Wonderful previously unpublished images documenting the years before and after the Great Central Line was cut British Steam Military Connections: London, Midland and Scottish Railway Steam Locomotives Keith Langston, 2019-08-30 This British Railways history explores the long held tradition of naming steam locomotives in honor of the military The naming of steam locomotives was a beloved British tradition since the first railway locomotives appeared in 1804 Many of the names were chosen in honor of military personnel regiments squadrons naval vessels aircraft battles and associated historic events This volume looks specifically at the steam locomotives with military inspired names that were built by the London North Eastern Railway which joined the British Railways stock in 1948 A large number of the company's Jubilee class locomotives were given names with a military connection as were a small number of Black Five class engines Famously the majority of the much admired Royal Scot class of engines carried names associated with the military in general and regimental names in particular Many of the nameplates were adorned with ornate crests and badges Long after the demise of mainline steam rescued nameplates have become prized collectors items This generously illustrated publication highlights the relevant steam locomotives and explains the origins and social history surrounding their military names *British Steam Patriots* Keith Langston, 2012-04-19 The Patriot class often referred to as Baby Scots were an immediate success displaying consistently good performance The class was withdrawn over a two year period between 1960 and 1962 having all covered around 1 3 million miles each unfortunately too early to be considered for preservation The last two withdrawn were in good condition on withdrawal but unfortunately all were scrapped Although no Patriot in either rebuilt or unrebuilt forms survived into preservation a new Patriot is under construction at the Llangollen Railway The LMS Patriot Project a registered charity is appealing for donations or regular contributions to build the new 3 cylinder Fowler designed parallel boiler 4 6 0 express passenger loco Although mostly new the group will use the leading wheel sets from two LMS 8F locomotives An unrestored surviving LMS Fowler tender from Woodham Brothers Barry scrap yard will also be used for the project The new build Patriot is being assembled at the Llangollen Railway Works and will carry the number of the last built LMS number 5551 or British Railways number 45551 After a public poll the new Patriot locomotive will be named The Unknown Warrior whose tomb is located in Westminster Abbey The new Royal British Legion backed engine will be launched in late 2011 or early 2012 and this is the only official book of the project Containing hundreds of new never before published photographs British Steam Patriot will tell the story of the engine from its original concept follow its production throughout the building period and also its launch The book will be endorsed by the Royal British Legion and promoted to all its members This will be a must for all railway enthusiasts **A History of the Butlin's Railways** Peter Scott, 2001 Steam on the Eastern & Midland

Rebuilt 'Royal Scots' Fred James,David Hunt,Bob Eddery,R. J. Essery,1999 **The A4 Pacifics After Gresley** Ronald Hillier,Tim Hillier-Graves,2023-11-23 In their book Gresley s Silver Link the authors analyzed the evolution of the A4s Gresley s and their service up to Gresley s death in 1941 This book takes this compelling story from the early years of the war up to their demise in the 1960s After four years of service pulling the LNER s most prestigious trains the A4s took on a more utilitarian role and for six years worked hard to support Britain s war effort From this they emerged bowed but unbeaten although in an extremely jaded condition Once restored they took up where they had left off in 1939 and did exceptional service for the rest of their days With the help of previously unpublished material the authors analyze the second phase of the A4s careers first as LNER engines then from 1948 under British Railways management Without a diesel or electric fleet of engines to replace them they entered a second golden age of fast running in the 50s Then in the Swinging Sixties they faced as some thought a premature end as part of a much delayed modernization program Until withdrawn from service they continued to astound their footplate crew and performed exceptionally well even when maintenance standards had slipped and their condition had deteriorated They were thoroughbreds and have become a fitting memorial to the master engineers who produced and sustained them for 30 years or more **Steam in the East Midlands and Lincolnshire**
