Live, Love, Spy Lexi Blake, 2024-03-05 Life can often be awkward when you're a child genius For Louisa Ward that came in the form of meeting her one true love at the age of 12 TJ Taggart was perfect But being a year younger and a full grade ahead of him in school always made things weird Working in the CIA has turned her into a strong and capable woman Until TJ walks into a room Fifteen years later she still gets butterflies every time she sees the gorgeous soldier but she's tired of waiting and ready to find love even if it can't be with him TJ Taggart always knew he wanted to be a soldier But joining the Army would require a sacrifice Since meeting Louisa TJ knew she was the one for him but they had different paths in life Lou was meant to change the world at some prestigious research job or maybe teach at an Ivy League school There would be a chance to sweep her off her feet when his time in this dangerous life was done and their happily ever after could begin Before he can make it home on his latest leave TJ is kidnapped by an unknown adversary As he waits to die all he can think of is the time he wasted and how badly he wants to be with Lou He's more than a little surprised when his sweet quiet girl shows up leading a CIA special ops squad to bust him out Back in Dallas it's time to claim the woman of his dreams He has a plan to win her over until the adversary who almost killed him returns to finish the job

Sweet Little Spies Lexi Blake, 2024-09-17 Since he was a kid Aidan O'Donnell has known two things about the world Tristan is his best friend and Carys is the love of his life Sharing her with Tristan was oddly easy They both loved her deeply and they never cared what anyone else thought They were a team and everything was wonderful Until the day it ended Carys Taggart has spent the last year and a half of her life living a lie A lie Tristan forced on them all She understands that it was meant to protect her and Aidan but lately when Tristan says he doesn't love her it feels more like the truth The wedding she's dreamed of has been put off far longer than he promised When he asks her and Aidan for another delay she's ready to move on without him Tristan Dean Miles has a good plan and the best of intentions Go undercover as a ruthless arms dealer so he can find a deadly bombmaker at the top of the agency's wanted list It might be taking longer than expected but he's so close he can taste it Unfortunately getting this close meant getting in way too deep He knows he will succeed but if he can't convince the love of his life and his best friend that he's worth the wait his victory will cost him everything

The Perfect Score Rob Buyea, 2018-10-09 From the beloved author of *Because of Mr. Terpump* and its sequels comes *The Perfect Score* a new middle grade school story with a very special cast of unforgettable characters who discover that getting the perfect score both on the test and in life is perhaps not so perfect after all No one likes or wants to take the statewide assessment tests Not the students in Mrs Woods's sixth grade class Not even Mrs Woods It's not as if the kids don't already have things to worry about Under pressure to be the top gymnast her mother expects her to be RANDI starts to wonder what her destiny truly holds Football crazy GAVIN has always struggled with reading and feels as dumb as his high school dropout father TREVOR acts tough and mean but as much as he hates school he hates being home even more SCOTT's got a big brain and an even bigger heart especially when it comes to his grandfather but his good

Imaging Cameras Gehan Anthonys,2022-03-11 This book explains how depth measurements from the Time of Flight ToF range imaging cameras are influenced by the electronic timing jitter The author presents jitter extraction and measurement techniques for any type of ToF range imaging cameras The author mainly focuses on ToF cameras that are based on the amplitude modulated continuous wave AMCW lidar techniques that measure the phase difference between the emitted and reflected light signals The book discusses timing jitter in the emitted light signal which is sensible since the light signal of the camera is relatively straightforward to access The specific types of jitter that present on the light source signal are investigated throughout the book The book is structured across three main sections a brief literature review jitter measurement and jitter influence in AMCW ToF range imaging **Memristors for Neuromorphic Circuits and Artificial**

Intelligence Applications Jordi Suñé,2020-04-09 Artificial Intelligence AI has found many applications in the past decade due to the ever increasing computing power Artificial Neural Networks are inspired in the brain structure and consist in the interconnection of artificial neurons through artificial synapses Training these systems requires huge amounts of data and after the network is trained it can recognize unforeseen data and provide useful information The so called Spiking Neural Networks behave similarly to how the brain functions and are very energy efficient Up to this moment both spiking and conventional neural networks have been implemented in software programs running on conventional computing units However this approach requires high computing power a large physical space and is energy inefficient Thus there is an increasing interest in developing AI tools directly implemented in hardware The first hardware demonstrations have been based on CMOS circuits for neurons and specific communication protocols for synapses However to further increase training speed and energy efficiency while decreasing system size the combination of CMOS neurons with memristor synapses is being explored The memristor is a resistor with memory which behaves similarly to biological synapses This book explores the state of the art of neuromorphic circuits implementing neural networks with memristors for AI applications *Thalamic*

Function - Beyond a Simple Relay Vincenzo Crunelli,William Martin Connelly,W. Martin Usrey,2016-05-20 The thalamus is often described as a relay Typified by sensory pathways this concept leads to thalamic nuclei being viewed as areas that passively streams information from a single source to the cortex without affecting the nature of that information However diverse intrathalamic connections the varying synaptic and membrane properties of thalamic neurons and the large number of inputs from non sensory sources make the idea that the thalamus is just a passive relay unlikely Furthermore a large number of thalamic nuclei are not primarily driven by sensory signals nor do they exclusively target the cortex meaning the

thalamus must do more than simply pass sensory signals to the cortex Finally there is a wealth of research demonstrating that the thalamus does indeed function in ways that are not captured by the concept of a simple relay So why given all of this is the primary paradigm for describing the thalamus a relay This Research Topic covers original research reviews and hypotheses on thalamic function that explore the concept that the thalamus performs computational tasks other than simply passively relaying information *Contributions to Networked and Event-Triggered Control of Linear Systems* María Guinaldo Losada, 2016-05-28 This book reports on a set of new techniques for resolving current issues in networked control systems The main focus is on strategies for event based control for both centralized and decentralized architectures The first part of the book addresses the problem of single loop networked control systems and proposes an anticipative remote controller for dealing with delays and packet losses The second part of the book proposes a distributed event based control strategy for networked dynamical systems which has been implemented in a test bed of mobile robots and provides readers with a thorough description of an interactive simulator used to validate the results This thesis examined at the Universidad Nacional de Educación a Distancia in 2013 received the award for best thesis in control engineering from the Control Engineering group of the Spanish Committee of Automatic Control in 2015 *Promises, Promises* Annie Bryant, 2008-09-09 Who will be the next seventh grade class president at Abigail Adams Junior High Mr Popular Dillon Johnson is running and making a lot of promises that are sure to get votes The Yurtmeister s in the race too but his campaign is a joke right Class president seems like a good place for Avery to start her political career The trouble is Katani s in the race too Can the Beacon Street Girls survive the growing tension between these two supercompetitive friends And who s tearing down campaign posters and leaving mean notes about the candidates
