Figuring Anthropology David Hurst Thomas,1976 **Archaeological Method and Theory** Linda Ellis,2003-12-16

This Encyclopedia brings together the most recent scientific information on a collection of subjects that are too often and inconveniently treated in separate publications It provides a survey of archaeological method and theory as well as the application of physical and biological sciences in archaeological research Every aspect of archaeological work is represented from the discovery process to the ultimate disposition of materials Thus the reader will find entries on subject matter covering disciplinary theory legislation affecting the work of archaeologists pre excavation surveying excavation methodology on site conservation techniques post excavation analysis The rapid evolution of analytical technology is often superficially treated or not covered at all in textbooks or other commonly available sources Here the latest refinements in techniques such as radiometric dating stable isotopic analysis and the PCR technique of DNA analysis are presented clearly and authoritatively The discussion of these techniques is amplified by including results of the work of professionals conducting interdisciplinary research and by covering the methodological enhancements provided by the physical and natural sciences Cultural property legislation regardless of its country of origin has affected how archaeologists conduct their work This encyclopedia covers all major U S legislation developed for the protection of cultural property including the recent Native American Graves Protection and Repatriation Act and offers a substantial article on worldwide legislation concerning the reburial of human remains and its effects on the present and future practice of archaeology Without some sort of conservation program at the point of excavation valuable materials may be inadvertently contaminated or destroyed Many simple and low cost techniques to promote both sample integrity and long term preservation for major classes of materials are described in this volume Traditional treatments of method and theory usually focus on prehistoric periods and are limited in their geographic range This volume includes discussions based on various historical periods on different continents as reflected in entries such as Historical Archaeology Industrial Archaeology Medieval Archaeology and Classical Archaeology

The Archaeologist's Laboratory E.B. Banning,2000-09-30 Intended as a text for students in upper division undergraduate and graduate level courses as well as a manual for professional researchers and cultural resource management practitioners the book is abundantly illustrated and referenced and includes a glossary of key terms Suggested laboratory exercises to accompany the text are available on a web site BOOK JACKET *Refiguring Anthropology* David Hurst Thomas,1986

Introductory text which explores the quantitative techniques of probability statistics as they apply to are used by anthropologists *Centuries of Decline during the Hohokam Classic Period at Pueblo Grande* David R. Abbott,2016-12-01 In the prehispanic Southwest Pueblo Grande was the site of the largest platform mound in the Phoenix basin and the most politically prominent village in the region It has long been held to represent the apex of Hohokam culture that designates the Classic period New data from major excavations in Phoenix however suggest that little was classic about the Classic period at

Pueblo Grande These findings challenge views of Hohokam society that prevailed for most of the twentieth century suggesting that for Pueblo Grande it was a time of decline rather than prosperity a time marked by overpopulation environmental degradation resource shortage poor health and social disintegration During this period the Hohokam in the lower Salt River Valley began a precipitous slide toward the eventual abandonment of a homeland that they had occupied for more than one thousand years This volume is a long awaited summary of one of the most important data recovery projects in Southwest archaeology synthesizing thousands of pages of data and text published in seven volumes of contract reports The authors all leading authorities in Hohokam archaeology who played primary roles in this revolution of understanding here craft a compelling argument for the eventual collapse of Hohokam society in the late fourteenth century as seen from one of the largest and seemingly most influential irrigation communities along the lower Salt River Drawing on extremely large and well preserved collections the book reveals startling evidence of a society in decline as reflected in catchment analysis archaeofaunal assemblage composition skeletal studies burial assemblages artifact exchange and ceramic production The volume also includes a valuable new summary of the archival reconstruction of the architectural sequence for the Pueblo Grande platform mound With its wealth of data interpretation and synthesis Centuries of Decline represents a milestone in our understanding of Hohokam culture It is a key reference for Southwest archaeologists who seek to understand the Hohokam collapse and a benchmark for anyone interested in the prehistory of Arizona

Statistics for Archaeologists
Robert D. Drennan, 2013-06-29 This book is intended as an introduction to basic statistical principles and techniques for the archaeologist It grows primarily from my experience in teaching courses in quantitative analysis for undergraduate and graduate students in archaeology over a number of years The book is set specifically in the context of archaeology not because the issues dealt with are uniquely archaeological in nature but because many people find it much easier to understand quantitative analysis in a familiar context one in which they can readily understand the nature of the data and the utility of the techniques The principles and techniques however are all of much broader applicability Physical anthropologists cultural anthropologists sociologists psychologists political scientists and specialists in other fields make use of these same principles and techniques The particular mix of topics the relative emphasis given them and the exact approach taken here however do reflect my own view of what is most useful in the analysis of specifically archaeological data It is impossible to fail to notice that many aspects of archaeological information are numerical and that archaeological analysis has an unavoidably quantitative component Standard statistical approaches are commonly applied in straightforward as well as unusual and ingenious ways to archaeological problems and new approaches have been invented to cope with the special quirks of archaeological analysis The literature on quantitative analysis in archaeology has grown to prodigious size in the past 25 or 30 years

Mixed Methods in Ethnographic Research Pertti J. Pelto, 2017-03-03
Mixed Methods in Ethnographic Research Historical Perspectives captures the dynamic history and development of mixed

methods research in a narrative of personal discovery growth and experience Distinguished ethnographer and methodologist Pertti Peltto who first called for the integration of qualitative and quantitative research methods nearly half a century ago establishes a direct line between the earliest examples of ethnographic research and the ongoing mixed method discussions in academic institutions throughout the world By bringing together such distinct historical perspectives with his own reflections on mixed methods research Peltto offers a rare and endlessly enriching account that will satisfy the ever growing need for a better quality of practical data gathering and give researchers a foundation for promoting mixed methods in the future
