Mercantile States And The World Oil Cartel 1900 1939:

Mercantile States and the World Oil Cartel, 1900-1939 Gregory Patrick Nowell, 1994 Governing Ideas J. Nicholas Ziegler, 2019-05-15 Despite increasingly open markets and a pervasive move toward international production methods national governments continue to pursue remarkably distinctive policies for promoting innovation in industry J Nicholas Ziegler analyzes this apparent paradox by comparing government efforts to promote technological advance in Germany and France His findings reveal a great deal about the roots and limits of public strategies for economic growth Through close comparison of three technologies digital telephone exchanges computer controlled machine tools and semiconductors Ziegler shows how each country displays predictable strengths and weaknesses in promoting innovation These distinctive capacities depend more upon the links among different skill and knowledge bearing elites than on the structure of the state or the industrial sector in question As business outcomes hinge less on economies of scale and more on knowledge based competition the politics of contending interest groups steadily gives way to a competition for status and jurisdiction among more specialized professional groups As a result Germany's strengths stem directly from what Ziegler calls an ethos of competence whereas France's strengths stem from an order of state created elites More generally Ziegler contends neo institutional approaches to public policy need to pay far more attention to the professional identities of different occupational groups **United States Policy Toward the Armenian Question and the Armenian Genocide** S. Payaslian, 2005-12-01 This comprehensive analysis of U S policy toward the Armenian Question and the Armenian Genocide focuses on the important role big business played in keeping the United States from playing a more active role in opposing the genocide notwithstanding broad public opinion calling for greater action Business interests feared antagonizing the Turkish leaders by too much of an intervention on behalf of the Armenians It surveys the historical evolution of U S policy toward the Ottoman Empire since the early nineteenth century and examines the extent to which the missionary community commercial interests and international economic and geopolitical competitions shaped U S policy during the administrations of William McKinley Theodore Roosevelt William Howard Taft and Woodrow Wilson **Asian States, Asian Bankers** Natasha Hamilton-Hart, 2002 Intro Contents Acknowledgments 1 Beliefs about American Hegemony in Southeast Asia 2 Behind Beliefs Hard Interests Soft Illusions 3 The Politics and Economics of Interests Ruling Elites and U S Power 4 History Lessons 5 Professional Expertise 6 Regime Interests Beliefs and Knowledge Appendix Interviews References Index Carbon Democracy Timothy Mitchell, 2011-11-05 A brilliant revisionist argument that places oil companies at the heart of 20th century history and of the political and environmental crises we now face Guardian A sweeping overview of the relationship between fossil fuels and political institutions from the industrial revolution to the Arab Spring Financial Times Oil is a curse it is often said that condemns the countries producing it to an existence defined by war corruption and enormous inequality Carbon Democracy tells a more complex story arguing that no nation escapes the political consequences of our collective

dependence on oil It shapes the body politic both in regions such as the Middle East which rely upon revenues from oil production and in the places that have the greatest demand for energy Timothy Mitchell begins with the history of coal power to tell a radical new story about the rise of democracy Coal was a source of energy so open to disruption that oligarchies in the West became vulnerable for the first time to mass demands for democracy In the mid twentieth century however the development of cheap and abundant energy from oil most notably from the Middle East offered a means to reduce this vulnerability to democratic pressures The abundance of oil made it possible for the first time in history to reorganize political life around the management of something now called the economy and the promise of its infinite growth The politics of the West became dependent on an undemocratic Middle East In the twenty first century the oil based forms of modern democratic politics have become unsustainable Foreign intervention and military rule are faltering in the Middle East while governments everywhere appear incapable of addressing the crises that threaten to end the age of carbon democracy the disappearance of cheap energy and the carbon fuelled collapse of the ecological order In making the production of energy the central force shaping the democratic age Carbon Democracy rethinks the history of energy the politics of nature the theory of democracy and the place of the Middle East in our common world *The Currency of Ideas* Kathleen R. McNamara, 2019-06-30 Why have the states of Europe agreed to create an Economic and Monetary Union EMU and a single European currency What will decide the fate of this bold project This book explains why monetary integration has deepened in Europe from the Bretton Woods era to the present day McNamara argues that the development of a neoliberal economic policy consensus among European leaders in the years after the first oil crisis was crucial to stability in the European Monetary System and progress towards EMU She identifies two factors rising capital mobility and changing ideas about the government's proper role in monetary policymaking as critical to the neoliberal consensus but warns that unresolved social tensions in this consensus may provoke a political backlash against EMU and its neoliberal reforms McNamara's findings are relevant not only to European monetary integration but to more general questions about the effects of international capital flows on states Although this book delineates a range of constraints created by economic interdependence McNamara rejects the notion that international market forces simply dictate government policy choice She demonstrates that the process of neoliberal policy change is a historically dependent one shaped by policymakers shared beliefs and interpretations of their experiences in the global economy **The Hidden Hand of American Hegemony** David E. Spiro, 2019-06-30 Between 1973 and 1980 the cost of crude oil rose suddenly and dramatically precipitating convulsions in international politics Conventional wisdom holds that international capital markets adjusted automatically and remarkably well enormous amounts of money flowed into oil rich states and efficient markets then placed that new money in cash poor Third World economies David Spiro has followed the money trail and the story he tells contradicts the accepted beliefs Most of the sudden flush of new oil wealth didn't go to poor oil importing countries around the globe Instead the

United States made a deal with Saudi Arabia to sell it U S securities in secret a deal resulting in a substantial portion of Saudi assets being held by the U S government With this arrangement the U S government violated its agreements with allies in the developed world Spiro argues that American policymakers took this action to prop up otherwise intolerable levels of U S public debt In effect recycled OPEC wealth subsidized the debt happy policies of the U S government as well as the debt happy consumption of its citizenry

Governing the World's Money David M. Andrews, C. Randall Henning, Louis W. Pauly, 2018-10-18 The effective governance of global money and finance is under enormous stress Deep changes over the last decade in capital markets exchange rate systems and government finances suggest dramatic shifts in the contours of monetary power with tensions rising between the functional logic of international economics and the geographic logic of state centered politics Governing the World s Money assesses those tensions and the prospects for their peaceful resolution Governing the World s Money surveys the frontiers of the global monetary system in ten original essays Leading scholars of international relations and economics explore the evolution of the instruments available to policy officials for monetary governance As they analyze the contemporary reordering of political authority in a market oriented global economy they open new pathways for the study of regional monetary integration and international institutional reform

Nationalism, Liberalism, and Progress Ernst B. Haas, 2018-10-18 Far from being an inevitably aggressive and destructive force nationalism is for Ernst B Haas the primary means of bringing coherence to modernizing societies In the second volume of his magisterial exploration of this topic Haas emphasizes the benefits of liberal nationalism which he deems more progressive than other nation building formulas because it relies on reason to improve citizens lives The Dismal Fate of New Nations considers several societies that modernized relatively recently many of them aroused to nationalism by the imperialism of the old nation states The book probes the different patterns of development in emerging countries Iran Egypt India Brazil Mexico China Russia and Ukraine for insights into the possibilities and limitations of all nationalisms especially liberal nationalism Employing a systematic comparative perspective Haas organizes the book around the notion of change and its management by political elites in Asia Eastern Europe Latin America and the Middle East Haas particularly wants to understand how nationalism plays out in the politics of modernization within non Western cultures especially those where religions other than Christianity predominate Where the hold of religion remains formidable he argues the mixture of traditional and secular modernist institutions and beliefs will challenge the victory of liberal nationalism and the very success of nation state formation
