dispute Boletín de Estudios Latinoamericanos Y Del Caribe ,1976 Energy and Structure Richard Newbold  
 Adams,2014-02-19 All social structures are essentially power structures dependent on energy The concept of power and the  
 role of energy in social organization are crucial and timely concerns especially in light of the current apprehension about  
 future energy resources In Energy and Structure Richard N Adams argues that social power affects humanity s approach to  
 ecological economic and political problems directing people to seek solutions that are often deceptively shortsighted Adams  
 an anthropologist proposes that social power is directly derived from control over energy processes He identifies how power  
 and mentalistic structures constitute fundamental determinants that shape the lives of people at all stages of cultural  
 development forcing them to accept alternatives often far removed from their desires His central thesis is that the amount of  
 power in any system varies with the amount of control exercised over the environment and that increasing power and control  
 lead to increasing centralization of decision making social marginalization and environmental despoliation Thus the more  
 highly developed societies by virtue of their greater controls are responsible for the greater ultimate subordination and  
 destruction of human potential as humanity combines technological advances with a growing inability to exercise good  
 judgment with respect to our own survival Energy and Structure begins with an examination of the basic theory of social  
 power what it is and how it works Adams defines and differentiates between the concepts of power and control authority and  
 legitimacy power domains and levels He then examines the underlying metatheory of energetic and mentalistic structures  
 and provides an analytic model of the evolution of power from the primitive band to modern nations He predicts the  
 emergence of supranational blocs and discusses other future possibilities Throughout his theoretical points are solidly  
 supported by examples drawn from a wide range of cultures **Book Review Index to Social Science Periodicals** Paul
