Reflective Faculty Evaluation Enhancing Teaching And Determining Faculty Effectiveness:

Reflective Faculty Evaluation John A. Centra,1993-11-17 John A Centra provides faculty members administrators and faculty development specialists with the up to date approaches they need to evaluate and improve teaching He underscores the importance of active methods of teaching and the need to evaluate those methods in less traditional ways He discusses the value and proper use of self reports and portfolios and examines better ways to involve colleagues in evaluating and improving teaching

Effective Teaching in Higher Education Raymond P. Perry,John C. Smart,1997 Assists academic staff to develop their effectiveness as teachers and improve their students learning by giving practical guidelines and suggestions for teaching and a series of activities

Evaluating, Improving, and Judging Faculty Performance in Two-Year Colleges Charles Finley,Richard I. Miller,Candace S. Vancko,2000-03-30 With nearly 48 percent of all U S undergraduates attending community and technical colleges the two year sector is an integral part of our nation s higher education system and a vital part of our nation s future The need for effective faculty evaluation and professional development within two year colleges stems partly from the size of this sector and also from the diversity of its program offerings and its student body Miller and his co authors bring timely authoritative and practical material to two audiences in this rapidly growing field of education first teachers who have permanent appointments but could use professional development and improvement and second the already large and still growing number of part time instructors who could use more evaluating and improving This book is intended to be a direct assistance for these groups as well as to administrators who must make personal decisions This professional book is for human resource managers and staff development officers of two year colleges A greater emphasis needs to be placed on human resource management according to Miller and his co authors that will result in better personnel decision making

Faculty Misconduct in Collegiate Teaching John M. Braxton,Alan E. Bayer,2003-04-30 In Faculty Misconduct in Collegiate Teaching higher education researchers John Braxton

and Alan Bayer address issues of impropriety and misconduct in the teaching role at the postsecondary level Braxton and Bayer define and examine norms of teaching behavior what they are how they come to exist and how transgressions are detected and addressed Do faculty members across various collegiate settings for example share views about appropriate and inappropriate teaching behaviors as they share expectations regarding actions related to research And what mechanisms are utilized to correct inappropriate behavior on the part of college and university teachers The authors work is based on survey results obtained from faculty members at research universities liberal arts colleges and two year community junior and technical colleges Braxton and Bayer s focus is on undergraduate teaching in four disciplines biology history mathematics and psychology In their analyses the authors examine how individual disciplinary and institutional differences influence professorial behavior In contrast to the more explicitly understood and enforced rules of conduct in research the authors find that teaching norms are informally defined and observed They argue that a formal code of ethics for undergraduate teaching would serve the dual purpose of improving undergraduate education and elevating the status of college teaching A groundbreaking study of contemporary academe Faculty Misconduct in Collegiate Teaching is required reading for all university and college instructors and administrators *Evaluating and Improving Undergraduate Teaching in Science, Technology, Engineering, and Mathematics* National Research Council, Division of Behavioral and Social Sciences and Education, Center for Education, Committee on Recognizing, Evaluating, Rewarding, and Developing Excellence in Teaching of Undergraduate Science, Mathematics, Engineering, and Technology, 2003-01-19 Economic academic and social forces are causing undergraduate schools to start a fresh examination of teaching effectiveness Administrators face the complex task of developing equitable predictable ways to evaluate encourage and reward good teaching in science math engineering and technology *Evaluating and Improving Undergraduate Teaching in Science Technology Engineering and Mathematics* offers a vision for systematic evaluation of teaching practices and academic programs with recommendations to the various stakeholders in higher education about how to achieve change What is good undergraduate teaching This book discusses how to evaluate undergraduate teaching of science mathematics engineering and technology and what characterizes effective teaching in these fields Why has it been difficult for colleges and universities to address the question of teaching effectiveness The committee explores the implications of differences between the research and teaching cultures and how practices in rewarding researchers could be transferred to the teaching enterprise How should administrators approach the evaluation of individual faculty members And how should evaluation results be used The committee discusses methodologies offers practical guidelines and points out pitfalls *Evaluating and Improving Undergraduate Teaching in Science Technology Engineering and Mathematics* provides a blueprint for institutions ready to build effective evaluation programs for teaching in science fields *Developing Faculty Learning Communities at Two-Year Colleges* Susan Sipple, Robin Lightner, 2023-07-03 This book introduces community college faculty and faculty developers to the use of faculty

learning communities FLCs as a means for faculty themselves to investigate and surmount student learning problems they encounter in their classrooms and as an effective and low cost strategy for faculty developers working with few resources to stimulate innovative teaching that leads to student persistence and improved learning outcomes Two year college instructors face the unique challenge of teaching a mix of learners from the developmental to high achievers that requires using a variety of instructional strategies and techniques Even the most experienced teachers can find this diversity demanding Faculty developers at many two year colleges still rely solely on the one day workshop model that while useful rarely results in sustained student centered changes in pedagogy or the curriculum and may not be practicable for the growing cohort of part time faculty members By linking work in the classroom with scholarship and reflection FLCs provide participants with a sense of renewed engagement and stimulate collegial exploration of ways to achieve educational excellence FLCs are usually faculty instigated and cross disciplinary and comprise groups of six to fifteen faculty that work collaboratively through regular meetings over an extended period of time to promote research and an exchange of experiences foster community and develop the scholarship of teaching FLCs alleviate burnout and isolation promote the development testing and peer review of new classroom strategies or technologies and lead to the reenergizing and professionalization of teachers This book introduces the reader to FLCs and to the Scholarship of Teaching and Learning offering examples of application in two year colleges Individual chapters describe among others an FLC set up to support course redesign an Adjunct Connectivity FLC to integrate part time faculty within a department and collaborate on the curriculum a cross disciplinary FLC to promote student self regulated learning and improve academic performance and persistence a critical thinking FLC that sought to define critical thinking in separate disciplines examine interdisciplinary cross over of critical thinking and measure critical thinking more accurately an FLC that researched the transfer of learning and developed strategies to promote students application of their learning across courses and beyond the classroom Each chapter describes the formation of its FLC the processes it engaged in what worked and did not and the outcomes achieved Just as when college faculty fail to remain current in their fields the failure to engage in continuing development of teaching skills will equally lead teaching and learning to suffer When two year college administrators restrain scholarship and reflection as inappropriate for the real work of the institution they are in fact hindering the professionalization of their teaching force that is essential to institutional mission and student success When FLCs are supported by leaders and administrators and faculty learn that collaboration and peer review are valued and even expected as part of being a teaching professional they become intrinsically motivated and committed to collaboratively solving problems setting the institution on a path to becoming a learning organization that is proactive and adept at navigating change

A Comprehensive Critique of Student Evaluation of Teaching Dennis E. Clayson, 2020-12-27 This thought provoking volume offers comprehensive analysis of contemporary research and literature on student evaluation of teaching SET in Higher Education In evaluating data from fields including education psychology

engineering science and business this volume critically engages with the assumption that SET is a reliable and valid measure of effective teaching Clayson navigates a range of cultural social and era related factors including gender grades personality student honesty and halo effects to consider how these may impact on the accuracy and impartiality of student evaluations Ultimately he posits a popularity hypothesis asserting that above all SET measures instructor likability While controversial the hypothesis powerfully and persuasively draws on extensive and divergent literature to offer new and salient insights regarding the growing and potentially misleading phenomenon of SET This topical and transdisciplinary book will be of great interest to researchers faculty and administrators in the fields of higher education management administration teaching and learning

The Scholarship of Teaching and Learning in Higher Education: An Evidence-Based Perspective Raymond P. Perry, John C. Smart, 2007-06-04 Pivotal to the transformation of higher education in the 21st Century is the nature of pedagogy and its role in advancing the aims of various stakeholders This book brings together pre eminent scholars from Australia Canada Europe the Middle East and the USA to critically assess teaching and learning issues that cut across most disciplines In addressing long standing and newly emerging issues the researchers examine the scientific evidence on what constitutes effective teaching in college classrooms on the psychometric integrity of measures of teaching effectiveness and on the use of such measures for tenure promotion and salary decisions Systematically explored throughout the book is the avowed linkage between classroom teaching and motivation learning and performance outcomes in students In so doing the book deals with the nexus between knowledge production by researchers and knowledge utility for end users made up of classroom instructors department heads deans directors and policymakers The book will appeal to researchers interested in teaching and learning faculty members developing evidence based pedagogical practices academic administrators and

policymakers responsible for instituting teaching and learning protocols and faculty development officers promoting the effective teaching practices *Thirteen Strategies to Measure College Teaching* Ronald A. Berk, 2023-07-03 Student evaluations of college teachers perhaps the most contentious issue on campus This book offers a more balanced approach Evaluation affects pay promotion and tenure so of intense interest to all faculty Major academic marketing and publicity Combines original research with Berk's signature wacky humor To many college professors the words student evaluations trigger mental images of the shower scene from Psycho with those bloodcurdling screams They're thinking Why not just whack me now rather than wait to see those ratings again This book takes off from the premise that student ratings are a necessary but not sufficient source of evidence for measuring teaching effectiveness It is a fun filled but solidly evidence based romp through more than a dozen other methods that include measurement by self peers outside experts alumni administrators employers and even aliens As the major stakeholders in this process both faculty AND administrators plus clinicians who teach in schools of medicine nursing and the allied health fields need to be involved in writing adapting evaluating or buying items to create the various scales to measure teaching performance This is the first basic introduction in the faculty evaluation literature to take you step by step through the process to develop these tools interpret their scores and make decisions about teaching improvement annual contract renewal dismissal merit pay promotion and tenure It explains how to create appropriate high quality items and detect those that can introduce bias and unfairness into the results Ron Berk also stresses the need for triangulation the use of multiple complementary methods to provide the properly balanced comprehensive and fair assessment of teaching that is the benchmark of employment decision making This is a must read to empower faculty administrators and clinicians to use appropriate evidence to make decisions accurately reliably and fairly Don't trample each other in your stampede to snag a copy of this book *Analysing Student Feedback in Higher Education* Elena Zaitseva, Beatrice Tucker, Elizabeth Santhanam, 2021-12-29 Analysing Student Feedback in Higher Education provides an in depth analysis of mining student feedback that goes beyond numerical measures of student satisfaction or engagement By including authentic student voices for understanding the student experience this book will inform strategies for quality improvement in higher education globally With contributions representing an international community of academics educational developers institutional data analysts and student researchers this book reflects on the role of computer aided text analysis in gaining insight of student views The chapters explore the applications of text mining in different forms these include varied institutional contexts using a range of instruments and pursuing different institutional aims and objectives Contributors provide insights enabled by computer aided analysis in distilling the student voice and turning large volumes of data into useful information and knowledge to inform actions Practical tips and core principles are explored to assist academic institutions when embarking on analysing qualitative student feedback Written for a wide audience Analysing Student Feedback in Higher Education provides those making informed decisions about how to approach analyses of large

volumes of student narratives with the benefit of learning from the experiences of those who already started treading this path It enables academic developers institutional researchers academics and administrators to see how bringing text mining to their institutions can help them in better understanding and using the student voice to improve practice *Resources in Education* ,1999-10
