

Descartes' Refutation of Skepticism

- ▣ As a Foundationalist, Descartes refutes Skepticism
 - The skeptic maintains that
 - ▣ Certainty is required for knowledge
 - ▣ However, humans are incapable of certainty

Refutation Of Skepticism:

The Refutation of Scepticism A. C. Grayling, 1985 Certainty, a Refutation of Scepticism Peter D. Klein, 1996

Augustine's Critique of Skepticism Augustine James Curley, 1996 Augustine of Hippo 354-430 composed his *Contra Academicos* while preparing for the baptism he would receive at the hands of Ambrose Bishop of Milan in 387. In it he critiques the arguments of the Academic philosophers who taught that nothing could be known. This study argues that Augustine's critique is based not so much on the epistemological aspects of skepticism which has been the view of most modern studies of the dialogue but rather on the effect that skepticism can have on society.

The Plain Truth: Descartes, Huet, and Skepticism Thomas M. Lennon, 2008-09-30 The skeptic Pierre Daniel Huet's *Censura philosophiae cartesianae* 1689 is the most comprehensive unrelenting and devastating critique of Descartes ever. It incisively captures all the issues that now interest readers of Descartes: the method of doubt, the cogito, clarity and distinctness as criteria of truth, the circularity of the Meditations proofs of God's existence etc. Naturally the work provoked great controversy among the Cartesians who were implicated in various capacities: Nicolas Malebranche as the occasional cause of the publication and Pierre Sylvain Regis as the chief defender of the Cartesian camp. What emerges in this study of the controversy is a heroic, defensible Descartes. He possesses hitherto unappreciated answers to the criticisms that have bedeviled his philosophy from his time to ours.

The Oxford Handbook of Skepticism John Greco, 2011-10-01 In the history of philosophical thought few themes loom as large as skepticism. Skepticism has been the most visible and important part of debates about knowledge. Skepticism at its most basic questions our cognitive achievements, challenges our ability to obtain reliable knowledge, casting doubt on our attempts to seek and understand the truth about everything from ethics to other minds, religious belief, and even the underlying structure of matter and reality. Since Descartes the defense of knowledge against skepticism has been one of the primary tasks, not just of epistemology but philosophy itself. The Oxford Handbook of Skepticism features twenty-six newly commissioned chapters by top figures in the field. Part One contains articles explaining important kinds of skeptical reasoning. Part Two focuses on responses to skeptical arguments. Part Three concentrates on important contemporary issues revolving around skepticism. As the first volume of its kind, the articles make significant contributions to the debate on skepticism.

Peirce, James, and a Pragmatic Philosophy of Religion John W. Woell, 2012-02-09 In this book John W. Woell shows us how contemporary readings of American Pragmatism, founded on mistakenly used categories of the Analytic tradition, have led to misreadings of Peirce and James. By focusing on terms drawn largely from Descartes and Kant, contemporary debates between metaphysical realists, antirealists, Realists, and Nonrealists have argued. Woell failed to shed great light on pragmatism in general and a pragmatic philosophy of religion in particular. Woell contends that paying close attention to the internal relationships among inquiry, belief, and their objects in the respective works of Peirce and James provides a means for fully appreciating pragmatism's richness as a resource for philosophy of religion. By taking account of a pragmatic point of

view in philosophy of religion this book incites a more productive discussion of the metaphysical status of religious objects and of the epistemic status of religious belief *Induction, Probability, and Skepticism* Debi Prasad

Chattopadhyaya,1991-01-01 In this book Chattopadhyaya examines the epistemological and methodological implications of induction and probability Opposed to foundationalism and the thesis of certainty of human knowledge he has defended a qualified form of fallibilism and constructive kind of skepticism *Metaepistemology and Skepticism* Richard A.

Fumerton,1995 In this excellent treatment of the internalism externalism debate in contemporary epistemology Richard Fumerton explores its implications for traditional skeptical concerns When one fully understands these implications Fumerton argues one will see philosophical usefulness of a foundationalism relying on acquaintance Contending that the externalist response to skepticism is too quick and easy Fumerton defends a version of internalism but in doing so puts into stark relief the radically different alternatives for dealing with skepticism that our metaepistemological views force upon us

Towards a Philosophical Anthropology of Culture Kevin M. Cahill,2021-01-24 This book explores the question of what it means to be a human being through sustained and original analyses of three important philosophical topics relativism skepticism and naturalism in the social sciences Kevin M Cahill s approach involves an original employment of historical and ethnographic material that is both conceptual and empirical in order to address relevant philosophical issues Specifically while Cahill avoids interpretative debates he develops an approach to philosophical critique based on Cora Diamond s and James Conant s work on the early Wittgenstein This makes possible the use of a concept of culture that avoids the dogmatism that not only typifies traditional metaphysics but also frequently mars arguments from ordinary language or phenomenology This is especially crucial for the third part of the book which involves a cultural historical critique of the ontology of the self in Stanley Cavell s work on skepticism In pursuing this strategy the book also mounts a novel and timely defense of the interpretivist tradition in the philosophy of the social sciences Towards a Philosophical Anthropology of Culture will be of interest to researchers working on the philosophy of the social sciences Wittgenstein and philosophical anthropology The Open Access version of this book available at <http://www.taylorfrancis.com/books/9780367638238> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license Transcendental Arguments and Justified Christian Belief Ronney Mourad,2005-02-08 Transcendental Arguments and Justified Christian Belief offers an extended discussion of the characteristics of transcendental arguments and the philosophical objections that have been leveled against them Author Ronney Mourad provides a comprehensive review of the recent philosophical literature concerning the definition and possibility of transcendental arguments and defends original positions on these issues One function of transcendental arguments is to identify beliefs or propositions implied by any possible act of assertion Anyone who denies the conclusions of a sound transcendental argument defined in this way simultaneously implies the truth of those conclusions by asserting the denial Therefore a sound transcendental argument produces conclusions that are distinctively

universal and resistant to criticism This book also applies transcendental argumentation to epistemological questions in Christian theology Can Christians justify their religious beliefs Do they even need to try The work of Karl Otto Apel and Franklin Gamwell serves as the starting point for the development of a transcendently grounded conception of epistemic justification The final chapters argue in conversation with Schubert Ogden and Alvin Plantinga that the obligations of epistemic justification revealed by transcendental arguments bear several implications for theological method

Anonymous Skeptics Lance Ashdown, 2002 At its deepest philosophical skepticism questions the sense of language Skepticism manifests itself in different forms three of the most powerful being logical external world and religious skepticism How has philosophy of religion addressed these challenges The attempt to answer this question leads Lance Ashdown to a consideration of three prominent contemporary philosophers of religion Richard Swinburne John Hick and William Alston The author shows that these philosophers are indeed open to the criticisms of the three types of skepticism mentioned above According to Ashdown they are rightly to be considered as anonymous skeptics Readers familiar with the work of the theologian Karl Rahner will recognize an echo of his famous doctrine that non Christian religious believers are really anonymous Christians i e Christian believers who do not recognize themselves as such In a similar way the philosophers of religion under consideration are skeptics who most certainly would not identify themselves as such They are anonymous skeptics in the sense that their epistemologies create the very conditions that allow for the severe and on their own terms unanswerable challenges of skepticism At the same time none of these philosophers thinks that skeptical objections pose a devastating or unanswerable threat to their epistemologies For example each of them is an avowed believer in God and is fully aware of the challenge of religious skepticism yet none believes that skepticism need cause a rational Christian to abandon his or her beliefs Nevertheless each of the three philosophers adheres to a philosophical theory that remains open to the devastating critique of Philo in David Hume's essay Dialogue Concerning Natural Religion who argues at his deepest that talk of God is meaningless **Certainty** Peter D. Klein, 1981 **The Refutation of Scepticism** Dafydd Stuttard, 1999

Christian skepticism John Owen, 1881 **A Companion to Kant** Graham Bird, 2009-11-09 This Companion provides an authoritative survey of the whole range of Kant's work giving readers an idea of its immense scope its extraordinary achievement and its continuing ability to generate philosophical interest Written by an international cast of scholars Covers all the major works of the critical philosophy as well as the pre critical works Subjects covered range from mathematics and philosophy of science through epistemology and metaphysics to moral and political philosophy **The Appearance of Ignorance** Keith DeRose, 2018-01-12 Contextualism the view that the epistemic standards a subject must meet in order for a claim attributing knowledge to her to be true do vary with context has been hotly debated in epistemology and philosophy of language during the last few decades This volume presents develops and defends contextualist solutions to two of the stickiest problems in epistemology the puzzles of skeptical hypotheses and of lotteries It is argued that at least by ordinary

standards for knowledge we do know that skeptical hypotheses are false and that we've lost the lottery. Why it seems that we don't know that they're false tells us a lot both about what knowledge is and how knowledge attributions work. The Appearance of Ignorance is the companion volume to Keith DeRose's 2009 title The Case for Contextualism. Knowledge Skepticism and Context Volume 1. Evenings with the Skeptics John Owen, 1881. Evenings with the skeptics; or, Free discussion on free thinkers John Owen, 1881. The Battle of the Gods and Giants Redux Patricia Easton, 2015-09-07. The Battle of Gods and Giants Redux is a collection of 14 original essays by leading scholars in the field. Part One includes figures and topics associated with Descartes, the chief idealist in the story, including Leibniz, Spinoza, and Malebranche. Part Two includes figures and topics that fall on the Gassendist materialist side of the battle, including Hobbes, Bayle, and Locke. In organizing these varied discussions along these themes and lines, something more than the sum of the parts emerges. The reader will gain a breadth and depth of insight into the battle of ideas in early modern thought, historical, philosophical, and interpretive. Contributors are Margaret Atherton, Martha Brandt Bolten, Patricia Easton, Lorne Falkenstein, Nicolas Jolley, Jos Maia Neto, Steven Nadler, Alan Nelson, Lawrence Nolan, Donald Rutherford, Tad Schmultz, Kurt Smith, Julie Walsh, and Richard Watson. Romanticism and Contemporary Criticism Morris Eaves, Michael R. Fischer, 2019-01-24. The core of this book is made up of five essays by distinguished scholars of international reputation that treat the relation between current literary theory and Romanticism. The book originated in a series of lectures presented at the University of New Mexico in 1983. All but one of the essays are published here for the first time. The contributors are Northrop Frye, W. J. T. Mitchell, J. Hillis Miller, M. H. Abrams, and Stanley Cavell. Frye's essay is a major statement on the backgrounds of Romanticism. W. J. T. Mitchell's contribution takes up through the composite arts of William Blake, the relation of poetry and painting, writing and printing, criticism and politics. The controversy over deconstruction is the occasion for a matched pair of essays by J. Hillis Miller and M. H. Abrams, advocate and antagonist respectively. In his essay, Abrams makes a definitive statement on his view of deconstruction and its intellectual heritage. The fifth piece by Stanley Cavell is the first extended discussion of English and American Romanticism by this major contemporary philosopher. Following each essay is an edited transcript of a question and answer session in which the contributor critic ranges widely and freely over today's critical scene. The sessions make fascinating reading. This book should be of compelling interest to students of Romanticism as well as to students and scholars interested in the uses and implications of poststructuralist theory.
