Looking for the Aliens Peter A. Hough, Jenny Randles, 1997      The Alien Abduction Phenomenon Paul Meehan, 2025-06-13 News reports books articles and films about alien abductions have long captured the public imagination This book traces the evolution of the phenomenon from the late 1940s flying saucer era and the contactee and occupant sightings of the 1950s to the widespread abduction stories of the 1960s and beyond It examines how broader social cultural and scientific contexts have shaped these accounts and offers a critical analysis of their interpretations over time Also discussed are the key researchers who have sought to understand the nature and intentions of alleged extraterrestrial beings or ufonauts while addressing the skepticism about the subject The efforts of the scientific community to investigate unidentified aerial phenomenon UAP and abductions are assessed acknowledging both the challenges and limitations of such inquiries Firsthand encounters with non human entities are examined attempting to uncover the forces behind these sightings and arguing that there could be unforeseen consequences of ignoring the phenomena      *They Would Be Gods* Anthony K. Forwood, 2011      The Encyclopedia of Alien Encounters Alan Baker, 1999 Containing over 500 entries this historical reference work provides an A Z of alien and non human encounters It details the events encounters personalities and theories that have created this field of human experience and inquiry      **Centering the Margins of Anthropology's History** Regna Darnell, Frederic W. Gleach, 2021-05 Centering the Margins of Anthropology's History circles around the conscious recognition of margins and suggests it is time to bring the margins to the center both in terms of a changing theoretical openness and a supporting body of scholarship      *After Contact* Albert A. Harrison, 1997-08-21 Examines in detail the psychological sociological political and cultural dimensions of the search for extraterrestrial intelligence

*Saucer Movies* Paul Meehan, 1998 The first book to examine the relationship between cinema and the UFO phenomenon analyzing more than 300 films in terms of their aesthetic merit direction acting screenplay etc and their UFOlogical significance      The Scientific Imagination Arnon Levy, Peter Godfrey-Smith, 2020 This book looks at the role of the imagination in science from both philosophical and psychological perspectives These contributions combine to provide a comprehensive and exciting picture of this under explored subject      **UFOs** Robert C. Trundle, 2000      *Digging Holes in Popular Culture* Miles Russell, 2002 What would Howard Carter have thought of Lara Croft and why do archaeologists feature so prominently in Star Trek Douglas Adams author of Hitchhiker's Guide to the Galaxy writes the preface to this unusual collection of papers dedicated to exploring the role of the archaeologist in popular culture The clichés and stereotypes of archaeology that abound in popular culture the sense of mystery and adventure the excitement generated by a dangerous treasure hunt or a thrilling detective story rarely hint at the monotonous hours spent by modern archaeologists researching in laboratories and libraries and filling out paperwork Yet the role models provided by fictional characters such as Dr Who Indiana Jones Captain Jean Luc Picard and Lara Croft have had a powerful influence on how archaeologists and the practices

of archaeology are viewed by the general public At times hilarious these papers nevertheless address serious cultural issues relevant to archaeology today colonialism the indigenous voice gender roles objectivity and ownership of the past High Strangeness Jerome Clark,1996 *The Mammoth Encyclopedia of Extraterrestrial Encounters* Ronald Story,2012-03-01 An illustrated A to Z guide to all things alien Over 400 entries from more than 100 contributors cover everything from the incidents and witnesses involved to the concepts at stake and experts personal position statements Entries range from alien abductions the Fantasy Prone hypothesis and JAL Flight no 1628 to the Lakenheath Bentwaters Episode mind control by aliens and Roswell The contributors include Isaac Asimov Jerome Clark Erich von Daniken Peter Davenport Hilary Evans Timothy Good Marvin Kottmeyer Jenny Randles Carl Sagan Whitley Streiber and Jacques Vallee There are over 300 images eyewitness drawings and photographs Science, Culture and the Search for Life on Other Worlds John W. Traphagan,2016-08-26 This book explores humanity s thoughts and ideas about extraterrestrial life paying close attention to the ways science and culture interact with one another to create a context of imagination and discovery related to life on other worlds Despite the recent explosion in our knowledge of other planets and the seeming era of discovery in which we live to date we have found no concrete evidence that we are not alone Our thinking about life on other worlds has been and remains the product of a combination of scientific investigation and human imagination shaped by cultural values particularly values of exploration and discovery connected to American society The rapid growth in our awareness of other worlds makes this a crucial moment to think about and assess the influence of cultural values on the scientific search for extraterrestrial life Here the author considers the junction of science and culture with a focus on two main themes 1 the underlying assumptions many of which are tacitly based upon cultural values common in American society that have shaped the ways researchers in astrobiology and SETI have conceptualized the nature of their endeavor and represented ideas about the potential influence contact might have on human civilization and 2 the empirical evidence we can access as a way of thinking about the social impact that contact with alien intelligence might have for humanity Science and Pseudoscience in Clinical Psychology Scott O. Lilienfeld,Steven Jay Lynn,Jeffrey M. Lohr,2014-10-17 This valued resource helps practitioners and students evaluate the merits of popular yet controversial practices in clinical psychology and allied fields and base treatment decisions on the best available research Leading authorities review widely used therapies for a range of child adolescent and adult disorders differentiating between those that can stand up to the rigors of science and those that cannot Questionable assessment and diagnostic techniques and self help models are also examined The volume provides essential skills for thinking critically as a practitioner evaluating the validity of scientific claims and steering clear of treatments that are ineffective or even harmful New to This Edition Reflects the significant growth of evidence based practices in the last decade Updated throughout with the latest treatment research Chapter on attachment therapy Chapter on controversial interventions for child and adolescent antisocial behavior Addresses changes in DSM 5 **The Oxford Handbook of the**

**Development of Imagination** Marjorie Taylor, 2013-04-02 Children are widely celebrated for their imaginations but developmental research on this topic has often been fragmented or narrowly focused on fantasy However there is growing appreciation for the role that imagination plays in cognitive and emotional development as well as its link with children's understanding of the real world With their imaginations children mentally transcend time place and or circumstance to think about what might have been plan and anticipate the future create fictional relationships and worlds and consider alternatives to the actual experiences of their lives The Oxford Handbook of the Development of Imagination provides a comprehensive overview of this broad new perspective by bringing together leading researchers whose findings are moving the study of imagination from the margins of mainstream psychology to a central role in current efforts to understand human thought The topics covered include fantasy reality distinctions pretend play magical thinking narrative anthropomorphism counterfactual reasoning mental time travel creativity paracosms imaginary companions imagination in non human animals the evolution of imagination autism dissociation and the capacity to derive real life resilience from imaginative experiences Many of the chapters include discussions of the educational clinical and legal implications of the research findings and special attention is given to suggestions for future research

*Space, Time, and Aliens* Steven J. Dick, 2020-05-11 In this comprehensive and interdisciplinary volume former NASA Chief Historian Steven Dick reflects on the exploration of space astrobiology and its implications cosmic evolution astronomical institutions discovering and classifying the cosmos and the philosophy of astronomy The unifying theme of the book is the connection between cosmos and culture or what Carl Sagan many years ago called the cosmic connection As both an astronomer and historian of science Dr Dick has been both a witness to and a participant in many of the astronomical events of the last half century This collection of papers presents his reflections over the last forty years in a way accessible to historians philosophers and scientists alike From the search for alien life to ongoing space exploration efforts readers will find this volume full of engaging topics relevant to science society and our collective future on planet Earth and beyond
