**The Imperfect and Unfinished Math Teacher [Grades K-12]** Chase Orton, 2022-02-24 The system won't do it for us

But we have each other In *The Imperfect and Unfinished Math Teacher A Journey to Reclaim Our Professional Growth* master storyteller Chase Orton offers a vulnerable and courageous grassroots guide that leads K 12 math teachers through a journey to cultivate a more equitable inclusive and cohesive culture of professionalism for themselves what he calls professional flourishing The book builds from two bold premises First that as educators we are all naturally imperfect and unfinished and growth should be our constant goal Second that the last 40 years of top down PD efforts in mathematics have rarely supplied teachers with what they need to equitably grow their practice and foster classrooms that are likewise empowered inclusive and cohesive With gentle humanity this book inspires teachers to break down silos observe each others classrooms interrogate their own biases and put students at the center of everything they do in the math classroom This book Weaves raw and authentic stories both personal and those from other educators into a relatable and validating narrative Offers interactive opportunities to self reflect build relationships seek new vantage on our teaching by observing others classrooms and students and share and listen to other s stories and experiences Asks teachers to give and accept grace as they work collaboratively to better themselves and the system from within so that they can truly serve each of their students authentically and equitably Implementing the beliefs and actions in this book will position teachers to become more active partners in each other s professional growth so that they can navigate the obstacles in their professional landscape with renewed focus and a greater sense of individual and collective efficacy It equips teachers and by extension their students to chart their own course and author their own equitable and joyful mathematical and professional stories *New York*

irreplaceable agents of our everyday engagement with the world He examines how ideas of images and their powers have been constructed in Western humanities art theory and philosophy developing a novel genealogy of both visual studies and the concept of the medium Alloo reconstructs the earliest Western media theory Aristotle s concept of the diaphanous milieu of vision and the significance of its subsequent erasure in the history of science Ultimately he argues for a historically informed phenomenology of images and visual media that explains why images are not simply referential depictions windows onto the world Instead images constantly reactivate the power of appearing As media of visualization they allow things to appear that could not be visible except in and through these very material devices
