D. D. Richard Bentley,1838 **Visual Affect Recognition** Ioanna-Ourania Stathopoulou,2010 It is generally known that
human faces as well as body motions and gestures provide a wealth of information about a person such as age race sex and
emotional state This monograph primarily studies the perception of facial expression of emotion and secondarily of motion
and gestures with the purpose of developing a fully automated visual affect recognition system for use in modes of human
computer interaction The book begins with a survey of the literature on emotion perception followed by a description of
empirical studies conducted with human participants and the construction of a face image database On the basis of this work
a visual affect recognition system was developed consisting of two modules a face detection subsystem and a facial
expression recognition subsystem Details of this system are demonstrated and analyzed and extensive performance
evaluations and test results are provided Finally current research avenues leading to visual affect recognition via analysis of
body motion and gestures are also discussed
