Reasons And Knowledge:

Reasons and Knowledge Marshall Swain,1981 Rules, Reason, and Self-Knowledge Julia Tanney,2013-01-08 Tanney challenges not only the cognitivist approach that has dominated philosophy and the special sciences for fifty years but metaphysical empirical approaches to the mind in general Rules Reason and Self Knowledge advocates a return to the world involving circumstance dependent normative practices where the rational mind has its home Reason and the Search for Knowledge D. Shapere,2012-12-06 An impressive characteristic of Dudley Shapere s studies in the philosophy of the sciences has been his dogged reasonableness He sorts things out with logical care and mastery of the materials and with an epistemological curiosity for the historical happenings which is both critical and respectful Science changes and the philosopher had better not link philosophical standards too tightly to either the latest orthodox or the provocative up start in scientific fashions and yet as critic the philosopher must not only master the sciences but also explicate their meanings not those of a cognitive never never land Neither dreamer nor pedant Professor Shapere has been able to practice the modern empiricist s exercises with the sober and stimulating results shown in this volume he sees that he can be faithful to philosophical analysis engage in the boldest rational reconstruction of theories and experimental measurements and faithful too empirically faithful we may say to both the direct super highways and the winding pathways of conceptual evolutions and metaphysical revolutions Not least Shapere listens To Einstein and Calileo of course but to the workings of the engineers and the scientific apprentices too and to the various philosophers now and of old who have also worked to make sense of what has been learned and how that has happened and where we might go wrong **The Knowledge of Divine Things from Revelation, Not from Reason Or Nature** John Ellis,1837 **Knowledge and Evidence** Paul K. Adam Carter,Emma C. Gordon,Benjamin Jarvis,2017-11-10 Knowledge First constitutes what is widely regarded as one of the most significant innovations in contemporary epistemology

in the past 25 years Knowledge first epistemology is the idea that knowledge per se should not be analysed in terms of its constituent parts e.g. justification belief but rather that these and other notions should be analysed in terms of the concept of knowledge This volume features a substantive introduction and 13 original essays from leading and up and coming philosophers on the topic of knowledge first philosophy The contributors essays range from foundational issues to applications of this project to other disciplines including the philosophy of mind the philosophy of perception ethics and action theory Knowledge First Approaches in Epistemology and Mind aims to provide a relatively open ended forum for creative and original scholarship with the potential to contribute and advance debates connected with this philosophical project

Externalism about Knowledge Luis R. G. Oliveira, 2023-07-02 Externalism about knowledge is thriving in contemporary epistemology Nonetheless externalism is too often caricatured as merely reliabilism too often reduced to simply externalism about justification and rarely considered as a cohesive family of related but importantly different views Externalism About Knowledge addresses all of these issues by bringing new essays from leading externalist epistemologists working on seven different branches of this tradition process reliabilism tracking views safety views virtue epistemology proper functionalism naturalized epistemology and knowledge first epistemology This collection highlights their unity their differences their interconnections and their most recent challenges developments and extensions

Explaining Knowledge Rodrigo Borges, Claudio de Almeida, Peter D. Klein, 2017-11-24 The Gettier Problem has shaped most of the fundamental debates in epistemology for more than fifty years Before Edmund Gettier published his famous 1963 paper it was generally presumed that knowledge was equivalent to true belief supported by adequate evidence Gettier presented a powerful challenge to that presumption This led to the development and refinement of many prominent epistemological theories for example defeasibility theories causal theories conclusive reasons theories tracking theories epistemic virtue theories and knowledge first theories The debate about the appropriate use of intuition to provide evidence in all areas of philosophy began as a debate about the epistemic status of the Gettier intuition The differing accounts of epistemic luck are all rooted in responses to the Gettier Problem The discussions about the role of false beliefs in the production of knowledge are directly traceable to Gettier's paper as are the debates between fallibilists and infallibilists Indeed it is fair to say that providing a satisfactory response to the Gettier Problem has become a litmus test of any adequate account of knowledge even those accounts that hold that the Gettier Problem rests on mistakes of various sorts This volume presents a collection of essays by twenty six experts including some of the most influential philosophers of our time on the various issues that arise from Gettier's challenge to the analysis of knowledge *Explaining Knowledge* sets the agenda for future work on the central problem of epistemology
