wonder if there is a synonym for the word synonym Or why people really hate the word moist Maybe you want to know why we tell a person to take something with a grain of salt or why McDonalds went to war with a dictionary From obscure words to the best literary insults ever written this linguistic miscellany is sure to spice up your vocabulary make you a whizz at word games and prepare you for plenty of wordy repartee for your next soiree with some of the most bizarre terms you never knew you needed

**Masters of Mathematics** Robert A. Nowlan, 2017-05-13 The original title for this work was Mathematical Literacy What Is It and Why You Need it The current title reflects that there can be no real learning in any subject unless questions of who what when where why and how are raised in the minds of the learners The book is not a mathematical text and there are no assigned exercises or exams It is written for reasonably intelligent and curious individuals both those who value mathematics aware of its many important applications and others who have been inappropriately exposed to mathematics leading to indifference to the subject fear and even loathing These feelings are all consequences of meaningless presentations drill rote learning and being lost as the purpose of what is being studied Mathematics education needs a radical reform There is more than one way to accomplish this Here the author presents his approach of wrapping mathematical ideas in a story To learn one first must develop an interest in a problem and the curiosity to find how masters of mathematics have solved them What is necessary to be mathematically literate It s not about solving algebraic equations or even making a geometric proof These are valuable skills but not evidence of literacy We often seek answers but learning to ask pertinent questions is the road to mathematical literacy Here is the good news new mathematical ideas have a way of finding applications This is known as the unreasonable effectiveness of mathematics

Icons of Mathematics: An Exploration of Twenty Key Images Claudi Alsina , Roger B. Nelsen, 2020-06-01 The authors present twenty icons of mathematics that is geometrical shapes such as the right triangle the Venn diagram and the yang and yin symbol and explore mathematical results associated with them As with their previous books Charming Proofs When Less is More Math Made Visual proofs are visual whenever possible The results require no more than high school mathematics to appreciate and many of them will be new even to experienced readers Besides theorems and proofs the book contains many illustrations and it gives connections of the icons to the world outside of mathematics There are also problems at the end of each chapter with solutions provided in an appendix The book could be used by students in courses in problem solving mathematical reasoning or mathematics for the liberal arts It could also be read with pleasure by professional mathematicians as it was by the members of the Dolciani editorial board who unanimously recommend its publication

**Hexaflexagons and Other Mathematical Diversions** Martin Gardner, 2020-10-05 Martin Gardner s Mathematical Games columns in Scientific American inspired and entertained several generations of mathematicians and scientists Gardner in his crystal clear prose illuminated corners of mathematics especially recreational mathematics that most people had no idea existed His playful spirit and inquisitive nature invite the reader into an exploration of beautiful mathematical ideas along with him These

columns were both a revelation and a gift when he wrote them no one before Gardner had written about mathematics like this They continue to be a marvel This volume originally published in 1959 contains the first sixteen columns published in the magazine from 1956 1958 They were reviewed and briefly updated by Gardner for this 1988 edition

**Fictions of Credit in the Age of Shakespeare** Laura Kolb,2021-02-04 In Shakespeare's England credit was synonymous with reputation and reputation developed in the interplay of language conduct and social interpretation As a consequence artful language and social hermeneutics became practical profitable skills Since most people both used credit and extended it the dual strategies of implication and inference of producing and reading evidence were everywhere Like poetry or drama credit was constructed fashioned out of the interplay of artifice and interpretation The rhetorical dimension of economic relations produced social fictions on a range of scales from transitory performances facilitating local transactions to the long term project of maintaining creditworthiness to the generalized social indeterminacy that arose from the interplay of performance and interpretation *Fictions of Credit in the Age of Shakespeare* examines how Shakespeare and his contemporaries represented credit driven artifice and interpretation on the early modern stage It also analyses a range of practical texts including commercial arithmetics letter writing manuals legal formularies and tables of interest which offered strategies for generating credit and managing debt Looking at plays and practical texts together *Fictions of Credit* argues that both types of writing constitute equipment for living practical texts by offering concrete strategies for navigating England's culture of credit and plays by exploring the limits of credit's dangers and possibilities In their representations of a world re-written by debt relations dramatic texts in particular articulate a phenomenology of economic life telling us what it feels like to live in credit culture to live that is inside a fiction

*The Lighter Side of Mathematics: Proceedings of the Eugene Strens Memorial Conference on Recreational Mathematics and Its History* Richard K. Guy,Robert E. Woodrow,2020-08-03 In August of 1986 a special conference on recreational mathematics was held at the University of Calgary to celebrate the founding of the Strens Collection Leading practitioners of recreational mathematics from around the world gathered in Calgary to share with each other the joy and spirit of play that is to be found in recreational mathematics It would be difficult to find a better collection of wonderful articles on recreational mathematics by a more distinguished group of authors If you are interested in tessellations Escher tilings Rubik's cube pentominoes games puzzles the arbelos Henry Dudeney or change ringing then this book is for you

*Critical Play* Mary Flanagan,2013-02-08 An examination of subversive games like The Sims games designed for political aesthetic and social critique For many players games are entertainment diversion relaxation fantasy But what if certain games were something more than this providing not only outlets for entertainment but a means for creative expression instruments for conceptual thinking or tools for social change In *Critical Play* artist and game designer Mary Flanagan examines alternative games games that challenge the accepted norms embedded within the gaming industry and argues that games designed by artists and activists are reshaping everyday game culture Flanagan provides a lively

historical context for critical play through twentieth century art movements connecting subversive game design to subversive art her examples of playing house include Dadaist puppet shows and The Sims She looks at artists alternative computer based games and explores games for change considering the way activist concerns including worldwide poverty and AIDS can be incorporated into game design Arguing that this kind of conscious practice which now constitutes the avant garde of the computer game medium can inspire new working methods for designers Flanagan offers a model for designing that will encourage the subversion of popular gaming tropes through new styles of game making and proposes a theory of alternate game design that focuses on the reworking of contemporary popular game practices [The Forum](#) Lorettus Sutton Metcalf,Walter Hines Page,Joseph Mayer Rice,Frederic Taber Cooper,Arthur Hooley,George Henry Payne,Henry Goddard Leach,1917 Current political social scientific education and literary news written about by many famous authors and reform movements **Popular Science** ,1916-03 Popular Science gives our readers the information and tools to improve their technology and their world The core belief that Popular Science and our readers share The future is going to be better and science and technology are the driving forces that will help make it better [Charming Proofs](#) Claudi Alsina,Roger B. Nelsen,2010-12-31 Theorems and their proofs lie at the heart of mathematics In speaking of the purely aesthetic qualities of theorems and proofs G H Hardy wrote that in beautiful proofs there is a very high degree of unexpectedness combined with inevitability and economy Charming Proofs present a collection of remarkable proofs in elementary mathematics that are exceptionally elegant full of ingenuity and succinct By means of a surprising argument or a powerful visual representation the proofs in this collection will invite readers to enjoy the beauty of mathematics to share their discoveries with others and to become involved in the process of creating new proofs Charming Proofs is organized as follows Following a short introduction about proofs and the process of creating proofs the authors present in twelve chapters a wide and varied selection of proofs they consider charming Topics include the integers selected real numbers points in the plane triangles squares and other polygons curves inequalities plane tilings origami colorful proofs threedimensional geometry etc At the end of each chapter are some challenges that will draw the reader into the process of creating charming proofs There are over 130 such challenges Charming Proofs concludes with solutions to all of the challenges references and a complete index As in the authors previous books with the MAA Math Made Visual and When Less Is More secondary school college and university teachers may wish to use some of the charming proofs in their classrooms to introduce their students to mathematical elegance Some may wish to use the book as a supplement in an introductory course on proofs mathematical reasoning or problem solving [The Lewis Carroll Puzzle Book](#) ,2025-06-03 Step through the looking glass into a world where logic and imagination intertwine in the most curious ways Illustrated with full color imagery this is the ultimate celebration of one of the most famous puzzle makers of all time Lewis Carroll This expertly curated book collects the best puzzles written by the author of Alice s Adventure in Wonderland Lewis Carroll was a mathematician who loved puzzles of all

kinds invented the word ladder delighted in acrostics and riddles and posed twisty math and logic questions in his two most famous works Alice's Adventures in Wonderland and Through the Looking Glass Mind bending and utterly charming this celebratory collection of puzzles and games includes delights such as doublets word ladders and syzygies a more elaborate form of the word ladder mirror writing arithmetical croquet as well as some of the most delightfully puzzling riddles from Alice's Adventures in Wonderland and Through the Looking Glass Enough to keep even the most curious of minds entertained for hours Plus Brian Sibley chairman of the Lewis Carroll Society uses his expert knowledge to take readers inside the inimitable mind of Lewis Carroll with a beautiful introduction and annotations throughout

A Cornucopia of Quadrilaterals Claudi Alsina, Roger B. Nelsen, 2020-02-10 A Cornucopia of Quadrilaterals collects and organizes hundreds of beautiful and surprising results about four sided figures for example that the midpoints of the sides of any quadrilateral are the vertices of a parallelogram or that in a convex quadrilateral not a parallelogram the line through the midpoints of the diagonals the Newton line is equidistant from opposite vertices or that if your quadrilateral has an inscribed circle its center lies on the Newton line There are results dating back to Euclid the side lengths of a pentagon a hexagon and a decagon inscribed in a circle can be assembled into a right triangle the proof uses a quadrilateral and circumscribing circle and results dating to Erdős from any point in a triangle the sum of the distances to the vertices is at least twice as large as the sum of the distances to the sides The book is suitable for serious study but it equally rewards the reader who dips in randomly It contains hundreds of challenging four sided problems Instructors of number theory combinatorics analysis and geometry will find examples and problems to enrich their courses The authors have carefully and skillfully organized the presentation into a variety of themes so the chapters flow seamlessly in a coherent narrative journey through the landscape of quadrilaterals The authors exposition is beautifully clear and compelling and is accessible to anyone with a high school background in geometry

**Algorithms Are Not Enough** Herbert L. Roitblat, 2020-10-13 Why a new approach is needed in the quest for general artificial intelligence Since the inception of artificial intelligence we have been warned about the imminent arrival of computational systems that can replicate human thought processes Before we know it computers will become so intelligent that humans will be lucky to kept as pets And yet although artificial intelligence has become increasingly sophisticated with such achievements as driverless cars and humanless chess playing computer science has not yet created general artificial intelligence In Algorithms Are Not Enough Herbert Roitblat explains how artificial general intelligence may be possible and why a robocalypse is neither imminent nor likely
