The harsh realities of wartime and Weimar era Germany called for a new kind of art Dada followed by Neue Sachlichkeit New Objectivity confronted social and political issues in new and bold ways This book highlights how Otto Dix 1891 1969 one of the leading artists connected to these artistic movements employed these new approaches to reveal the injustices of wartime and post World War I Germany Having spent 38 months on the frontline his pictures revealed the brutalities of the conflict and helped establish him as one of Europe s leading modernists Offering substantial new research and presenting numerous primary sources to an English readership for the first time the book examines Dix s war pictures within the broader visual culture of war in order to assess how they functioned alternatively as cutting edge modernist art and transgressive war commemoration Each chapter provides a case study of the first public display of one or more of Dix s war pictures at key exhibitions and explores how their reception was subjected to changing socio political and cultural conditions as well as divergent attitudes to the lost war It pulls together a number of key approaches and texts contemporary reviews contemporary cultural productions such as novels and cartoons and theoretical and historical approaches from history memory studies and art history Bringing a unique perspective and original scholarship to Dix s war works this book is essential reading for art historians of World War I and the visual culture of Weimar Germany Art Books Wolfgang M. Freitag,2013-10-28 First published in 1997 For this second edition of Art Books A Basic Bibliography of Monographs on Artists the vast number of new books published since 1985 was surveyed and evaluated This has resulted in the selection of 3 395 additional titles These selections reflective of the increase in the monographic literature on artists during the last ten years are evidence of the activities of a larger number of art historians in more countries worldwide of the increasingly diverse and ambitious exhibition programs of museums whose number has also increased dramatically and also of a lively international art market and the attendant gallery activities The selections of the first edition have been reviewed errors have been corrected and important new editions and reprints have been noted The second edition contains 278 names of artists not represented in the first edition **German Post-Expressionism : The Art of the Great Disorder 1918-1924** , German Post Expressionism is the first study to reconstruct historically the evolution of Die neue Sachlichkeit the slogan coined as a designation for the Post Expressionist figural art that developed throughout Germany following the failed revolution of 1919 Rather than starting with the moment this Post Expressionist movement was christened with a slogan 1923 Crockett investigates the sources and precepts of Post Expressionism beginning with the anti Expressionist stance of Dada in 1918 and the loss of faith in Expressionism on the part of some of its chief supporters during 1919 20 **Lustmord** Maria Tatar,2020-07-21 In a book

that confronts our society's obsession with sexual violence Maria Tatar seeks the meaning behind one of the most disturbing images of twentieth century Western culture the violated female corpse This image is so prevalent in painting literature film and most recently in mass media that we rarely question what is at stake in its representation Tatar however challenges us to consider what is taking place both artistically and socially in the construction and circulation of scenes depicting sexual murder In examining images of sexual murder Lustmord she produces a riveting study of how art and murder have intersected in the sexual politics of culture from Weimar Germany to the present Tatar focuses attention on the politically turbulent Weimar Republic often viewed as the birthplace of a transgressive avant garde modernism where representations of female sexual mutilation abound Here a revealing episode in the gender politics of cultural production unfolds as male artists and writers working in a society consumed by fear of outside threats envision women as enemies that can be contained and mastered through transcendent artistic expression Not only does Tatar show that male artists openly identified with real life sexual murderers George Grosz posed as Jack the Ripper in a photograph where his model and future wife was the target of his knife but she also reveals the ways in which victims were disavowed and erased Tatar first analyzes actual cases of sexual murder that aroused wide public interest in Weimar Germany She then considers how the representation of murdered women in visual and literary works functions as a strategy for managing social and sexual anxieties and shows how violence against women can be linked to the war trauma to urban pathologies and to the politics of cultural production and biological reproduction In exploring the complex relationship between victim and agent in cases of sexual murder Tatar explains how the roles came to be destabilized and reversed turning the perpetrator of criminal deeds into a defenseless victim of seductive evil Throughout the West today the creation of similar ideological constructions still occurs in societies that have only recently begun to validate the voices of its victims Maria Tatar's book opens up an important discussion for readers seeking to understand the forces behind sexual violence and its portrayal in the cultural media throughout this century

Portraits of Remembrance Margaret Hutchison, Steven Trout, 2020-04-28 Interdisciplinary collection of essays on fine art painting as it relates to the First World War and commemoration of the conflict Although photography and moving pictures achieved ubiquity during the First World War as technological means of recording history the far more traditional medium of painting played a vital role in the visual culture of combatant nations The public's appetite for the kind of up close frontline action that snapshots and film footage could not yet provide resulted in a robust market for drawn or painted battle scenes Painting also figured significantly in the formation of collective war memory after the armistice Paintings became sites of memory in two ways first many governments and communities invested in freestanding panoramas or cycloramas that depicted the war or featured murals as components of even larger commemorative projects and second certain paintings whether created by official artists or simply by those moved to do so emerged over time as visual touchstones in the public's understanding of the war *Portraits of Remembrance* Painting Memory and the First World War examines the relationship between war painting and collective memory in Australia Austria Belgium Canada Croatia France Germany Great Britain New Zealand Russia Serbia Turkey and the United States The paintings discussed vary tremendously ranging from public murals and panoramas to works on a far more intimate scale including modernist masterpieces and crowd pleasing expressions of sentimentality or spiritualism Contributors raise a host of topics in connection with the volume's overarching focus on memory including national identity constructions of gender historical accuracy issues of aesthetic taste and connections between painting and literature as well as other cultural forms

Sites of Memory, Sites of Mourning Jay Winter, 2014-05-15 Jay Winter's powerful study of the collective remembrance of the Great War offers a major reassessment of one of the critical episodes in the cultural history of the twentieth century Dr Winter looks anew at the culture of commemoration and the ways in which communities endeavoured to find collective solace after 1918 Taking issue with the prevailing modernist interpretation of the European

reaction to the appalling events of 1914-18 Dr Winter instead argues that what characterised that reaction was rather the attempt to interpret the Great War within traditional frames of reference Tensions arose inevitably Sites of Memory Sites of Mourning is a profound and moving book of seminal importance for the attempt to understand the course of European history during the first half of the twentieth century **Painting and Sculpture in Europe, 1880-1940** George Heard
