and Schwinghammer argue that modern warfare reflects a continuation of the nation state building process begun in nineteenth century Europe In their analysis economic modernization and social integration destroy traditional relations and create instability in the developing world While these forces were successfully harnessed by the modern state in Europe and North America economic and political globalization make a similar resolution considerably more complex In addition to their insightful analysis the authors provide a detailed list of all wars fought from 1945 to 1995 The authors lucid explanatory commentaries are accompanied by lists tables and charts In addition to a detailed war register upon which all statistical data and analyses for the volume are based there are appendices with directories useful for locating specific wars as well as several supplementary lists An afterword brings the reader closer to the world situation as we conclude the twentieth century including the impact of political developments in Eastern Europe Beyond its historical dimension this book offers a policy relevant empirical demonstration of the ongoing increase in internal civil wars and addresses the inability of modern society to prevent this scourge Warfare Since the Second World War is an indispensable resource for anyone concerned with issues of war and peace development and the future of international relations
