Texts and Contexts Doug Munro, Brij V. Lal, 2005-11-30 *Texts and Contexts* is concerned with the development of Pacific Islands history as a specialization in its own right. Specifically this volume examines the foundational texts that pioneered and consolidated the new subdiscipline and served as the building blocks and stepping stone for further developments in the field. Thirty-five texts, all of which represent defining points in the development of Pacific Islands historiography, are examined. Much more than retrospective appraisals of the foundational texts, the individual chapters consider a text or complementary texts within the context of the time of writing and gauge what ongoing influence they exerted. In some cases they suggest how a particular text has been superseded by subsequent work that breaks new conceptual ground in the ongoing process of revisionism. Cricket, Kirikiti and Imperialism in Samoa, 1879-1939 Benjamin Sacks, 2019-10-10 This book considers how Samoans embraced and reshaped the English game of cricket, recasting it as a distinctively Samoan pastime, kirikiti. Starting with cricket's introduction to the islands in 1879, it uses both cricket and kirikiti to trace six decades of contest between and within the categories of colonisers and colonised. How and why did Samoans adapt and appropriate the imperial game? How did officials, missionaries, colonists, soldiers, and those with mixed foreign and Samoan heritage understand and respond to the real and symbolic challenges kirikiti presented? And how did Samoans use both games to navigate foreign colonialism? By investigating these questions, Benjamin Sacks suggests alternative frameworks for conceptualising sporting transfer and adoption and advances understandings of how power, politics, and identity were manifested through sport in Samoa and across the globe.

Rethinking the Colonial State Søren Rud, Søren Ivarsson, 2017-09-06 This volume addresses the analytical challenges of the colonial state from a variety of theoretical and thematic angles and across a range of empirical cases that stretch over a vast span historically and geographically to provide a new approach to analyzing the colonial state and its governmental practices.

The Guardians Susan Pedersen, 2015-04-29 Winner of the Cundill Prize in Historical Literature, Shortlisted for the Lionel Gelber Prize. At the end of the First World War, the Paris Peace Conference saw a battle over the future of empire. The victorious allied powers wanted to annex the Ottoman territories and German colonies they had occupied. Woodrow Wilson and a groundswell of anti-imperialist activism stood in their way. France, Belgium, Japan, and the British dominions reluctantly agreed to an Anglo-American proposal to hold and administer those allied conquests under

mandate from the new League of Nations In the end fourteen mandated territories were set up across the Middle East Africa and the Pacific Against all odds these disparate and far flung territories became the site and the vehicle of global transformation In this masterful history of the mandates system Susan Pedersen illuminates the role the League of Nations played in creating the modern world Tracing the system from its creation in 1920 until its demise in 1939 Pedersen examines its workings from the realm of international diplomacy the viewpoints of the League s experts and officials and the arena of local struggles within the territories themselves Featuring a cast of larger than life figures including Lord Lugard King Faisal Chaim Weizmann and Ralph Bunche the narrative sweeps across the globe from windswept scrublands along the Orange River to famine blighted hilltops in Rwanda to Damascus under French bombardment but always returns to Switzerland and the sometimes vicious battles over ideas of civilization independence economic relations and sovereignty in the Geneva headquarters As Pedersen shows although the architects and officials of the mandates system always sought to uphold imperial authority colonial nationalists German revisionists African American intellectuals and others were able to use the platform Geneva offered to challenge their claims Amid this cacophony imperial statesmen began exploring new means client states economic concessions of securing Western hegemony In the end the mandate system helped to create the world in which we now live A riveting work of global history The Guardians enables us to look back at the League with new eyes and in doing so appreciate how complex multivalent and consequential this first great experiment in internationalism really was

Worldly Provincialism H. Glenn Penny,Matti Bunzl,2010-03-10 Worldly Provincialism introduces readers to the intellectual history that drove the emergence of German anthropology Drawing on the most recent work on the history of the discipline the contributors rethink the historical and cultural connections between German anthropology colonialism and race By showing that German intellectual traditions differed markedly from those of Western Europe they challenge the prevalent assumption that Europeans abroad shared a common cultural code and behaved similarly toward non Europeans The eloquent and well informed essays in this volume demonstrate that early German anthropology was fueled by more than

a simple colonialist drive Rather a wide range of intellectual history shaped the Germans rich and multifarious interest in the cultures religions physiognomy physiology and history of non Europeans and gave rise to their desire to connect with the wider world Furthermore this volume calls for a more nuanced understanding of Germany s standing in postcolonial studies In contrast to the prevailing view of German imperialism as a direct precursor to Nazi atrocities this volume proposes a key insight that goes to the heart of German historiography There is no clear trajectory to be drawn from the complex ideologies of imperial anthropology to the race science embraced by the Nazis Instead of relying on a nineteenth century explanation for twentieth century crimes this volume ultimately illuminates German ethnology and anthropology as local phenomena best approached in terms of their own worldly provincialism H Glenn Penny is Assistant Professor of History at the University of Missouri Kansas City Matti Bunzl Assistant Professor of Anthropology and History at the University of Illinois at Urbana Champaign
