Paradigm shift towards a spiritual worldview Franz Günter Leicht,2021-06-22 Since the middle end of 1993 I have been grappling intensively with questions about our existence This book is the result of my long term study with which I have tried to inspect our current worldview the materialistic worldview It shows that the sciences have come up with answers that question their own assumptions and ideas about this world E g the world famous physicist Stephen W Hawking said that it is not really possible for physics to clarify whether the material world is a real world According to the latest findings in physics the material world can also be an imaginary world I m investigating this question in detail and come to the conclusion that we need a new worldview This is the spiritual worldview This new worldview clearly states that there is a non material spirit that is responsible for the material world What this means for each and every one of us is revealed in this study **A Peaceful Realm** Jane McIntosh,2002 Some 5000 years ago civilized societies emerged in the valleys of four great rivers the Nile the Euphrates the Yellow and the Indus Of these primary Old World civilizations that of the Indus remains the least known and the most enigmatic though paradoxically it has left perhaps the most lasting influence on the societies that followed it In this lucid account abundantly illustrated with maps and photographs including sixteen pages in full color archaeologist Jane McIntosh addresses what we know about the rise and fall of the civilization of the Indus and Saraswati valleys what it might be reasonable to speculate and what we still hope to learn While drawing on archaeological and linguistic evidence to create a portrait of the civilization from the inside McIntosh also carefully pieces together a wider picture of the Indus civilization using evidence from its trading partners in Mesopotamia the Persian Gulf the Indian

Author's Note Science history shows many theories to have been presented and initially accepted but had later been found wanting or replaced by a more enlightening theory The earth as the centre of the universe with the sun and other planets revolving around it was widely accepted during the second century A D Since then science has progressed in leaps and bounds until today we talk of parallel universes super strings and wormholes We have the ten dimension theory of the universe which makes possible the merger between the geometry of Einstein's theory and that of the quantum field theory Enormously powerful theorems in mathematics now take on physical significance Physics and mathematics are so intricately interwoven that mathematics leads us in directions we would not normally take if we followed up physical ideas by themselves Calculus was born from a need by Newton to solve the equations for gravity Physics I believe is ultimately based on a small set of physical principles These principles called first principles can usually be expressed in plain English without reference to mathematics From the Copernican theory to Newton's laws of motion and even Einstein's relativity the basic physical first principles require just a few sentences that are largely independent of any mathematics And remarkably only a handful of first principles are sufficient to summarise most of modern physics Nevertheless mathematical equation is still the best way to prove a point Cosmologist and mathematician Stephen Hawking has written eloquently about the need to explain to the widest possible audience the physical picture underlying all of physics If we do discover a complete theory it should in time be understandable by everyone not just a few scientists Then we shall all philosophers scientist and just ordinary people be able to take part in the discussion of the question of why it is that we and the universe exist If we find the answers to that it would be the ultimate triumph of human reason for then we would know the mind of God My Seven Circle Theory has a correlation with the creation account stated in the first chapter of Genesis in the Bible The activity that we see in nature all around us was all progressively created in six cyclic periods out of this dark matter or energy medium Today we live in that sixth cyclic phase Here all physical matter i.e. protons atoms are in a progressive decay status which gives us a duration measurement factor called Time Time only commenced with the start of this sixth phase The next phase is the seventh cycle phase and total atom decay will have been completed with physical matter non-existent The seventh cycle phase will be one of total inactivity The universe will be dormant and devoid of all matter virtually a period of rest Perhaps the Ancients really knew how our universe was created and that with the passing of time their records seem distorted The overall seven cycles principle

however has perpetuated Today Big Bang theorists believe that a mysterious fluid existed at 10¹² seconds from Big Bang and that in the following moments as expansion occurred and temperatures dropped a sudden phase change occurred in this mysterious fluid reminiscent of water freezing to ice Suddenly they believe all the familiar particles protons electrons neutrinos photons quarks etc came into existence Faster than Light is a science theory of invisible Dark Matter and has its relationship with the E in Einstein's formula $E = mc^2$ As such throughout the text I have referred to Dark Matter as that subtle Energy Medium from which all mass is created It is a Grand Unified Theory but without rigorous mathematical treatment
