Reform and Reaction in the Platine Provinces, 1810-1852 David Bushnell, 1983 **The Ideology of Creole Revolution** Joshua Simon, 2017-06-06 The American and Latin American independence movements emerged from distinctive settings and produced divergent results but they were animated by similar ideas Patriotic political theorists throughout the Americas offered analogous critiques of imperial rule designed comparable constitutions and expressed common ambitions for their new nations future relations with one another and the rest of the world This book adopts a hemispheric perspective on the revolutions that liberated the United States and Spanish America offering a new interpretation of their most important political ideas Simon argues that the many points of agreement among various revolutionary political theorists across the Americas can be attributed to the problems they encountered in common as Creoles that is as the descendants of European settlers born in the Americas He illustrates this by comparing the political thought of three Creole revolutionaries Alexander Hamilton of the United States Sim n Bol var of Venezuela and Lucas Alam n of Mexico **Recollections of a Provincial Past** Domingo Faustino Sarmiento, 2005-03-24 Domingo Faustino Sarmiento 1811 1888 was Argentina s leading writer educator and politician of the nineteenth century and served as President from 1868 to 1874 Of his several autobiographies the best known Recollections of a Provincial Past is one of the indisputable classics of Spanish American literature as well as one of the earliest autobiographies written in the Americas in Spanish Written in exile in 1850 the memoirs describe his childhood and adolescence in an Andean province whose customs were still those of a colony Sarmiento presents his life as the triumph of civilization over barbarism looking back on his youth he measures his wealth and strength by the accumulation of enriching personal and political experiences He compares himself to the newly independent Argentina claiming to be a historically representative individual whose trajectory serves to illuminate contemporary South America

The Americas in the Age of Revolution, 1750-1850 Lester D. Langley, 1996-01-01 Langley examines the political and social tensions reverberating throughout British French and Spanish America pointing out the characteristics that distinguished each upheaval from the others the impact of place or location on the course of revolution the dynamics of race and color as well as class the relation between leaders and followers the strength of counterrevolutionary movements and especially the way that militarization of society during war affected the new governments in the postrevolutionary era Langley argues that an understanding of the legacy of the revolutionary age sheds tremendous light on the political condition of the Americas today virtually every modern political issue the relationship of the state to the individual the effectiveness of government the liberal promise for progress and the persistence of color as a critical dynamic in social policy was central to the earlier period Latin America Since 1780 Will Fowler, 2008 Anubhav Sinha directs this big budget Bollywood sci fi superhero action film starring Shah Rukh Khan Kareena Kapoor and Arjun Rampal Geeky video game designer Shekhar Khan has a secret alter ego leather clad musclebound superhero with a heart G One on hand to protect the world from the

Handbook of South American Governance Pia Riggirozzi, Christopher Wylde, 2017-12-14 Governance in South America is signified by strategies pursued by state and non-state actors directed to enhancing some aspect of their capabilities and powers of agency. It is about the spaces and the practices available, demanded or created to make politics happen. This framework lends explanatory power to understand how governance has been defined and practiced in South America. Pia Riggirozzi and Christopher Wylde bring together leading experts to explore what demands and dilemmas have shaped understanding and practice of governance in South America in and across the region. The Handbook suggests that governance dilemmas of inequitable and unfulfilled political-economic governance in South America have been constant historical features yet addressed and negotiated in different ways. Building from an introduction to key issues defining governance in South America, this Handbook proceeds to examine institutions, actors and practices in governance, focusing on three core processes: evolution of socio-economic and political justice claims as central to the demands of governance; governance frameworks foregrounding particular issues and often privileging particular forms of political practice; and iterative and cumulative processes leading to new demands of governance addressing recognition and identity politics. This Handbook will be a key reference for those concerned with the study of South America: South American political economy, regional governance and the politics of development

Revolution and Restoration Mark D. Szuchman, Jonathan Charles Brown, 1994-01-01 The question that still engages the attention of Latin American historians is the amount of real change that occurred with the achievement of political independence from Spain in the early nineteenth century. In this collection, historians examine the social, political and economic history of Argentina from the onset of the Bourbon Imperial reforms of 1776 through formal independence, social disorder and dictatorship until the foundation of the modern bourgeois democratic state in 1860. Argentina in this period was particularly influential in shaping broader Latin American political and intellectual currents so that an examination of Argentina's situation has important implications for the Latin American republics

Race, State, and Armed Forces in Independence-Era Brazil Hendrik Kraay, 2004-08-01 Focusing on the military institutions: army, militia and National Guard of Bahia, Brazil, this book analyzes the region's transition from Portuguese colony to province of the Brazilian Empire. It examines the social, racial and cultural dimensions of post-independence state building in one of the principal slave plantation regions of the Americas. Contrary to those who stress the autonomy of the Brazilian state, this book documents the close connections between the locally organized armed forces and

society in the late colonial period Racially segregated and mirroring the class hierarchies of the larger society these military institutions were profoundly transformed by the war for independence in the early 1820s In its aftermath the new Brazilian state gradually built a national army breaking the local orientation of the Bahian regulars by the 1840s The National Guard locally oriented and democratic in its 1831 organization was turned into a state controlled corporation in the 1840s These developments deeply affected the lives of the men and women involved in the armed forces and a main aim of this book is to examine their participation in the complex and convoluted process of state building The liberalism used to justify independence and the creation of an imperial state resonated among ordinary soldiers and officers as it provided an ideology and language with which to challenge important features of late colonial military organization such as racial segregation and corporal punishment Racial discrimination formally eliminated in the 1830s shaped racial politics in the military while the construction of a national army undermined the previously close connections of officers and soldiers to the mainstream of Bahian society

BOOK JACKET *Labour-Intensive Industrialization in Global History* Gareth Austin, Kaoru Sugihara, 2013-09-13 The prevailing view of industrialization has focussed on technology capital entrepreneurship and the institutions that enabled them to be deployed Labour was often equated with other factors of production and assigned a relatively passive role Yet it was labour absorption and the improvement of the quality of labour over the course of several centuries that underscored the timing pace and quality of global industrialization While science and technology developed in the West and whereas the use of fossil fuels especially coal and oil were vital to this process the more recent history has been underpinned by the development of comparatively resource and energy saving technology without which the diffusion of industrialization would not have been possible The labour intensive resource saving path which emerged in East Asia under the influence of Western technology

and institutions and is diffusing across the world suggests the most realistic route humans could take for a further diffusion of industrialization which might respond to the rising expectations of living standards without catastrophic environmental degradation
