Greep, 2013-10-22 Recent Progress in Hormone Research Volume 41 covers the proceedings of a Laurentian Hormone Conference held in late August 1984 at the Homestead in Hot Springs Virginia The book presents papers on the hormone receptor interactions the biosynthesis secretion metabolism and mechanism of action of the steroid hormones and the mechanisms of action of thyroid stimulating hormone TSH and TRH The text also includes papers on the molecular characterization of a brain specific mRNA and the factors affecting changes in frequency and amplitude of GnRH pulses and the resulting functional consequences in various mammals including humans with disorders of fertility Papers on the biological heritage of mammalian endocrinology such as the actions of urotensin I in mammals and fishes and the clinical implications of the glycosylation and posttranslational processing of the TSH are also encompassed Endocrinologists neuroscientists biochemists biophysicists and scientists involved in hormone research will find the book invaluable

Recent Progress in Hormone Research - Volume 50 C. Wayne Bardin, 2013-10-22 Recent Progress in Hormone Research Volume 50 Proceedings of the 1993 Laurentian Hormone Conference focuses on the advancements of processes methodologies techniques and approaches involved in hormone research The selection first offers information on the molecular design of the NMDA receptor channel synthesis and signaling of growth hormone releasing hormone and signaling mechanisms during the response of pituitary gonadotropes to GnRH The discussions focus on calcium economy of gonadotropes role of oscillations structure and expression of the GHRH gene transgenic animal models for GHRH action and functional determinants in NMDA receptors The text then elaborates on signaling mechanisms during the response of pituitary gonadotropes to GnRH molecular genetic analysis of cAMP and glucocorticoid signaling in development and activins and the receptor serine kinase superfamily The publication takes a look at MAP kinase cascade expression and signal transduction pathways of gonadotropin releasing hormone receptors ovarian cell differentiation and the role of oxytocin and its receptor in parturition The book also examines the role of prolactin in developmental differentiation of hypophysiotropic tuberoinfundibular dopaminergic neurons and calcitonin gene expression in rat uterus during pregnancy The selection is a valuable source of data for researchers interested in hormone research Neuroendocrinology Transmembrane signaling Reproduction Steroids and the steroid receptor family Hypertension

The Practice of Time Series Analysis Hirotugu Akaike, Genshiro Kitagawa, 2012-12-06 Due to the introduction of the information criterion AIC and development of practical use of Bayesian modeling the method of time

analysis is now showing remarkable progress In attempting the study of a new field the actual phenomenon is rarely so simple as to allow direct applications of existing methods of analysis or models The real thrill of the statistical analysis lies in the process of developing a new model depending on the purpose and the characteristics of the object of the research The purpose of this book is to introduce the readers to successful applications of the methods of time series analysis in a variety of fields such as engineering earth science medical science biology and economics The editors have been aware of the importance of cooperative research in statistical science and carried out various cooperative research projects in the area of time series analysis The Institute of Statistical Mathematics was reorganized as an inter university research institute in 1985 and the activities of the Institute have been organized to promote the cooperative researches as its central activity This book is composed of the outcomes of cooperative researches developed within this environment and contains the results ranging from the pioneering realizations of statistical control to the latest consequences of time series modeling *Progress in Drug*

Karger - Connecting the World of Biomedical Science H. M. Schmeck Jr., M., Hempe,2015-06-30 This richly illustrated Festschrift chronicles the company's development and contributions in the service of medicine and science since 1890 when the young bookseller Samuel Karger went into the medical publishing business in Berlin His first book was a compact manual in obstetrics entitled *Geburtshilfliches Vademecum* Over the years the company developed into an internationally active now Swiss based company which employs 250 people worldwide The highly specialized Karger publishing program currently encompasses 100 journals and 50 new books per year across all biomedical disciplines Post-genomic Approaches in Drug and Vaccine Development Kishore R. Sakharkar, Meena K. Sakharkar, Ramesh Chandra,2022-09-01 Over the past decade genome sequencing projects and the associated efforts have facilitated the discovery of several novel disease targets and the approval of several innovative drugs To further exploit this data for human health and disease there is a need to understand the genome data itself in detail discover novel targets understand their role in physiological pathways and associated diseases with the aim to translate these discoveries to clinical and preventive medicine It is equally important to understand the labors and limitations in integrating clinical phenotypes with genomic transcriptomic proteomic and metabolomic approaches Angiotensin I.H. Page, F.M. Bumpus,2012-12-06 The history of arterial hypertension is both long and short long since BRIGHT 1827 first related hardness of the pulse to hardness of the kidneys and hypertrophy of the heart short in that modern research began in the late twenties Most of what we know of these diseases has been discovered in the past fifty years The modern story should have begun in 1897 when an extract of kidney was shown to be pressor But little was done with knowledge until about 1929 when the relationship of this kidney extract called renin to hypertension was postulated

The pressor effects were however unlike most of those seen with substances such as epinephrine or vasopressin. Plasma was required for action of renin and the active substance appeared to be protein. In 1939 it was shown that renin was not in itself a pressor substance but rather a proteolytic enzyme which produced a powerful pressor substance acting on a substrate synthesized by the liver. Later it was noted that the first definable step after the formation of this peptide was cleaving of the decapeptide which had little or no demonstrable activity with loss of two amino acids to form the octapeptide called angiotensin. Within a decade synthesis was achieved which made the substance available for world wide study. *Journal of the National Cancer Institute*, 1991

Methods of Biochemical Analysis David Glick, 2009-09-24 Biochemical analysis is a rapidly expanding field and is a key component of modern drug discovery and research. *Methods of Biochemical Analysis* provides a periodic and authoritative review of the latest achievements in biochemical analysis.
