**Perspectives on State and Local Politics** William P. Collins, 1974      **Perspectives on State and local politics,**  
**edited by W.P. Collins** William P. Collins,      **New Perspectives in State and Local Politics** James A. Riedel, 1971

*Intergovernmental Perspective*, 1975 Each issue concentrates on a different topic      Culture Wars and Local Politics  
Elaine B. Sharp, 1999 This collection offers alternative explanations of local actions with a focus on conflict It features examples of experiences selected from various cities It examines how the responses of local governments to specific issues are influenced by such factors as political culture and institutions      Industrial Tree Plantations and the Land Rush in China  
Yunan Xu, 2020-03-12 This book analyses the political and economic causes mechanisms and impacts of the industrial tree plantation boom in China In the past two decades the industrial tree plantation sector has been expanding rapidly in China especially in Guangxi Province Based on extensive primary data this book concentrates on the political economy of the sector s expansion with a focus on the recent and dramatic agrarian transformation involving the land labour nexus the impact on villagers livelihoods the role of the state and political reactions from below The book questions the stereotypical portrayal of local communities as the excluded villager Instead it demonstrates that this is a much more complex issue with varying levels of passive and active forms of inclusion and exclusion within local communities While most literature focuses on crop booms for food and biofuel production the industrial plantation sector has largely been overlooked despite it being one of the biggest sectors in the current rush for land Filling this lacuna this book also reveals that while China has traditionally been painted as a major land grabber and consumer of crop booms it is also a destination of foreign investment In doing so the book highlights how large scale foreign land deals can also take place in traditional grabber countries like China which feeds into the wider debates about global land politics and resource grabbing This book will be of great interest to students and scholars of land grabbing rural development and agrarian transformations as well as Chinese development

Intergovernmental Relations in Transition Carl W. Stenberg, David K. Hamilton, 2018-04-09 The field of intergovernmental relations has changed substantially over the past five decades It maintains a critical and evolving role in the US federal system as well as in public policy and administration Building upon the legacy of Deil S Wright s scholarship this collection of essays by distinguished scholars emerging thought leaders and experienced practitioners chronicles and analyzes some of the tensions and pressures that have contributed to the current state of intergovernmental relations and management Although rarely commanding media attention by name intergovernmental relations is being elevated in the public discourse through policy issues dominating the headlines Many of these intergovernmental issues are addressed in this book including health insurance exchanges under the now threatened Affordable Care Act and the roles of the federal state and local governments in food safety energy and climate change Contributors interpret and assess the impacts of these and other issues on the future directions of intergovernmental relations and management This book will serve as an ideal text for

courses on intergovernmental relations and federalism and will be of interest to government practitioners and civic and nonprofit organization leaders involved in public policy and management      **RM-** Council of State Governments,1979

**Funding Public Schools** Kenneth K. Wong,1999 This book examines the fundamental role of politics in funding our public schools and fills a conceptual imbalance in the current literature in school finance and educational policy Unlike those who are primarily concerned about cost efficiency Kenneth Wong specifies how resources are allocated for what purposes at different levels of the government In contrast to those who focus on litigation as a way to reduce funding gaps he underscores institutional stalemate and the lack of political will to act as important factors that affect legislative deadlock in school finance reform Wong defines how politics has sustained various types of rules that affect the allocation of resources at the federal state and local level While these rules have been remarkably stable over the past twenty to thirty years they have often worked at cross purposes by fragmenting policy and constraining the education process at schools with the greatest needs Wong s examination is shaped by several questions How do these rules come about What role does politics play in retention of the rules Do the federal state and local governments espouse different policies In what ways do these policies operate at cross purposes How do they affect educational opportunities Do the policies cohere in ways that promote better and more equitable student outcomes Wong concludes that the five types of entrenched rules for resource allocation are rooted in existing governance arrangements and seemingly impervious to partisan shifts interest group pressures and constitutional challenge And because these rules foster policy fragmentation and embody initiatives out of step with the performance based reform agenda of the 1990s the outlook for positive change in public education is uncertain unless fairly radical approaches are employed Wong also analyzes four allocative reform models two based on the assumption that existing political structures are unlikely to change and two that seek to empower actors at the school level The two models for systemwide restructuring aimed at intergovernmental coordination and or integrated governance would seek to clarify responsibilities for public education among federal state and local authorities above all integrating political and educational accountability The other two models identified by Wong shift control from state and district to the school one based on local leadership and the other based on market forces In discussing the guiding principles of the four models Wong takes care to identify both the potential and limitations of each Written with a broad policy audience in mind Wong s book should appeal to professionals interested in the politics of educational reform and to teachers of courses dealing with educational policy and administration and intergovernmental relations      The ... Budget, Perspectives and Issues California. Legislature. Joint Legislative Budget Committee. Legislative Analyst,1987      **Qşun State in Perspective** Segun Ayeni,1993      **State & Local Government** Michael Engel,1999 State and Local Government takes an innovative approach to the study of state and local government by offering readers the means to develop their own points of view on its institutions processes and policies Federalism governmental structure the party and electoral systems and methods of citizen influence are described and then

evaluated in the context of the opposing perspectives of conflict and consensus theories State and local policies on public finance economic development welfare and education are examined and then critiqued from the points of view of conservative liberal and socialist ideologies The result is a book that not only informs readers on the facts of state and local government and politics but also challenges them to think critically and analytically about those facts and then helps them to draw conclusions about how well those processes and institutions are working Social Science Quarterly ,1988 Includes section Book reviews **History of New York State, 1523-1927** James Sullivan,Edwin Melvin Williams,Edwin P.
