The Early Roxburghe Club 1812 1835 offers a new narrative for the formative years of the Roxburghe Club for the
bibliomania of the Romantic period and for early nineteenth century antiquarian culture and its relationship to the emergent
popularity and status of English vernacular literature By examining in detail the make up and membership of the club
including its social and political affinities this revised history of the first two decades of its existence offers both an
alternative view of the early club and its significant contribution to the move between antiquarian and scholarly areas of
influence in the study of English literature **The X Club** Ruth Barton,2018-11-21 In 1864 amid headline grabbing heresy
trials members of the British Association for the Advancement of Science were asked to sign a declaration affirming that
science and scripture were in agreement Many criticized the new test of orthodoxy nine decided that collaborative action was
required The X Club tells their story These six ambitious professionals and three wealthy amateurs J D Hooker T H Huxley
John Tyndall John Lubbock William Spottiswoode Edward Frankland George Busk T A Hirst and Herbert Spencer wanted to
guide the development of science and public opinion on issues where science impinged on daily life religious belief and
politics They formed a private dining club which they named the X Club to discuss and further their plans As Ruth Barton
shows they had a clear objective they wanted to promote scientific habits of mind which they sought to do through lectures

journalism and science education They devoted enormous effort to the expansion of science education with real but mixed success For twenty years the X Club was the most powerful network in Victorian science the men succeeded each other in the presidency of the Royal Society for a dozen years Barton s group biography traces the roots of their success and the lasting effects of their championing of science against those who attempted to limit or control it along the way shedding light on the social organization of science the interactions of science and the state and the places of science and scientific men in elite culture in the Victorian era Debates South Australia.
