Presidency Dilys M. Hill, Phil Williams, 2016-07-27 The four years of the Bush presidency cover a momentous era in American and world history In international affairs the events in Eastern Europe and the then Soviet Union in late 1989 gave the President a high profile The advent of the New World Order made the United States pre eminent the triumph of the West was assured with the added bonus of the peace dividend as arms control agreements and defense savings seemed imminent The President s personal popularity flourished in this climate and reached a new peak with the triumph of the allied forces in the Gulf War The Gulf conflict saw Bush at his most decisive firm in his moral stance skilled in his action to bring together allied support backed by the United Nations and confident in his handling of public opinion Rolling the Iron Dice Scot

Macdonald, 2000-07-30 Does history provide lessons for foreign policy makers today Macdonald combines cognitive psychology theories about analogical reasoning international relations theories about military intervention and original archival research to analyze the role of historical information in foreign policy decision making He looks at the role of historical analogies in Anglo American decision making during foreign policy crises involving the possible use of force in regional contingencies during a crucial period in the 1950s when the West faced an emerging Soviet threat This study analyzes the influence of situational and individual variables in a comparison of more than ten leaders from two nations facing four different crises Rolling the Iron Dice describes the often significant effect of historical analogies on perceptions of the adversary and of allies time constraints policy options and risks as well as the justification of policy in four crises the 1950 Korean invasion the 1951 53 Iranian oil nationalization incident the 1956 Suez crisis and the 1958 crisis in Lebanon and Jordan Contrary to both the slippery slope and the escalation models of military intervention Macdonald argues that leaders decide extremely early in a crisis often on the basis of an historical analogy but also based on perceptions of the rationality of an adversary whether to use military force Their decision does not change unless the adversary capitulates to every demand

Frustrated Empire David Ryan, 2007-08-20 Examining the broad contexts of US foreign policy and the lingering aftermath of the Vietnam War David Ryan argues that these events created an opportunistic framing of 9 11 paving the way for the long held neo conservative desire for regime change and war in Iraq He examines the construction of the cultural framework for war following 9 11 the legitimacy of military force in Afghanistan the rise of anti Americanism within the broader contexts over the struggle over legitimacy identity and leadership Turning the clash of civilisations thesis on its head Ryan presents a careful analysis of the evolution of US foreign policy and its engagement with Iraq through the 1980s While 9 11 provided the opportunity the post Vietnam context provides a more pertinent framework for this reflection on the Gulf War the Iraq War and the strategic implications for US foreign policy **The Challenge of Fundamentalism** Bassam Tibi, 2023-04-28 Long before the tragic events of September 11 2001 Islamic fundamentalism was exerting a significant influence in nearly every corner of the world Bassam Tibi a widely recognized expert on Islam and Arab culture offers an important and disquieting analysis of this particular synthesis of religion and politics A Muslim and descendant of a famous Damascene

Islamic scholar family Tibi sees Islamic fundamentalism as the result of Islam's confrontation with modernity and not only as it is widely believed economic adversity. The movement is unprecedented in Islamic history and parallels the inability of Islamic nation states to integrate into the new world secular order. For this updated edition Tibi has written a new preface and lengthy introduction addressing Islamic fundamentalism in light of and since September 11. Long before the tragic events of September 11, 2001, Islamic fundamentalism was exerting a significant influence in nearly every corner of the world. Bassam Tibi, a widely recognized expert on Islam and Arab culture, offers an important and disquieting analysis. **A History of the Middle East** Saul S. Friedman, 2014-01-10. As the birthplace of three principal religions, the Middle East is holy to 15 million Jews, 2 billion Christians, and 1 billion Muslims. As the cradle of western civilization, it is fundamental to world history, the place where humans transformed themselves from nomadic hunters to settled farmers capable of building great cities and societies. This detailed history covers the Middle East from its ancient beginnings to the present. The confluence of events that produced civilized society is fully discussed along with the establishment of Judaism, Christianity, and Islam. The emergence and decline of the Byzantine and Ottoman empires, which laid much of the framework for the region to move into the modern era, is covered in depth. Analysis of the area in recent decades focuses on World War I and II and the regional conflicts that inflame the Middle East of the 21st century.
