Identity, Culture, and Chinese Foreign Policy Kangkyu Lee, 2020-11-29 This book assesses the role of identity and Chinese face culture in Chinese foreign policy by analyzing China's political and economic retaliation against South Korea's deployment of the THAAD Terminal High Altitude Area Defense system on its soil. By examining the history and military action of China, Japan and North and South Korea, the book argues that China's divergent responses were caused by different expectations according to whether states had a perceived identity as a friend or a rival. The author demonstrates that Chinese face culture shapes China's reaction to others through three dynamics of seeking, saving and losing face. This book shows how identity and culture have worked in the relationship between China and neighboring countries through three case studies: exploring North Korea's Taepodong-2 missile launch and first nuclear test in 2006; South Korea's decision to allow the United States to deploy the THAAD around 2016; and Japan's decision to deploy two U.S. X-band radars in 2005 and 2014. A timely analysis of the importance of identity and culture in international relations, the book will be of interest to scholars of Chinese foreign policy, Sino-South Korean relations, Sino-North Korean relations, Sino-Japanese relations, Korean politics, Asian politics and international relations.

Reference, Truth and Conceptual Schemes

G. Forrai,2013-03-14 1 HISTORICAL BACKGROUND The purpose of the book is to develop internal realism the metaphysical epistemological doctrine initiated by Hilary Putnam Reason Truth and History Introduction Many Faces In doing so I shall rely sometimes quite heavily on the notion of conceptual scheme I shall use the notion in a somewhat idiosyncratic way which however has some affinities with the ways the notion has been used during its history So I shall start by sketching the history of the notion This will provide some background and it will also give opportunity to raise some of the most important problems I will have to solve in the later chapters The story starts with Kant Kant thought that the world as we know it the world of tables chairs and hippopotami is constituted in part by the human mind His central argument relied on an analysis of space and time and presupposed his famous doctrine that knowledge cannot extend beyond all possible experience It is a central property of experience he claimed that it is structured spatially and temporally However for various reasons space and time cannot be features of the world as it is independently of our experience So he concluded that they must be the forms of human sensibility i e necessary ingredients of the way things appear to our senses
