The Sectoral Foundations of China's Development Shahid Javed Burki, Shahid Yusuf, 1992 *The Sectoral Foundations of China's Development* Shahid Javed Burki, Shahid Yusuf, 1992 **Issues for Infrastructure Management in the 1990s** Arturo Israel, 1992-01-01 **Developing Effective Employment Services** David Fretwell, Susan Goldberg, 1993-01-01

Employment services promote the efficient allocation of labor by among other things promoting labor mobility and improving productivity This paper assesses the cost effectiveness of services designed to expedite the exchange of labor between job seekers and employers The authors find that the benefits of employment services are not uniform Benefits may be reduced in small countries with a large informal sector or when the economy is stagnant and the demand for labor is depressed even though the need for the services may be greater under such conditions The authors advocate a balance between public and private sector delivery of employment services They favor opening the private market for what they term support services which increase productivity and include income support and retraining Such support services are distinct from what the authors call core services provision of which they believe is properly left to the public sector Core services to assist job seekers include job placement services relocation assistance counseling and skills assessment The authors find that core services are cost effective and that public sector providers can ensure that such services are delivered to unemployed low skilled or semiskilled workers whose needs may not be met by the private sector The paper reviews the justification for and development of employment services over time and compares various approaches to the provision of such services It reviews the various types of employment services and examines the differences between public and private sector delivery

Borrower Ownership of Adjustment Programs and the Political Economy of Reform John H. Johnson, Sulaiman S. Wasty, 1993-01-01 China has done much to reform its price system achieve macroeconomic stability and restore growth Nevertheless price distortions remain in three key areas This study suggests further price reforms for the energy grain and transport sectors It explains why energy price adjustments should have only a modest effect on consumer prices but a highly positive effect on the economy It discusses why China may have to reduce consumer subsidies to achieve the necessary reforms for grain prices

The study describes what the government must do to strengthen commodity markets generate competition and make allowances for seasonal price variations China's transport sector has been a critical development bottleneck The paper reviews tariff adjustments and other reforms that would modernize the transport system and help it meet growing demand These reforms also would encourage energy conservation and help integrate the national economy Charity with Chinese Characteristics Katja Levy, Knut B. Pissler, 2020-06-26 This thought provoking book explores the functions of charitable foundations in the People's Republic of China Using both empirical fieldwork and extensive textual analysis it examines the role of foundations in Chinese society and their relationship with the Chinese government and provides a new functional perspective on the role of foundations complementing mainstream civil society and corporatist perspectives Civil Service Reform and the World Bank Barbara Nunberg, John R. Nellis, 1995-01-01 Annotation Surveys the World Bank's experience in supporting developing country civil service reforms and begins to assess the progress made The World Bank recognizes the importance of the civil service to the general welfare of the 4.6 billion people in low and middle income countries Between 1981 and 1991 civil service reform was a prominent feature of 90 World Bank lending operations This paper surveys the Bank's experience in supporting this reform and assesses the progress made The lending operations concentrated on two separate dimensions 1 Shorter term emergency steps to reform public pay and employment policies which center on measures to contain the cost and the size of the civil service 2 longer term civil service strengthening efforts directed toward ongoing sustained management improvements After examining the record of these reforms the authors conclude that the results have been mixed at best They recommend greater emphasis on devising a coherent far reaching strategy for reform and on detailing the set of tactics by which these goals will be achieved **The Political Economy of the Chinese Coal Industry** Tim Wright, 2012-03-12 Coal mining is one of China's largest industries and provides an excellent case study through which to consider the broader issues of China's transition from socialism to capitalism focussing on the shift to a market economy the rise of rural industry and the situation of China's working class Coal was one of the pillars of the planned economy but the author argues its shift to market based operations has been protracted and difficult particularly in moving from the artificially low prices of the planned economy to market prescribed prices a change that had a major impact on the industry's financial performance The book goes on to consider the growth of small rural coal mines as part of the Township and Village Enterprises (TVEs) programme these small mines have brought prosperity to areas where small manufacturing enterprises are not competitive but at the same time have been the cause of many social and environmental problems It also examines the situation of coal miners arguably one of the most vulnerable segments of the Chinese working class under socialism and under capitalism paying particular attention to the issue of work safety and coal mine disasters The book provides a comprehensive and coherent treatment of these issues from the establishment of the People's Republic up to 2010 **Special Economic Zones and China's Development Path** Yitao Tao, Zhiguo Lu, 2018-10-05 The book provides

insights into the development of special economic zones which are an important factor in the political and economic reforms in China. It discusses a number of topics including the history and the modernization of special economic zones in China, the contributions of special economic zones to China's economic success and cultural change as well as the new mission of special economic zones in the current economic social context. The Reformability of China's State Sector Guanzhong James Wen, Dianqing Xu, 1997. China has achieved alarming success in accelerating the economic growth rate since it started economic reform about 16 years ago. However, its state sector is still running severe deficits. Even though its productivity might be improved since the reform started, its financial situation nevertheless has been worsening mainly as a result of increased competition from the rapidly expanding non-state sector. Therefore, the reform of this sector has become an urgent problem. All the papers collected in this book are closely related to the various issues that the reform of the state sector has to solve. Among the contributors are Professor Merton H. Miller, a Nobel laureate and expert on firm finance and governance; Mr. Ji Lin, the vice president of the Chinese Academy of Social Sciences; Dr. Justin Y. Lin, the director of Center of China's Economic Research at Beijing University; Professor Gang Fan, the well-known Chinese Economist and vice director of the Institute of Economic Research at the Chinese Academy of Social Sciences; Professor Guoqiang Tian, an expert on mechanism design at Texas A M University; and many other researchers and professors from China and the North America's research institutes and universities. Therefore, this book will be extremely useful and relevant to those economists as well as government decision makers working in the field of the transitional economy.
