Reforming Suburbia:

Reforming Suburbia Ann Forsyth, 2005-03-14 The new community movement of the 1960s and 1970s attempted a grand experiment in housing It inspired the construction of innovative communities that were designed to counter suburbia's cultural conformity social isolation ugliness and environmental problems This richly documented book examines the results of those experiments in three of the most successful new communities Irvine Ranch in Southern California Columbia in Maryland and The Woodlands in the suburbs of Houston Texas Based on new research and interviews with developers designers and residents Ann Forsyth traces the evolution the successes and the shortcomings of these experiments in urban innovation Where they succeeded in areas such as community identity and open space preservation they provide support for current smart growth proposals Where they did not in areas such as housing affordability and transportation choices they offer important insights for today's planners designers developers civic leaders and others interested in incorporating new forms of development into their designs

New City Upon a Hill Joseph Rocco Mitchell, David L. Stebenne, 2007-03-31 Published in anticipation of Columbia's fortieth anniversary in 2007 this book showcases the history of one of the nation's leading new towns Built from the brilliant plan developed by visionary designer James Rouse Columbia's innovative design is the foundation for a unique community that has thrived for decades and flourishes today

The Death and Life of Main Street Miles Orvell, 2012-10-01 For more than a century the term Main Street has conjured up nostalgic images of American small town life Representations exist all around us from fiction and film to the architecture of shopping malls and Disneyland All the while the nation has become increasingly diverse exposing tensions within this ideal In *The Death and Life of Main Street* Miles Orvell wrestles with the mythic allure of the small town in all its forms illustrating how Americans continue to reinscribe these images on real places in order to forge consensus about inclusion and civic identity especially in times of crisis Orvell underscores the fact that Main Street was never what it seemed it has always been much more complex than it appears as he shows in his discussions of figures like Sinclair Lewis Willa Cather Frank Capra Thornton Wilder Margaret Bourke White and Walker Evans He argues that translating the overly tidy cultural metaphor into real spaces as has been done in recent decades especially in the new urbanist planned communities of Elizabeth Plater Zyberk and Andres Duany actually diminishes the communitarian ideals at the center of this nostalgic construct Orvell investigates the way these tensions play out in a variety of cultural realms and explores the rise of literary and artistic traditions that deliberately challenge the tropes and assumptions of small town ideology and life

Desert Visions and the Making of Phoenix, 1860-2009 Philip VanderMeer, 2010-12-16 Whether touted for its burgeoning economy affordable housing and pleasant living style or criticized for being less like a city than a sprawling suburb Phoenix by all environmental logic should not exist Yet despite its extremely hot and dry climate and its remoteness Phoenix has grown into a massive metropolitan area This exhaustive study examines the history of how Phoenix came into being and how it has sustained itself from its origins in the

1860s to its present status as the nation's fifth largest city. From the beginning, Phoenix sought to grow, and although growth has remained central to the city's history, its importance, meaning, and value have changed substantially over the years. The initial vision of Phoenix as an American Eden gave way to the Cold War Era vision of a High Tech Suburbia, which in turn gave way to rising concerns in the late twentieth century about the environmental, social, and political costs of growth. To understand how such unusual growth occurred in such an improbable location, Philip VanderMeer explores five major themes: the natural environment, urban infrastructure, economic development, social and cultural values, and public leadership. Through investigating Phoenix's struggle to become a major American metropolis, his study also offers a unique view of what it means to be a desert city.

Prairie Crossing John Scott Watson, 2016-01-30. Carved out of century-old farmland near Chicago, the Prairie Crossing development is a novel experiment in urban public policy that preserves 69 percent of the land as open space. The for-profit project has set out to do nothing less than use access to nature as a means to challenge America's failed culture of suburban sprawl. The first comprehensive look at an American conservation community, *Prairie Crossing* goes beyond windmills and nest boxes to examine an effort to connect adults to the land while creating a healthy and humane setting for raising a new generation attuned to nature. John Scott Watson places *Prairie Crossing* within the wider context of suburban planning, revealing how two first-time developers implemented a visionary new land ethic that saved green space by building on it. The remarkable achievements include a high rate of resident civic participation, the reestablishment of a thriving prairie ecosystem, the reintroduction of endangered and threatened species, and improved water and air quality. Yet, as Watson shows, considerations like economic uncertainty, lack of racial and class diversity, and politics have challenged and continue to challenge *Prairie Crossing* and its residents.

Flights of Imagination Sonja DümpeImann, 2014-09-19. In much the same way that views of the earth from the Apollo missions in the late 1960s and early 1970s led indirectly to the inauguration of Earth Day and the modern environmental movement, the dawn of aviation ushered in a radically new way for architects, landscape designers, urban planners, geographers, and archaeologists to look at cities and landscapes. As icons of modernity, airports facilitated the development of a global economy during the twentieth and early twenty-first centuries, reshaping the way people thought about the world around them. Professionals of the built environment awoke to the possibilities offered by the airports themselves as sites of design and by the electrifying new aerial perspective on landscape. In *Flights of Imagination*, Sonja DümpeImann follows the evolution of airports from their conceptualization as landscapes and cities to modern-day plans to turn decommissioned airports into public urban parks. The author discusses landscape design and planning activities that were motivated, legitimized, and facilitated by the aerial view. She also shows how viewing the earth from above redirected attention to bodily experience on the ground and illustrates how design professionals understood the aerial view as simultaneously abstract and experiential, detailed and contextual, harmful and essential. Along the way, DümpeImann traces this multiple dialectic from the 1920s to the land camouflage activities during World War II and

from the environmental and landscape planning initiatives of the 1960s through today

Metroburbia, USA Paul L Knox, 2008-06-19 Decades of economic prosperity in the United States have redefined the American dream Paul Knox explores how extreme versions of this dream have changed the American landscape Increased wealth has led America's metropolitan areas to develop into vast sprawling regions of metroburbia fragmented mixtures of employment and residential settings combining urban and suburban characteristics Upper middle class Americans are moving into larger homes in greater numbers which leads Knox to explore the relationship between built form and material culture in contemporary society He covers changes in home design real estate the work of developers and the changing wishes of consumers Knox shows that contemporary suburban landscapes are a product of consumer demand combined with the logic of real estate development mediated by design and policy professionals and institutions of governance Suburban landscapes not only echo the fortunes of successive generations of inhabitants Knox argues they also reflect the country's changing core values Knox addresses key areas of concern and importance to today's urban planners and suburban residents including McMansions traffic disasters house design homeowner's associations exclusionary politics and big box stores Through the inclusion of examples and photos Metroburbia USA creates an accessible portrait of today's suburbs supported by data anecdotes and social theory It is a broad interpretation of the American metropolitan form that looks carefully at the different influences that contribute to where and how we live today

Geiger,2017-07-05

This work provides a critical reexamination of the origin and development of America's land grant colleges and universities created by the most important piece of legislation in higher education. The story is divided into five parts that provide closer examinations of representative developments. Part I describes the connection between agricultural research and American colleges. Part II shows that the responsibility of defining and implementing the land grant act fell to the states which produced a variety of institutions in the nineteenth century. Part III details the first phase of the conflict during the latter decades of the nineteenth century about whether land colleges were intended to be agricultural colleges or full academic institutions. Part IV focuses on the fact that full fledged universities became dominant institutions of American higher education. The final part shows that the land grant mission is alive and well in university colleges of agriculture and in fact is inherent to their identity. Including some of the best minds the field has to offer, this volume follows in the fine tradition of past books in Transaction's Perspectives on the History of Higher Education series. Landscape Performance Bo

Yang, 2018-10-26 Ian McHarg's ecological planning approach has been influential since the 20th century. However, few empirical studies have been conducted to evaluate the performance of his projects. Using the framework of landscape performance assessment, this book demonstrates the long-term benefits of a renowned McHargian project: The Woodlands town development through quantitative and qualitative methods. Including 44 black and white illustrations, Landscape Performance systematically documents the performance benefits of the environmental, social, and economic aspects of The Woodlands project. It delves into McHarg's planning success in The Woodlands in comparison with adjacent Houston developments which demonstrated urban resilience after Hurricane Harvey in 2017. Lastly, it identifies the ingredients of McHarg's ability to do real and permanent good. Yang also includes a number of appendices which provide valuable information on the methods of assessing performance in landscape development. This book would be beneficial to academics and students of landscape architecture and planning with a particular interest in Ian McHarg. **The Religious**

Dimensions of Shared Spaces Paul D. Numrich, 2023-02-28 Space sharing by groups and organizations is widespread in the United States, from commercial partnerships to government and private sector joint use agreements to the use of public facilities and commons and more. Drawing upon a variety of historical examples and contemporary cases, The Religious Dimensions of Shared Spaces offers a focused and systematic analysis of space sharing involving religious groups or organizations. All space sharing arrangements are similar in most respects, so what difference does it make when religious groups or organizations are involved? How do they invest meaning in the spaces they use and share, including sacred space? When and why do they enter into space sharing arrangements with other parties, religious and/or secular? How do religious space sharers structure and maintain their arrangements, including handling tensions that arise? What can secular space sharers learn from their religious counterparts and vice versa? The book also teases out when religion does not matter in space sharing, even when religious groups or organizations are involved. Case studies include internal congregational groups

that negotiate the use of shared facilities arrangements between congregations and external groups or organizations
