Redlands Astride the Freeway Frank Ensor Moore,1995 **Redlands Remembered** Joan Hedges McCall,2012-07-17

By 1889 the newly established town of Redlands at the southern base of the San Bernardino Range offered mild winters and spectacular views of the nearby mountains The sunny dry climate enticed eastern industrialists and Redlands became a place of annual escape a millionaire mecca by the turn of the twentieth century Early philanthropists set the tone for an active civic culture that has lasted throughout the city's 125 years These stories researched and written by Joan Hedges McCall tell how and why the town developed out of dusty semi arid lands into a green belt of orange groves parks and Victorian homes Find out where the water came from how the navel oranges grew and who helped Redlands grow into the beloved city it is today

A Tale of Two Visions Jeffrey Brown, 2005 For sixty years engineers and planners have debated the freeway s role in the city Engineers have tended to view freeways strictly in traffic service terms Planners on the other hand have long viewed freeways not only as a means of facilitating automobile transportation but also as a tool for reshaping the city This article uses the plans of Harland Bartholomew and Robert Moses to illustrate these competing visions of the freeway and to assess the implications of these visions on the development of the freeway and its long term influence on our cities The traffic service vision of the engineers emerged victorious through the creation of the interstate highway system but this victory has carried with it a high price for many American cities
