**Through the Tween Years** Bruce Morgan,Deb Odom,2005 It s not easy being a tween A lot of us are either in a tunnel or a bridge A lot of us don t know who we are Instead of following Barney s advice we end up doing what popstars do Kelley age 10 No longer little children but not yet teenagers tweens are beginning to see themselves as autonomous while still struggling to understand where they fit in It can also be an awkward time for teachers who cherish the hilarious and poignant personalities of tween writers but feel pressured by a new emphasis on testing in the intermediate grades Many teachers have virtually abandoned writers workshops in favor of formula writing and prompts even though these workshops may be essential for understanding the emerging competencies and personalities of eight to twelve year olds Bruce Morgan and Deb Odom teach together at a school where formula writing and test preparation led to stagnant writing scores student boredom and teacher discouragement They worked with their colleagues in grades 3 6 to make some dramatic changes in their collective writing instruction These changes included a return to their roots as writing workshop teachers but with new twists The teaching staff drew up new common standards for writing assessment and achievement The revised writing programs also involved integrating insights from reading strategy instruction with a renewed emphasis on the basics of writers workshop student choice teacher modeling revision and using quality children s literature as mentor text Writing Through the Tween Years documents how teachers can get back to the joys of teaching writing in a literature rich thoughtful environment There may be no better way to understand and reach tween writers **The Selected Writings of Leigh Hunt**

*Selected Writings on Computing: A personal Perspective* Edsger W. Dijkstra, 2012-12-06 Since the summer of 1973 when I became a Burroughs Research Fellow my life has been very different from what it had been before The daily routine changed instead of going to the University each day where I used to spend most of my time in the company of others I now went there only one day a week and was most of the time that is when not travelling alone in my study In my solitude mail and the written word in general became more and more important The circumstance that my employer and I had the Atlantic Ocean between us was a further incentive to keep a fairly complete record of what I was doing The public part of that output found its place in what became known as the EWD series which can be viewed as a form of scientific correspondence possible since the advent of the copier That same copier makes it hard to estimate its actual distribution I myself made about two dozen copies of my texts but their recipients were welcome to act as further nodes of the distribution tree The decision to publish a selection from the EWD series in book form was at first highly embarrassing but as the months went by I got used to the idea As soon as some guiding principles had been adopted preferably not published elsewhere as varied and as representative as possible etc
