Human Resource and Regional Economic Development Paul V. Braden, 1977. *Reducing Urban Poverty in the Global South* David Satterthwaite, Diana Mitlin, 2013-08-15. Urban areas in the Global South now house most of the world's urban population and are projected to house almost all its increase between now and 2030. There is a growing recognition that the scale of urban poverty has been overlooked and that it is increasing both in numbers and in the proportion of the world's poor population that live and work in urban areas. This is the first book to review the effectiveness of different approaches to reducing urban poverty in the Global South. It describes and discusses the different ways in which national and local governments, international agencies, and civil society organizations are seeking to reduce urban poverty. Different approaches are explored: for instance, market approaches, welfare rights based approaches, and technical professional support. The book also considers the roles of clientelism and of social movements. Case studies illustrate different approaches and explore their effectiveness. *Reducing Urban Poverty in the Global South* also analyses the poverty reduction strategies developed by organized low income groups, especially those living in informal settlements. It explains how they and the federations or networks they have formed have demonstrated new approaches that have challenged adverse political relations and negotiated more effective support. Local and national governments and international agencies can become far more effective at addressing urban poverty at scale by, as is proposed in this book, working with and supporting the urban poor and their organizations. This book will be an invaluable resource for researchers and postgraduate students in urban development, poverty reduction, urban geography, and for practitioners and organisations working in urban development programmes in the Global South. Unemployment and Social Exclusion Sally Hardy, 2013-10-18. Persistent high unemployment and growing labour market inequality have become entrenched features of many European countries. This edited collection of papers focuses on the regional and local dimensions of these problems across the European Union as a whole and more particularly in the UK. In addressing the contemporary landscape of unemployment, social exclusion, and public policy, the contributors highlight several key themes, including: How the process of unemployment and social exclusion have an important local level operation; The increasing gender dimension and counts of unemployment to provide effective guides to the true scale of joblessness; The need for more local focused policy interventions to help reduce the problems of unemployment, employment insecurity, and low incomes that now characterise many of the advanced countries. **Jobs Impact Bulletin**, 1985. *Urban Policy* United States. Congress. House. Committee on Banking, Finance, and Urban Affairs. Subcommittee on Housing and Community Development, 1978. **Urban Illusions** Michael Bernick, 1987-12. *Urban Illusions* is the best first hand account I know of the struggle to solve the employment problem in American cities. Mike Bernick combines a knowledge of the issues as seen from Washington with actual experience leading anti poverty programs at the local level, a rare combination. He writes extremely well and he makes

shrewd suggestions for where employment policy should go from here Anybody interested in American social policy will find this book invaluable Lawrence M Mead Author of *Beyond Entitlement Urban Illusions* goes beyond description of inner city unemployment to consider efforts to reduce the problem It directly examines the successes and failures that have resulted from past attempts to reduce employment Although the volume includes data on poverty and government anti poverty programs it is written from the perspective of one working on a local grass roots level author Michael Bernick is the founder and executive Director of this outstanding inner city employment program Neighborhood Jobs, Race, and Skills Daniel Immergluck,2018-05-20 Originally published in 1998 Neighbourhood Jobs Race and Skills argues that race is a powerful and persistent barrier to employment Analysing existing literature this book outlines how racial discrimination in hiring against African Americans appears to remain a contributor to high unemployment rates in black neighbourhoods The book also discusses how issues such as poor schools and physical and social isolation compound employment problems as well as changes in policy on skill requirements and the location of jobs The book argues that combined this is a major contributor to concentrated urban employment and poverty The Administration's 1982 National Urban Policy Report United States.
