Why Men? Nancy Lindisfarne,Jonathan Neale,2023-09-28 How did humans a species that evolved to be cooperative and egalitarian develop societies of aggressively enforced inequality Why did our ancestors create a world of patriarchal power war and abuse Did it have to be this way Powerful elites have always called hierarchy and violence unavoidable facts of human nature The science of evolution they say caused and causes men to fight and people to have different unequal roles starting with men and women But that is bad science In this fascinating fun and important book two anthropologists tell the real story of humanity from early behaviours to contemporary cultures From bonobo sex and prehistoric childcare to human sacrifice Joan of Arc Darwinism and Abu Ghraib they reveal humankind s evolutionary predisposition to both equality and inequality Very old ideas of difference invented by the earliest class societies have hidden this truth causing much female queer and minority suffering But there is hope Why Men is not a book about what men and women are or do It s about what privileges humans claim how they rationalise them and how we unpick those ideas about our roots It will change how you see the nature of injustice violence and even yourself

The Trouble with Human Nature Elizabeth D. Whitaker,2017-02-03 The Trouble with Human Nature brings together biological and cross cultural evidence to critically examine common preconceptions and challenge popular assumptions about human nature It sets out to counter genetic and evolutionary myths about human variation and behavior drawing on both biological and cultural anthropology as well as from other disciplines including psychology economics and sociology The chapters address the interrelated topics of health and disease gender and other differences and violence and conflict The analysis calls into question the presumed natural foundation for social inequalities and sheds light on both the constraints and possibilities inherent in the human condition This book provides students of human diversity and evolution with an excellent resource to better approach questions relating to human nature It will also be of interest to those taking courses in social cultural and biological anthropology as well as public health medical anthropology sociology gender studies psychology and kinship studies
