

Having briefly covered radio theory, GMDSS and AIS, we will now look at what VHF radios are available. Although specific models are shown in the illustrations, I am not recommending any particular manufacturer. That is entirely your choice and will depend on your own preferences and recommendations from others. In practice, all VHF radios share many of the same features and nomenclature. Even the layout of the controls can be very similar.

A relatively new addition to the VHF market is the 'smart' radio which boasts an AIS transceiver, intuitive touchscreen operation, connectivity with smart phones, Wi-Fi, combined AIS and VHF display, GPS and more. It's probably more suited to large pleasure craft and comes at a price. You will not get much change from £2,000 for a 'basic' version.

If you sail further afield and are likely to be in busy shipping areas such as the North Sea or English Channel, then the inclusion of AIS could be invaluable. In this case, a set which also has its own GPS monitor is a neat solution and makes for simple installation.

Not many VHF radios yet include an AIS transponder (receive and transmit), and they are quite expensive. However, you may feel that this offsets the need for a stand-alone AIS transceiver and all the associated connectivity.

Prices vary from less than £150 to well over £1,000. A good DSC radio with built-in AIS (receive-only) might set you back about £300. As ever, you tend to get what you pay for. A 'bargain' radio may not be as robust or capable as more expensive alternatives.

All new VHF fixed radios include DSC but some older sets, and many handheld radios, do not. If your boating is mainly in local waters and your only requirement is to make an occasional call to your harbour master or marina or, of course, in the event of an emergency, you may opt for a relatively basic set or even just a handheld radio.

Radios with various features.
