds concludes with a short account of the beginning of Romanesque architecture in Spain and an analysis of some of the ways in which artistic expression can reveal the subconscious of a culture **Library**

Liturgy and Architecture from the Early Church to the Middle Ages Allan Doig, 2008 In this book Allan Doig explores the interrelationship of liturgy and architecture from the early Church to the close of the Middle Ages taking into account social economic technical theological and artistic factors These are crucial to a proper understanding of ecclesiastical architecture of all periods and together their study illuminates the study of liturgy Buildings and their archaeology are standing indices of human activity and the whole matrix of meaning they present is highly revealing of the larger meaning of ritual performance within and movement through their space The excavation of the mid third century church at Dura Europos in the Syrian desert the grandeur of Constantine's Imperial basilicas the influence of the great pilgrimage sites and the marvels of soaring Gothic cathedrals all come alive in a new way when the space is

animated by the liturgy for which they were built Reviewing the most recent research in the area and moving the debate forward this study will be enormously useful to the liturgist clergy theologians art and architectural historians and those interested in the conservation of ecclesiastical structures built for the liturgy *Library of Congress Subject Headings*

Mozarabs in Medieval and Early Modern Spain Richard Hitchcock, 2016-04-22 The setting of this volume is the Iberian Peninsula during the Middle Ages where Christianity and Islam co-existed side by side as the official religions of Muslim al Andalus on the one hand and the Christian kingdoms in the north of the peninsula on the other Its purpose is to examine the meaning of the word Mozarab and the history and nature of the people called by that name it represents a synthesis of the author's many years of research and publication in this field Richard Hitchcock first sets out to explain what being a non-Muslim meant in al Andalus both in the higher echelons of society and at a humbler level The terms used by Arab chroniclers when examined carefully suggest a lesser preoccupation with purely religious values than hitherto appreciated Mozarabism in Le n and Toledo two notably distinct phenomena are then considered at length and there are two chapters exploring the issues that arose firstly when Mozarabs were relocated in twelfth century Arag n and secondly in sixteenth century Toledo when they were striving to retain their identity Library of Congress Subject Headings: A-E Library of Congress. Subject Cataloging Division, 1989 Tagus River Saints Amelia Khatri, AI, 2025-02-14 *Tagus River Saints* explores how the Tagus River profoundly shaped Iberia's religious history from the Moorish era through the Christian Reconquista It examines the river as a dynamic site of cultural exchange and the evolution of religious pilgrimages along its banks The book highlights how the Tagus acting as a natural border and transportation route fostered both conflict and collaboration among

diverse religious communities impacting the region's religious identity. Intriguingly, the Moors adapted pre-existing religious sites, and the river became central to pilgrimage routes, showcasing the interplay between geography and faith. The book begins by establishing the historical context of the Tagus River valley, including its pre-Islamic roots and Moorish transformations. It progresses to examine the rise of Christian pilgrimage routes, focusing on sites like Toledo and Santarém, before investigating the ongoing religious syncretism even after the Reconquista. By interweaving historical analysis with vivid descriptions, *Tagus River Saints* challenges traditional narratives, demonstrating that the Tagus River was a catalyst for religious innovation, adaptation, and conflict throughout Iberian history.
