Energies and Patterns in Psychological Type John Beebe,2016-06-17 This book encapsulates John Beebe s influential work on the analytical psychology of consciousness Building on C G Jung s theory of psychological types and on subsequent clarifications by Marie Louise von Franz and Isabel Briggs Myers Beebe demonstrates the bond between the eight types of consciousness Jung named and the archetypal complexes that impart energy and purpose to our emotions fantasies and dreams For this collection Beebe has revised and updated his most influential and significant previously published papers and has introduced in a brand new chapter a surprising theory of type and culture Beebe s model enables readers to take what they already know about psychological types and apply it to depth psychology The insights contained in the fifteen chapters of this book will be especially valuable for Jungian psychotherapists post Jungian academics and scholars psychological type practitioners and type enthusiasts Intellectual Journeys in Ecological Psychology Agnes Szokolszky,Catherine Read,Zsolt Palatinus,2022-12-27 Intellectual Journeys in Ecological Psychology Interviews and

Reflections from Pioneers in the Field presents 12 in depth interviews with prominent scientists associated with Ecological Psychology rooted in James Gibson's radical approach to perception. Featuring a mix of interviews conducted around the turn of the millennium with leading figures of Ecological Psychology, the book reveals discussions not previously found in publications and authentic personal perspectives about the early days of Ecological Psychology, a significant paradigm of post-cognitivist psychology. The interviews are supplemented by current reflections that bridge the past to the present. Each interview chapter also contains a brief biography of the interviewee and a list of their top ten most significant publications. An introductory chapter by Harry Heft provides an overview of Gibson's theory and the post-Gibsonian theoretical landscape. A further chapter by the editors highlights lineages and patterns in the scientific careers and work of the interviewees. An epilogue by William Warren concludes the volume addressing the current state and directions of Ecological Psychology. In the Appendix, photographs taken by Sverker Runeson in the 1960s and 1970s show scenes and actors from scientific events in Ecological Psychology. This book will be beneficial to all researchers and students in the international community of Ecological Psychology. It will also serve as a starting point for those who wish to learn more about the movement and origins of Ecological Psychology.

God and Psychology Stephen E. Parker, 2022-11-08. God and Psychology: How the Early Religious Development of Famous Psychologists Influenced their Work examines the impact their religious background had on the lives and work of several famous psychologists. These are fascinating stories often overlooked in the biography of these thinkers. Drawing from autobiographical and biographical materials, this book demonstrates how the impact of these early exposures to religion linger in the writings and actions of Sigmund Freud, Carl Jung, Erik Erikson, B.F. Skinner, and Carl Rogers in both explicit and indirect ways. This book will be of interest to anyone interested in the intersection of psychology and religion.

The about 450 congress participants showed great interest in the speeches. They are not published anywhere else. The editors regard the article as an important contribution to the future development of sport and exercise psychology.
