Participatory Research and On-farm Management of Agricultural Biodiversity in Europe Michel P. Pimbert, 2011 **Atlas of Seeds and Fruits of Central and East-European Flora** Vít Bojnanský, Agáta Fargašová, 2007-11-07 The Atlas of Seeds and Fruits of Central and East European Flora presents nearly 4 800 seed illustrations supplemented with detailed seed descriptions brief plant descriptions and information on the locality and the native source of plants The Carpathian flora covered here occurs not only in the Carpathian Mountains but also in large lowlands extending towards the south north and east and involves introduced and invading flora of more than 7 500 species This publication is unique on two counts Its scope extends to an unprecedented number of different plant seeds from a wide ranging region Moreover it presents descriptions in unusual detail **Search for New Genes** Benjamin Peary Pal, 2007 Contributed papers presented at the Symposium *festchrift for Benjamin Peary Pal 1906-1989* Indian agricultural scientist **Organic Farming, Prototype for Sustainable Agricultures** Stéphane Bellon, Servane Penvern, 2014-04-23 Stakeholders show a growing interest for organic food and farming OF F which becomes a societal component Rather than questioning whether OF F outperforms conventional agriculture or not the main question addressed in this book is how and in what conditions OF F may be considered as a prototype towards sustainable agricultures The book gathers 25 papers introduced in a first chapter The first section investigates OF F production processes and its capacity to benefit from the systems functioning to achieve higher self sufficiency The second one proposes an overview of organic performances providing commodities and public goods The third one focuses on organics development pathways within agri food systems and territories As well as a strong theoretical component this book provides an overview of the new challenges for research and development It questions the benefits as well as knowledge gaps with a particular emphasis on bottlenecks and lock in effects at various levels **Challenges and Opportunities for Organic Agriculture and the Seed Industry** Arturo Martinez, 2004 **Participatory Plant Breeding** Pablo B. Eyzaguirre, Masa Iwanaga, 1996 **The Custodians of Biodiversity** Manuel Ruiz, Ronnie Vernooy, 2012-03-15 Globally local and indigenous approaches to conserving biodiversity crop improvement and managing precious natural resources are under threat Many communities have to deal with biopiracy for example As well existing laws are usually unsuitable for protecting indigenous and traditional knowledge and for recognizing collective rights such as in cases of participatory plant breeding where farmers researchers and others join forces to improve existing crop varieties or develop new ones based on shared knowledge and resources This book addresses these issues It outlines the national and international policy processes that are currently underway to protect local genetic resources and related traditional knowledge and the challenges these initiatives have faced In particular these themes are addressed within the context of the Convention of Biological Diversity and the

International Treaty on Plant Genetic Resources for Food and Agriculture The authors broaden the policy and legal debates beyond the sphere of policy experts to include the knowledge holders themselves These are the custodians of biodiversity farmers herders and fishers in local communities Their experience in sharing access and benefits to genetic resources is shown to be crucial for the development of effective national and international agreements The book presents and analyzes this experience including case studies from China Cuba Honduras Jordan Nepal Peru and Syria Copublished with the International Development Research Centre IDRC
