Reducing Nuclear Arsenals Carlo Schaerf, David Carlton, 1991-06-18 This volume contains the proceedings of the Third Castiglioncello International Conference on Nuclear Arsenals Reduction Perspectives and Consequences which took place in The Opportunity Steven Pifer, Michael E. O'Hanlon, 2012-10-05 For some Livorno Italy from 22 to 25 September 1989 observers nuclear arms control is either a relic of the cold war or a utopian dream about a denuclearized planet decades in the future But as Brookings scholars Steven Pifer and Michael O Hanlon argue in The Opportunity arms control can address some key security challenges facing Washington today and enhance both American and global security Pifer and O Hanlon make a compelling case for further arms control measures to reduce the nuclear threat to the United States and its allies to strengthen strategic stability to promote greater transparency regarding secretive nuclear arsenals to create the possibility for significant defense budget savings to bolster American credibility in the fight to curb nuclear proliferation and to build a stronger and more sustainable U S Russia relationship President Obama gave priority to nuclear arms control early in his first term and by all accounts would like to be transformational on these questions Can there be another major U S Russia arms treaty Can the tactical and surplus strategic nuclear warheads that have so far escaped controls be brought into such a framework Can a modus vivendi be reached between the two countries on missile defense And what of multilateral accords on nuclear testing and production of fissile materials for nuclear weapons Pifer and O Hanlon concisely frame the issues the background and the choices facing the president provide practical policy recommendations and put it all in clear and readable prose that will be easily understood by the layman **Reducing Nuclear Danger** McGeorge Bundy, William J. Crowe, Sidney David Drell, 1993 The end of the U.S. Soviet standoff and the increasing risk of political adventurers such as Saddam Hussein developing nuclear capability have profoundly altered the shape of global nuclear danger In Reducing Nuclear Danger three of America's top experts on nuclear affairs offer a thoughtful prescription for effective international action to cut existing nuclear arsenals and to prevent further proliferation They argue that the United States must take a cooperative leadership role to achieve worldwide control of nuclear weapons The immediate tasks to this end are to execute the already agreed upon reductions in U S and Russian forces ensure that Russia remains the only nuclear state of the former Soviet Union and substantially strengthen the international efforts against the spread of nuclear weapons The authors favor adopting a strict doctrine of using nuclear weapons only as a defensive last resort along with other specific changes in current policy Prominent in their prescriptions is an eventual drastic reduction of the current Russian American warhead ceilings They also advocate a new policy for American leaders toward other nations as well as the American people of open public explanation of nuclear danger This important and insightful book on the current nuclear danger should be read by all citizens with an interest in resolving what remains our greatest global risk at a time of unprecedented opportunity US Nuclear Weapons Policy After the Cold War Nick Ritchie, 2008-08-08 This book offers an in depth examination of America

s nuclear weapons policy since the end of the Cold War Exploring nuclear forces structure arms control regional planning and the weapons production complex the volume identifies competing sets of ideas about nuclear weapons and domestic political constraints on major shifts in policy It provides a detailed analysis of the complex evolution of policy the factors affecting policy formulation competing understandings of the role of nuclear weapons in US national security discourse and the likely future direction of policy The book argues that US policy has not proceeded in a linear rational and internally consistent direction and that it entered a second post Cold War phase under President George W Bush However domestic political processes and lack of political and military interest in America's nuclear forces have constrained major shifts in nuclear weapons policy This book will be of much interest to students of US foreign policy nuclear proliferation strategic studies and IR in general Pulling Back from the Nuclear Brink Barry R. Schneider, William L. Dowdy, 1998 The contributors to this book including policymakers diplomats scientists regionalists and academic specialists have joined in an effort to survey nuclear arms control successes ongoing initiatives and future prospects for reducing and countering nuclear proliferation The Nuclear Turning Point Harold A. Feiveson, 2010-12-01 Despite the ongoing drawdown of strategic forces under the terms of START both the United States and Russia maintain large arsenals of nuclear weapons poised for immediate launch Under the most optimistic current scenarios these arsenals will remain very large and launch ready for more than a decade This book by a distinguished group of coauthors critically evaluates the current policy of retaining and operating large nuclear arsenals It reviews U S nuclear doctrine and strategy and the role of nuclear weapons in deterring aggression by former Cold War adversaries and other countries with weapons of mass destruction The risks of inadvertent as well as deliberate nuclear attack are assessed The authors argue that small arsenals low hundreds on low alert satisfy all justifiable requirements for nuclear weapons They present a blueprint for making deep cuts in U S and Russian deployments and for lowering their alert level They explain the implications of shifting to small arsenals for further constraining anti ballistic missile defenses strengthening verification and capping or reducing the nuclear arsenals of China France and Britain as well as the threshold nuclear states The political challenges and opportunities both domestic and international for achieving deep reductions in the size and readiness of nuclear forces are analyzed by the authors and by distinguished experts from other countries The coauthors are Bruce Blair Jonathan Dean James Goodby Steve Fetter Hal Feiveson George Lewis Janne Nolan Theodore Postol and Frank von Hippel An appendix with international perspectives by Li Bin China Alexei Arbatov Russia Therese Delpech France Pervez Hoodbhoy Pakistan Shai Feldman Israel Harald Mueller Germany and Zia Treaty on Strategic Offensive Reduction United States. Scientists, and the Post-Cold War Challenge Sidney David Drell, 2007 This volume includes a representative selection of Sidney Drell's recent writings and speeches circa 1993 to the present on public policy issues with substantial scientific

components Most of the writings deal with national security nuclear weapons and arms control and reflect the authorOCOs personal involvement in such issues dating back to 1960 Fifteen years after the demise of the Soviet Union the gravest danger presented by nuclear weapons is the spread of advanced technology that may result in the proliferation of nuclear weapons Of most concern would be their acquisition by hostile governments and terrorists who are unconstrained by accepted norms of civilized behavior The current challenges are to prevent this from happening and at the same time to pursue aggressively the opportunity to escape from an outdated nuclear deterrence trap Department of Defense Authorization for Appropriations for Fiscal Year 1999 and the Future Years Defense Program: Military posture United States.
