Archaeological Situations Gavin Lucas, 2022-09-02 This book is an introduction to theory in archaeology but with a difference Archaeological Situations avoids talking about theory as if it was something you apply but rather as something embedded in archaeological practice from the start Rather than see theory as something worked from the outside in this book explores theory from the inside out which means it focuses on specific archaeological practices rather than specific theories It starts from the kinds of situations that students find themselves in and learn about in other archaeology courses avoiding the gap between practice and theory from the very beginning It shows students the theoretical implications of almost everything they engage in as archaeologists from fieldwork recording writing up and making and assessing an argument to exploring the very nature of archaeology and justifying its relevance Essentially it adopts a structure which attempts to pre-empt one of the most common complaints of students taking theory courses how is this applicable Aimed primarily at undergraduates this book is the ideal way to engage students with archaeological theory

cognitive science and cognitive archaeology The author offers two original case studies demonstrating how material culture pragmatically mediates social relations one focusing on the aftermath of the Pueblo Revolt from 1680 1694 and the other on the New England utopian community of Brook Farm from 1842 1846 Throughout his analysis Preucel emphasizes the close links between archaeology and other social sciences But he also contends that archaeology by virtue of the powerful ideological character of the past can open up new spaces for discourse and dialogue about meaning and in the process make a valuable contribution to contemporary semiotics

The Paradox of Relevance Carol J. Greenhouse, 2011-05-05 Selected by Choice magazine as an Outstanding Academic Title Between 1990 and 1996 the U S Congress passed market based reforms in the areas of civil rights welfare and immigration in a series of major legislative initiatives These were announced as curbs on excessive rights and as correctives to a culture of dependency among the urban poor stock images of racial and cultural minorities that circulated well beyond Congress But those images did not circulate unchallenged even after congressional opposition failed In *The Paradox of Relevance* Carol J Greenhouse provides a political and literary history of the anthropology of U S cities in the 1990s where below the radar New Deal liberalism with its iconic bond between society and security continued to thrive *The Paradox of Relevance* opens in the midst of anthropology's so called postmodern crisis and the appeal to relevance as a basis for reconciliation and renewal The search for relevance leads outward to the major federal legislation of the 1990s and the galvanic political tensions between rights and market based reforms Anthropologists efforts to inform those debates through relevant ethnography were highly patterned revealing the imprint of political tensions in shaping their works central questions and themes as well as their organization narrative techniques and descriptive practices In that sense federal discourse dominates the works demonstrations of ethnography's relevance however the authors simultaneously resist that dominance through innovations in their own literariness in particular drawing on diasporic fiction and sociolegal studies where these articulate more agentive meanings of identity and difference The paradox of relevance emerges with the realization that in the context of the times affirming the relevance of ethnography as value neutral science required the textual practices of advocacy and art

book connects ethnographic data to what eventually becomes theories formed from the field Chapters by women from a variety of disciplines Anthropology Literary and Translation studies Political Sciences transcend the academic boundaries between social sciences and humanities The book shows how the researchers navigate in the field write in ways that defy their academic life and work and call into question their narrative voice The book presents a space for women to reflect on their individual themes of research and at partially filling the vacuum mentioned above the silences of women's voices and expressions The experiences described in the chapters differ both along the divide of a native and a non native fieldworker and along different disciplinary fields but they share the experience of a long term fieldwork in India and the need to self reflect on the impact of this experience on the way the field is represented on the people encountered in the field on the way the field impacted on the fieldworker The book is a useful presentation of how female researchers act in the field as women and scholars Filling a gap in the existing literature of ethnographic research methods the book will be of interest to students and researchers interested in the fields of Gender Studies Social Work Sociology Anthropology and Asian Studies

The Sacred and its Scholars Idinopulos,Yonan,1996-10-01 This volume of essays is devoted to a careful examination of the importance of methodology in the study of primary religious data The essays focus on the Sacred as an ultimate object of descriptive analysis and critical scrutiny on the part of a select number of North American and European methodologists in the study and teaching of the history of religions and its allied disciplines The central question to which the contributors respond are these What is the Sacred Is it a being or a concept of a being is it a mental state or an objective reality or something else entirely Can the Sacred be described as an empirical fact or as a formal rule for religious inquiry If the Sacred is a valid category in the study and teaching of religion then what can be said about the antithesis of the sacred namely the profane or the secular This volume probes these questions with great care in order to justify a number of ways the Sacred can be construed as an indispensable notion for the study and teaching of religion

Stocking, Jr.,2010-11-18 George W Stocking Jr has spent a professional lifetime exploring the history of anthropology and his findings have shaped anthropologists understanding of their field for two generations Through his meticulous research Stocking has shown how such forces as politics race institutional affiliations and personal relationships have influenced the discipline from its beginnings In this autobiography he turns his attention to a subject closer to home but no less challenging Looking into his own black box he dissects his upbringing his politics even his motivations in writing about himself The result is a book systematically at times brutally self questioning An interesting question Stocking says is one that arouses just the right amount of anxiety But that very anxiety may be the ultimate source of Stocking's remarkable intellectual energy and

output In the first two sections of the book he traces the intersecting vectors of his professional and personal lives The book concludes with a coda Octogenarian Afterthoughts that offers glimpses of his life after retirement when advancing age cancer and depression changed the tenor of his reflections about both his life and his work This book is the twelfth and final volume of the influential History of Anthropology series
