Reengineering Revolution Critical Studies Of Corporate Change:

The Reengineering Revolution? David Knights, Hugh Willmott, 2000 This text reviews the significance of the business process reengineering trend for management practice The authors show how term and practice shaped the adopted policies of downsizing restructuring and emphasis on process rather than task *The Reengineering Revolution* David Knights, Hugh Willmott, 2000-01-26 The Reengineering Revolution reviews the significance of the Business Process Reengineering trend for management practice since the early 1990 s Combining empirical and theoretical perspectives David Knights and Hugh Willmott show how both term and practice shaped the recent widely adopted policies of downsizing restructuring and emphasis on process rather than task Well known contributors analyze the impact of Business Process Reengineering in a number of settings supermarkets and the food chain the public sector banks The theoretical history of Business Process Reengineering is also detailed in relation to ideas about bureaucracy hierarchy transformation and design *Governing Higher Education: National Perspectives on Institutional Governance* Alberto Amaral, Glen Jones, B. Karseth, 2013-11-11 Over the last decades higher education has gone through an unprecedented growth period and as a result the average university or college has now more students and a larger output than ever before At the same time the socio economic and political demands with respect to higher education have grown dramatically These developments have taken place without a proportional increase of the budgets and facilities of the higher education institutions This has created an imbalance between the expectations with respect to higher education and the institutional capacities in the sector One of the underlying trends is that the traditional pact between higher education and society has become problematic Society no longer accepts the rather special and protected position that universities have had for a very long time in our societies The knowledge based social and cultural missions of higher education institutions are no longer taken for granted as the main legitimacy bases for public investments in higher education Universities and colleges are at present expected to function efficiently to contribute to sustainable economic growth at various levels and to add to national and even supranational trade balances On top of this they have to prove that they maintain a high level of quality in their primary activities i e teaching research and services while adapting and responding to the expectations expressed so vehemently in their environments and to a decreasing per capita funding basis Business Communication Peter Hartley, Clive Bruckmann, 2008-01-28 This is a wide ranging up to date introduction to modern business communication which integrates communication theory and practice and challenges many orthodox views of the communication process As well as developing their own practical skills readers will be able to understand and apply principles of modern business communication Among the subjects covered are interpersonal communication including the use and analysis of nonverbal communication group communication including practical techniques to support discussion and meetings written presentation including the full range of paper and electronic documents oral presentation including the use of electronic media corporate communication including strategies and media

The book also offers guidelines on how communication must respond to important organizational issues including the impact of information technology changes in organizational structures and cultures and the diverse multicultural composition of modern organizations This is an ideal text for undergraduates and postgraduates studying business communication and through its direct style and practical relevance it will also satisfy professional readers wishing to develop their understanding and skills

Narrative Management in Corporate Japan Chie Yorozu, 2015-11-19 Scandals and failures in some of the best known international Japanese owned companies have shown that there is sometimes a considerable difference between the public and internal narratives of Japanese firms This book explores the extent to which Japanese firms public claims reflect wider reality Exploring how and why corporate narrative management is accepted or rejected by external and internal audiences in Japan the book clarifies what narrative management means for Japanese organizations It argues that the role of narrative management has become much more prevalent in Japan in recent years but that it does not serve quite the same role as it does in the Western environments where the theory and practice first emerged The author presents interview based case studies within four very different large Japanese organisations all of which have deployed and loudly announced new restructuring plans based largely on Western models of corporate best practice The book aims to describe and account for

these Japanese corporate narratives and asks what they are why they are deployed and who believes in them As the first narrative related work in the Japanese context this volume provides an insight into the development of Japanese narrative management It will appeal to students and scholars of Japanese Business International Business and Organizational Studies

The Shame of Reason in Organizational Change Naud van der Ven, 2011-06-03 Rational thought according to Levinas has the merit of making the world lucid and controllable But at the same time it strips things and people of their identity and incorporates them in a homogenized rational order Illusory but nonetheless oppressive Rationality's totalitarian character can provoke resistance and grief with people who are enlisted by it This can lead to a shameful confrontation in which the thinker is being confronted with his victim's resistance and sees himself and his thinking made questionable By proceeding along this route thinking can be brought to self criticism and to revision of standpoints This description by Levinas of rational thinking shows similarity to what managers do in organizations They make their business controllable but at the same time with their planning and schemes they create a totalitarian straitjacket This similarity suggests that also the reactions to imperialistic rationality from Levinas's description ought to be found in organizations Is it indeed possible to indicate there the kind of resistance and grief Levinas speaks about Does that give rise to confrontations between managers and their co workers who are supposed to subordinate to their schemes Do managers then feel shame And do those shameful confrontations consequently lead to self reflection and change Desk research suggests that the above elements are partly to be found in the literature of management theory Interviews with managers show that Levinas's line of thought can also be found in its completeness within organizations At the same time it becomes clear that becoming conscious of the elements of that line of thought that rationality is all conquering that it provokes resistance that that can lead to shame as well as to a new beginning this is a difficult path to travel The related experiences are easily forgotten and sometimes difficult to excavate Translation of Levinas's thinking into terms of management and organization can help us spot them where they play their role in organizations

Management Lives David Knights, Hugh Willmott, 1999-08-30 The authors bring a spark of vitality and life to an area that could be cynically viewed as a series of conflicting fads and fashions I would recommend anyone in the process of reviewing or designing an entrepreneurship development course to consider the benefits that this book would bring to the teaching process Entrepreneurship and Innovation Using fiction in the classroom as an approach to stimulating the study of people in organizations is well established What this book contributes is a way of exploring some of the existential elements of life in organizations which are typically difficult to study It will be on my reading lists Hopefully this example and regrettably few others which exist will contribute in the long term to the reformulation of how the lived experience of organizational life may be explored in the classroom Leadership consumption and bureaucracy rational choice and meaning all through the medium of characters and situations in contemporary literature The clear theoretical framework supported by footnotes summaries and further reading guides makes this an introduction to management the student will

Shire, Ursula

Holtgrewe, Christian Kerst, 2017-09-29 This title was first published in 2002 Call centres are a type of service work that stand at the interface between corporations and consumers They exemplify more general tendencies present within service work They also have a particular public image being associated in the public mind with low skilled and regimented work This volume presents contributions from British and German management academics and industrial sociologists based on primary research on call centres in both countries The contributions cover the genesis and development of call centres as a new form of organization or indeed a new industry the rationalization and control strategies of organizations that establish call centres and the nature of service work and service interactions The findings of this volume challenge the common public image of call centres and finds that call centre employment is in fact very diverse So for example skilled advising and consulting services are often performed over the phone Along with the sometimes skilled nature of call centre work work organization and working conditions vary as well The text also seeks to contrast the British and German experience of call centre work and employment In Germany clerical work has traditionally been embedded in the specific traditions of co operative industrial relations that define the German model Call centres present a strategic challenge to this model and the expansion of call centres has been at the forefront of changes aimed at making employment more flexible in Germany This work offers a choice of country cases which permit a comparison of service employment within both a liberal capitalist and a socially embedded economy International Handbook of Research in Professional and Practice-based Learning Stephen Billett, Christian Harteis, Hans Gruber, 2014-07-15 The International Handbook of Research in Professional and Practice based

What Keeps Us Together and Makes Us Effective? Eliseo Vilalta-Perdomo, 2010-03 For a long time what was on offer to advice people was restricted to joining divinely inspired or powerful collectives In the last couple of centuries the emphasis has shifted towards being informed about the environment in which actions take place irrespective of whether these are good or bad Further shifts in how action is informed now emphasise the use of interfaces The aim of this work is to find the point where a suitable referent or validation criterion would be available In the report it is argued theoretically and empirically that this point is characterised by the notion of an internally structured and stable collective performing a collective task This notion distinguishes members activities inside a collective that inform each other as well as contribute to the maintenance of the collective from collective actions Knowledge resulting from the use of this notion refers to what makes the collective survive in some environment and includes knowledge that helps distinguish between good actions that contribute to the collective performing its task and bad ones
