Realism and Institutionalism in International Studies Michael Brecher, Frank P. Harvey, 2009-12-11 Realism and Institutionalism in International Studies represents a unique collection of original essays by foremost scholars in the field of International Studies Six essays advocate critique or revise Realism the theoretical paradigm that explains international politics by emphasizing security competition and war among states The remaining four essays address Institutionalism the paradigm that offers explanations for the formation maintenance variation and significance of international institutions The authors reflect on the strengths and weaknesses of these approaches and suggest research agendas for the future Together this volume provides an accessible and wide ranging survey of the issues concerning two major paradigms in International Studies This volume will be of interest to scholars and students alike and will undoubtedly determine the shape of future research

Millennial Reflections on International Studies Michael Brecher, Frank P. Harvey, 2009-12-22 Collection of essays that debate the question of progress in the discipline [The Realist Tradition and Contemporary International Relations](#) W. David Clinton, 2007-07 The tradition in international relations theory known as realism has often been associated with the Cold War The contributors to this intriguing volume argue however that realism remains a profound and relevant perspective on contemporary international politics They point out that classical realism is based on concepts that were elucidated long before the Cold War began and are not confined by its boundaries Further they believe that insights of the realist tradition can provide valuable guidance in our contemporary world W David Clinton and ten scholars of foreign policy reexamine the work of thinkers spanning twenty five centuries who have contributed to the development of realism across the ages In their

essays the authors consider two key questions What makes these thinkers realists And how is their work relevant to the modern post Cold War world These essays take a fresh look at such canonical thinkers as Thucydides Augustine Machiavelli Hobbes Hume Burke Carr Niebuhr and Morgenthau Countering the widespread belief that realism has nothing left to offer this collection demonstrates that continuities remain in the political world and that the ideas rooted in realism are too important and too useful to ignore While there are obvious differences among the political philosophers whose works are considered here they share a common concern about human limitations and the possible dangerous consequences of ignoring those limitations Each in his own way these classic thinkers discuss the need for prudence to counter the ever present threat of tragedy resulting from our innocent hopeful or self righteous efforts for perfection These provocative essays demonstrate that though a realist understanding of the nature of international relations is at least as old as Thucydides it is also as contemporaneous as the most recent headline

Realism in International Relations: The Making of a Disarrayed Tradition Mehmet Tabak, 2025-03-05 According to a pervasive view in the discipline of International Relations IR a realism is a historical tradition stretching all the way back to Thucydides b despite the important theoretical differences among themselves realists uphold the same set of core beliefs about the workings of international politics Together these two claims amount to the perspective that realism is a sui generis scholarly tradition with ancient origins The author critiques both aspects of this view by illustrating that realism is both a relatively recent tradition and a disarrayed one He shows that the realist tradition entails conscious membership and participation in a common realist discourse that has produced fundamentally different even opposing methodologies and theories about the same or related phenomena in international politics In illustrating this argument the author critically explores a variety of seminal statements of and debates about realism This exploration reveals that the conceptual and theoretical shortcomings of the major statements of realism significantly explain why realism evolved as a disarrayed tradition Overall this book makes an important contribution to the understanding of realism in particular and IR in general The comprehensive and critical analysis of many facets of realism this book offers also yields many didactic elements

Institutional Balancing in the Asia Pacific Kai He, 2009 This book examines the strategic interactions among China the United States Japan and Southeast Asian States in the context of China's rise and globalization after the cold war Engaging the mainstream theoretical debates in international relations the author introduces a new theoretical framework institutional realism to explain the institutionalization of world politics in the Asia Pacific after the cold war Institutional realism suggests that deepening economic interdependence creates a condition under which states are more likely to conduct a new balancing strategy institutional balancing i e countering pressures or threats through initiating utilizing and dominating multilateral institutions to pursue security under anarchy To test the validity of institutional realism Kai He examines the foreign policies of the U S Japan the ASEAN states and China toward four major multilateral institutions Asia Pacific Economic Cooperation APEC the Association of Southeast Asian Nations ASEAN

Regional Forum ARF ASEAN Plus Three APT and East Asian Summit EAS Challenging the popular pessimistic view regarding China's rise the book concludes that economic interdependence and structural constraints may well soften the dragon's teeth China's rise does not mean a dark future for the region Institutional Balancing in the Asia Pacific will be of great interest to policy makers and scholars of Asian security international relations Chinese foreign policy and U.S. foreign policy

Controversies in International Relations Theory Charles W. Kegley Jr, 1995-03-27 This new reader in international theory brings together nine new essays and four classics two of them heavily revised for republication here to provide a clear introduction to the two dominant traditions in contemporary international relations realism and neoliberalism As well as setting out the current state of each approach and mapping out the possibilities of creative synthesis the book focuses on emerging neorealist and neoliberal perspectives on such key issues as international trade and organisation arms control and morality in foreign policy

A Century of Crisis and Conflict in the International System Michael Brecher, 2017-07-25 This book is designed to present a fully developed theory of international crisis and conflict along with substantial evidence of these two closely related phenomena The book begins with a discussion of these topics at a theoretical level defining and elaborating on core concepts international crisis interstate conflict severity and impact This is followed by a discussion of the international system along with two significant illustrations the Berlin Blockade crisis 1948 and the India Pakistan crisis over Kashmir 1965-66 The book then presents a unified model of crisis focusing on the four phases of an international crisis which incorporate the four periods of foreign policy crises for individual states Findings from thirteen conflicts representing six regional clusters are then analyzed concluding with a set of hypotheses and evidence on conflict onset persistence and resolution

The Realism Reader Colin Elman, Michael Jensen, 2014-08-12 The Realism Reader provides broad coverage of a centrally important tradition in the study of foreign policy and international politics After some years in the doldrums political realism is again in contention as a leading tradition in the international relations sub-field Divided into three main sections the book covers seven different and distinctive approaches within the realist tradition classical realism balance of power theory neorealism defensive structural realism offensive structural realism rise and fall realism and neoclassical realism The middle section of the volume covers realism's engagement with critiques levelled by liberalism institutionalism and constructivism and the English School The final section of the book provides materials on realism's engagement with some contemporary issues in international politics with collections on United States U.S. hegemony European cooperation and whether future threats will arise from non-state actors or the rise of competing great powers The book offers a logically coherent and manageable framework for organizing the realist canon and provides exemplary literature in each of the traditions and dialogues which are included in the volume Offering substantial commentary and analysis and including

An Ontological Rethinking of Identity in International Studies Yong-Soo Eun, 2023-05-05 This book shows that identity studies in the discipline of International Relations IR generally cohere around two discrete understandings of being substantialism and correlationism and that their analytical theoretical and epistemological orientations are split along those lines This binary opposition makes it difficult for identity scholarship to meet the internal validity standard of coherence while unnecessarily narrowing the

theoretical lenses of constructivism in IR The author argues that the best way to step outside that binary is to re ground identity in ontology of immanence The book shows that immanent ontological thinking enables us to have a pluralist epistemology and methodology for the study of identity including both positivist and interpretivist orientations without yielding a logically inconsistent alignment

Regional Peacemaking and Conflict Management Carmela Lutmar, Benjamin Miller, 2015-11-06 This volume examines mechanisms for regional peacemaking and conflict management in Europe and the Middle East To date little research has been devoted to uncovering the conditions for peace and the factors that contribute to stabilizing the state of peace This volume assesses the factors that contribute to regional pacification the incentives that motivate states in establishing peaceful relations and most importantly how regions become peaceful It discusses the conditions under which various types of peace might emerge on a regional level and the factors most likely to determine the outcome The book takes an innovative approach through a systematic comparison of two regions that are particularly prominent and important for the subject of regional pacification Europe and the Middle East While many believe that the European case is the indispensable model for peacemaking others believe that these two regions are too different for Europe to be a useful framework for the Middle East This volume occupies a middle ground between these two extreme positions It argues that while a mindless copying of European models will not lead to peace in the Middle East important insights can be gained from the most successful case of regional peacemaking to date This work will be of much interest to students of regional security peacemaking conflict management Middle East politics European security and IR in general
