Doppler Radar and Weather Observations Richard J. Doviak, 2012-12-02 Doppler Radar and Weather Observations deals with the use of Doppler radar to make observations of a variety of weather phenomena such as tornado vortices hurricanes and lightning channels Topics covered include electromagnetic waves and propagation weather echo signals Doppler spectra of weather echoes and meteorological radar signal processing Rain and turbulence measurements are also considered along with observations of winds storms and related phenomena Comprised of 11 chapters this book begins with an introduction to weather radar principles and how the radar parameters and signal characteristics relate to the target s meteorological properties The effect of the atmosphere on the path of the signal is then examined together with techniques used in extracting a target s properties from its echoes The radar signal path from the transmitter through the antenna along the beam to the target and on its return to the receiver is also discussed Subsequent chapters explore the discrete Fourier transform and its application to weather echo signals the weather Doppler spectrum and the signal processing methods used to derive its principal moments range and Doppler velocity ambiguities as they pertain to distributed targets and the limitations imposed by antenna sidelobes ground clutter signal decorrelation and power A comprehensive treatment of pulse compression and the Doppler processing of frequency modulated signals is given This monograph should be of value to oceanographers meteorologists atmospheric scientists and radar engineers as well as students and researchers interested in Doppler radar principles

Myths of the Modocs Jeremiah Curtin, The majority of Americans know who the Modocs are and where they live for on a time their bravery and so called treachery gave them widespread notoriety but for those who do not know the following sketch may be helpful The Old Modoc Country was the valley of Lost River in Oregon and the country adjacent to the shores of Little Klamath Lake and Tula Lake which in main lies within the boundary of California The country around Tula

Lake is of volcanic formation and at the southern end of the lake are the lava beds about which so much was written during the Modoc War of 1872 1873 Along the rivers and lakes the scenery is pleasing and in places grand Lake Klamath nearly surrounded by mountains is as beautiful as are the famed lakes of Italy and Switzerland Mount Pitt which from a distance seems to rise from the very shore of the lake is snow crowned except for a few weeks in midsummer Mount Shasta is seen from its summit to the snow line The Modoc people believe that Kumush created the world the world in Modoc myth means the country inhabited by the Modocs and the tribes they come in contact with He made the mountains lakes and rivers and gave them names We are not told about the creation of the first people those wonderful beings who inhabited the world before man was created and were so numerous that if a count could be made of all the stars in the sky all the feathers on birds all the hairs and fur on animals and all the hairs on our heads they would not be as numerous No man knows how long those first people lived but after countless ages a time came when they were transformed into beasts reptiles birds fishes insects plants stones snow earthquake sun moon and stars in fact into every living thing object phenomenon and power outside of man This transformation took place about the time that Kumush created the Modoc and other Indian tribes and gave them names told them where their homes would be designated the Klamath country for the Modocs and established the present order of things For the Modocs the valley of Lost River and the lands around Klamath and Tula Lake are sacred We who endeavor to trace our origin back to a monkey or still farther to a bit of protoplasm or who believe in and search far and wide for the Garden of Eden cannot revere a country which is ours simply by chance of birth as the Indian reveres the country where his tribe originated We cannot estimate the love an Indian has for his country His holy places are not in far off Palestine they are before his eyes in his own birthplace where every river hill and mountain has a story connected with it an account of its origin No people could be more religious than were the Indians before the advent of the white man they had no observance rite or custom which they did not believe to be God given
