Intellectual Property Gustavo Ghidini, 2018 Intellectual property law is built on constitutional foundations and is underpinned by the twin freedoms of freedom of expression and freedom of economic enterprise In this thoughtful evaluation Gustavo Ghidini offers up a reconstruction of the core features of each intellectual property paradigm including patents copyright and trademarks suggesting measures for reform to allow intellectual property to become socially beneficial for all

International Intellectual Property Law and Human Security Robin Ramcharan, 2012-11-27 This book examines how intellectual property rights IPR affect the daily lives of individuals worldwide and how that may in turn impact the health and wealth of nations While the protection of the intellectual endeavours of authors and inventors is vital for a fair and just society it is important that the IPR regime remains flexible enough to encourage creativity innovation and the free flow of information and technology that are critical to the well being of billions of people especially in the developing world This work examines the implications of the IPR regime for basic human security It examines the relationship between IPR regime and fundamental human rights such as the right to education health and food and the broader right to development This book will be of interest to IP scholars international relations specialists and international security analysts in particular those interested in non traditional security issues It may also serve as resource book for the international business community on developmental and human rights aspects of IP Innovation, Competition and Consumer Welfare in Intellectual Property

Law Gustavo Ghidini, 2010-01-01 Professor Ghidini has long since made himself a worldwide reputation as a leading scholar He is a profound critic of intellectual property protection that follows rigid property logic and favours the functionalist competition innovation logic Innovation Competition and Consumer Welfare in Intellectual Property Law is truly enriching reading Hanns Ullrich College of Europe Bruges Belgium We in the United States have much to learn not only from Gustavo

Ghidini's careful analysis of modern trends in the European IP regime but also from his thoughtful development of the thesis that free competition should be understood as the overarching principle guiding both IP protection and what we call antitrust law. Rudolph J. R. Peritz, New York Law School, US, and author of *Competition Policy in America*. This authoritative book provides a comprehensive critical overview of the basic IP paradigms such as patents, trademarks, and copyrights. Their intersection with competition law and their impacts on the exercise of social welfare are analysed from an evolutionary perspective. The analyses and proposals presented encompass the features and rationales of a legal field in constant evolution and relate them to increasingly rapid technological, economic, social, and geo-political developments. Gustavo Ghidini highlights the emerging trends that challenge the traditional all-exclusionary vision of IP law and its application. The author expertly combines holistic, evolutionary, and constitutionally oriented approaches with the search for a rebalancing of the IP rights holders' positions with citizens and users' rights. This book will appeal to academics, scholars, and lawyers specializing in the realm of intellectual property, competition, and comparative law.

Selected Statutes and International Agreements on Patent, Copyright, Trademark, and Unfair Competition Paul Goldstein, R. Anthony Reese, 2012. This compact volume contains all of the key patent, copyright, trademark, and unfair competition statutes and related international agreements in a form convenient for student use. This edition incorporates all of the changes made by the Leahy-Smith America Invents Act adopted in September 2011, which substantially rewrote the US Patent Act. The amended statute appears as the main text, but the volume also continues to include the existing provisions that are being gradually phased out by the new act. In addition to the full text of the federal Patent, Copyright, and Trademark statutes, it includes the principal intellectual property treaties and agreements as well as the Restatement Third of Unfair Competition and the Uniform Trade Secrets Act.

Ownership of Knowledge Dagmar Schafer, Annapurna Mamidipudi, Marius Buning, 2023-07-18. A framework for knowledge ownership that challenges the mechanisms of inequality in modern society. Scholars of science, technology, medicine, and law have all tended to emphasize knowledge as the sum of human understanding and its ownership as possession by law. Breaking with traditional discourse on knowledge property as something that concerns mainly words and intellectual history or science and law, Dagmar Schafer, Annapurna Mamidipudi, and Marius Buning propose technology as a central heuristic for studying the many implications of knowledge ownership. Toward this end, they focus on the notions of knowledge and ownership in courtrooms, workshops, policy, and research practices, while also shedding light on scholarship itself as a powerful tool for making explicit the politics inherent in knowledge practices and social order. The book presents case studies showing how diverse knowledge economies are created and how inequalities arise from them. Unlike scholars who have fragmented this discourse across the disciplines of anthropology, sociology, and history, the editors highlight recent developments in the emerging field of the global history of knowledge as science, as economy, and as culture. The case studies reveal how notions of knowing and owning emerge because they reciprocally produce and determine each other's limits and

possibilities that is how we know inevitably affects how we can own what we know and how we own always impacts how and what we are able to know Contributors Dagmar Sch fer Annapurna Mamidipudi Cynthia Brokaw Marius Buning Viren Murthy Marjolijn Bol Amy E Slaton James Leach Myles W Jackson Lissant Bolton Vivek S Oak J rn Oeder **Copyright Law** Benedict Atkinson,2017-07-05 This volume shows how since 1950 the growth of copyright regulation has followed and enabled the extraordinary economic growth of the entertainment broadcasting software and communications industries It reproduces articles written by an extensive list of leading thinkers US scholars represented in readings include James Boyle Lawrence Lessig Pamela Samuelson Mark Lemley Alfred Yen Julie Cohen Peter Jaszi and Eben Moglen Leading non US contributors include Alan Story Brian Fitzgerald and Peter Drahos These and other authors explain copyright origins the development of the law the theory of enclosure international trends recent developments and current and future directions Today the copyright system is often portrayed as an engine of growth and effective regulation as a predictor of economic development However critics see dangers in the expansion of intellectual property rights The articles in this volume focus principally on the digital age examining how copyright regulation is likely to affect goals of dissemination and access
