for Efficiency? Xavier Gine,Inessa Love,2006 The authors study the effect of reorganization costs on the efficiency of bankruptcy laws They develop a simple model that predicts that in a regime with high costs the law fails to achieve the efficient outcome of liquidating unviable businesses and reorganizing viable ones The authors test the model using the Colombian bankruptcy reform of 1999 Using data from 1 924 firms filing for bankruptcy between 1996 and 2003 they find that the pre reform reorganization proceeding was so inefficient that it failed to separate economically viable firms from inefficient ones In contrast by substantially lowering reorganization costs the reform improved the selection of viable firms into reorganization In this sense the new law increased the efficiency of the bankruptcy system in Colombia World Bank web site *The Air Force Law Review* , **Federal Management Reform in a World of Contradictions** Beryl A.

Radin,2012-03-12 Proposals for reform have dotted the federal management landscape in the United States for more than 50 years Yet these efforts by public management professionals have frequently failed to produce lasting results In her new book *Federal Management Reform in a World of Contradictions* renowned public administration scholar Beryl A Radin reveals what may lie behind the failure of so many efforts at government management reform To spur new thinking about this problem Radin examines three basic sets of contradictions between the strategies of the reformers and the reality of the US federal system contradictions in the shared powers structure contradictions in values and contradictions between politics and

administration She then explores six types of reform efforts and the core beliefs that guided them The six reform areas are contracting out personnel policy agency reorganization budgeting federalism policies and procedures and performance management The book shows how too often these prescriptions for reform have tried to apply techniques from the private sector or a parliamentary system that do not transfer well to the structure of the US federal system and its democratic and political traditions Mindful of the ineffectiveness of a one size fits all approach Radin does not propose a single path for reform but calls instead for a truly honest assessment of past efforts as today s reformers design a new conceptual and strategic roadmap for the future

Economic Lessons from China's Forty Years of Reform and Opening-up David Daokui Li, 2021-03-26 This book first shows that the past 40 years of China s economic reform and opening up represents the greatest magnitude of economic growth in history Based on field trips extensive and intensive interviews and literature surveys this book argues that there are five general lessons for a rapid growing economy from China s economic reform and opening up all in the area of the relationship between the government and the economy First the local governments need to be incentivized to help rapid entry and development of enterprises Second local governments need to be incentivized to help rapid land conversion from agricultural to non agricultural Third financial deepening is vital that is inducing households to hold more and more financial assets in local currency Financial deepening is essential to convert savings into investments This requires financial stability which is crucial Fourth the learning through opening up is the key to endogenous economic growth The fundamental benefit of opening up is learning rather than enjoying comparative advantage The fifth and final lesson from China is that the central government must proactively manage the macroeconomy The rationale is that enterprises compete with each other in games of industrial organization In order to resolve this problem proactive measures including market oriented means administrative orders and reform measures should be implemented Overall the main lesson from China s past 40 years of reform and opening up is that proper incentives and behavior of the government local and central are important for economic growth China has been conducting reforms in this regard and as a result the government more or less has been playing the role of a helping hand regarding economic growth although China s economic system is far from perfect and many reforms are still needed

Reform As Reorganization Royce Hanson, 1974 **China's Economic Reform** Raphael Shen, 2000-02-28 Both Mao Zedong and Deng Xiaoping drastically altered the course of contemporary China s economic development using opposing strategies Mao froze China s economic system in a perennial state of consumer goods shortages and pervasive macro disequilibria Deng however began thawing a rigidly structured system by introducing experimental reform measures Mao s revolutionary rhetoric brought China s economy to the brink of bankruptcy Deng s ideological pragmatism netted China glowing successes Mao closed China to the outside world Deng engineered China s reintegration into the world economy Dismantling a dysfunctional system and replacing it with a dynamic new one involving 1.2 billion people is risk laden Reform in China began in 1978 It was tentative and experimental confining reform to

organizational and administrative decentralization on farms Successes on farms ushered in reform elsewhere in the economy Over time market based coordinating mechanisms progressively began replacing the system s control devices Results from decentralization internally reinforced those from liberalization externally This consequently transformed China s stale distorted system into a more competitive bustling new one ready for developmental takeoff Its meteoric rise among the world s leading markets in recent years has thrust China s economy to the forefront of growth and development Controlled phased reform is yielding dividends not only for its own consumers but for international economic cooperation and growth as well
