Rapid Guide to Trade Names and Synonyms of Environmentally Regulated Chemicals Richard P. Pohanish, 1998

Rapid Guide to Hazardous Chemicals in the Environment Richard P. Pohanish, 1997 *Rapid Guide to Hazardous Chemicals in the Environment* covers in alphabetical order by the USEPA's regulatory name approximately 1500 chemicals and chemical categories that appear in federal and state regulations. The chemicals were taken from 26 different listings including Clean Air Act, Clean Water Act, Resource Conservation and Recovery Act, Safe Drinking Water Act, Comprehensive Environmental Response Compensation and Liability Act, Emergency Planning and Community Right to Know Act, United States Department of Transportation's list of Marine Pollutants, and California's Proposition 65 list of Hazardous Chemicals known to cause cancer and reproductive toxicity. Each chemical record includes EPA name, Chemical Abstract Service (CAS) number, regulatory documents, citations to the regulations, and values related to the impact of the regulations. Helpful notations such as administrative stays, EPA Category Codes, and Federal Register volume, page numbers, and dates for deletion of chemicals from a specific regulatory list are also provided. This book also contains EPA contact numbers, hotlines, and bulletin boards, and a general summary of federal environmental regulations. **Walford's Guide to Reference**

Material: Science and technology Albert John Walford, Library Association, 1999. A revised and updated guide to reference material. It contains selective and evaluative entries to guide the enquirer to the best source of reference in each subject area: be it journal article, CD-ROM, on-line database, bibliography, encyclopaedia, monograph, or directory. It features full critical annotations and reviewers' comments and comprehensive author title and subject indexes. The contents include mathematics, astronomy, and surveying, physics, chemistry, earth sciences, palaeontology, anthropology, biology, natural history, botany, zoology, patents, and interventions, medicine, engineering, transport, vehicles, agriculture, and livestock, household management, communication, chemical industry, manufactures, industries, trades, and crafts, and the building industry. **The New Walford Guide to Reference Resources** Ray Lester, 2005. *The New Walford* highlights the best resources to use when undertaking a search for accurate and relevant information, saving you precious time and effort. For those looking for a selective and evaluative reference resource that really delivers on its promise, look no further. In addition to print sources, *The New Walford* naturally covers an extensive range of e-reference sources such as digital databanks, digital reference services, electronic journal collections, meta-search engines, networked information services, open archives, resource discovery services, and websites of premier organizations in both the public and private sectors. But rather than supplying a list of all available known resources as a web search engine might, *The New Walford* subject specialists have carefully selected and evaluated available resources to provide a definitive list of the most appropriate and useful. With an emphasis on quality and sustainability, the subject specialists have been careful to assess the differing ways that information is framed and communicated in different subject areas. As a result, the resource evaluations in each subject area are prefaced by an

introductory overview of the structure of the relevant literature This ensures that The New Walford is clear easy to use and intuitive Publisher **Information Resources in Toxicology, Volume 1: Background, Resources, and Tools**
