daring works of nonfiction in recent memory a singular and mesmerizing narrative that tunnels into the history of some of the darkest and most shameful plans and projects of the CIA the Air Force and the presidencies of Harry Truman and Dwight Eisenhower In his lucid and unassuming style Baker assembles what he learns piece by piece about Project Baseless a crash Pentagon program begun in the early fifties that aimed to achieve an Air Force wide combat capability in biological and chemical warfare at the earliest possible date Along the way he unearths stories of balloons carrying crop disease leaflet bombs filled with feathers suicidal scientists leaky centrifuges paranoid political warfare tacticians insane experiments on animals and humans weaponized ticks ferocious propaganda battles with China and cover and deception plans meant to trick the Kremlin into ramping up its germ warfare program At the same time Baker tells the stories of the heroic journalists and lawyers who have devoted their energies to wresting documentary evidence from government repositories and he shares anecdotes from his daily life in Maine feeding his dogs and watching the morning light gather on the horizon The result is an astonishing and utterly disarming story about waiting bureaucracy the horrors of war and above all the cruel secrets that the United States government seems determined to keep forever from its citizens **The Columbia Checklist** Len D.
