Wolfrum, Volker Röben, 2008-02-26 In recent years the question of the legitimacy of international law has been discussed quite intensively Such questions are for example whether international law lacks legitimacy in general whether international law or a part of it has yielded to the facts of power whether adherence to international legal commitments should be subordinated to self defined national interests whether international law or particular rules of it such as the prohibition of the use of armed force have lost their ability to induce compliance compliance pull and what is the relevance of non enforcement or failure to obey for the legitimacy of that particular international norm This book contains fresh perspectives on these

Biersteker,Peter J. Spiro,Chandra Lekha Sriram,Veronica I. Raffo,2006-10-19 This unique volume examines the opportunities for and initiates work in interdisciplinary research between the fields of

international law and international relations disciplines that have engaged little with one another since the Second World War. Written by leading experts in the fields of international law and international relations, it argues that such interdisciplinary research is central to the creation of a knowledge base among IR scholars and lawyers for the effective analysis and governance of macro and micro phenomena. International law is at the heart of international relations, but due to challenges of codification and enforceability, its apparent impact has been predominantly limited to commercial and civil arrangements. International lawyers have been saying for years that law matters in international affairs, and now current events are proving them right. International Law and International Relations makes a powerful contribution to the theory and practice of global security by initiating a research agenda, building an empirical base, and offering a multidisciplinary approach that provides concrete answers to real world problems of governance. This book will be of great interest to all students of international law, international relations, and governance.

Learning for Economic Self-Sufficiency Mary V. Alfred, 2010-09-01. In a most timely volume addressing many of the connections among current fiscal and employment crises to adult education, Learning for Economic Self Sufficiency highlights the problems and challenges that low literate adults encounter in various environments. Moreover, this book presents strategies for addressing the chronic illiteracy among low income workers. The power of this volume is that the reader gains a holistic view of the complexities of educating a population of low literate adult learners from various life conditions. From language literacy issues in corrections, the workplace, and access to higher education, to migrant workers' literacy learning barriers to technology, literacies, and consumerism myths, Learning for Economic Self Sufficiency goes far deeper than prior volumes in exploring the complex scope of issues faced by low income, low literate adults as they seek learning for economic self sufficiency. The overall objective of the book is to help readers explore economic self sufficiency for low literate and low income adults from various contexts and the role of adult and higher education in developing these learners for greater economic independence. Noting that literacy is only a first step to economic, mental, and physical health, as well as responsible citizenship, each chapter provides specific case examples and recommendations to educators and trainers of adults for

Black Political Organizations in the Post-Civil Rights Era Ollie Johnson, Karin

Stanford, 2002-12-16 We know a great deal about civil rights organizations during the 1960s but relatively little about black political organizations since that decade. Questions of focus, accountability, structure, and relevance have surrounded these groups since the modern Civil Rights Movement ended in 1968. Political scientists Ollie A. Johnson III and Karin L. Stanford have assembled a group of scholars who examine the leadership, membership, structure, goals, ideology, activities, accountability, and impact of contemporary black political organizations and their leaders. Questions considered are: How have these organizations adapted to the changing sociopolitical and economic environment? What ideological shifts, if any, have occurred within each one? What issues are considered important to black political groups, and what strategies are used to implement their agendas? The contributors also investigate how these organizations have adapted to changes within the black community and American society as a whole. Organizations covered include well-known ones such as the NAACP, Rainbow PUSH Coalition, the Southern Christian Leadership Conference, the Urban League, and the Congress of Racial Equality, as well as organizations such as the National Association of Colored Women's Clubs. Religious groups, including black churches and the Nation of Islam, are also considered.
