Weber, 2021-05-26 China has become deeply integrated into the world economy Yet gradual marketization has facilitated the country's rise without leading to its wholesale assimilation to global neoliberalism This book uncovers the fierce contest about economic reforms that shaped China's path In the first post Mao decade China's reformers were sharply divided They agreed that China had to reform its economic system and move toward more marketization but struggled over how to go about it Should China destroy the core of the socialist system through shock therapy or should it use the institutions of the

planned economy as market creators With hindsight the historical record proves the high stakes behind the question China embarked on an economic expansion commonly described as unprecedented in scope and pace whereas Russia's economy collapsed under shock therapy Based on extensive research including interviews with key Chinese and international participants and World Bank officials as well as insights gleaned from unpublished documents the book charts the debate that ultimately enabled China to follow a path to gradual reindustrialization Beyond shedding light on the crossroads of the 1980s it reveals the intellectual foundations of state market relations in reform era China through a *longue durée* lens Overall the book delivers an original perspective on China's economic model and its continuing contestations from within and from without

Reynolds, 2014-05-10 *Chinese Economic Reform How Far How Fast* focuses on China's economic reform and tackles topics ranging from the reformed price system and the macroeconomic mechanism to the dual pricing system in industry The rapid growth in money income and government deficit is also examined along with the relationship between price level money supply and GNP Agricultural reform and the shortcomings of China's banking

system as a tool for monetary control are considered as well. Comprised of 17 chapters, this book begins with an analysis of the impact of the two-tier plan market system on the Chinese industry, followed by a discussion on the dual pricing system in the industry and money and price level determination in China. The reader is then introduced to China's macroeconomic policy and how it has been influenced by the reform process, money and the consumption goods market, and issues in the structural reform of agriculture. Subsequent chapters focus on the banking system, economic policy, and income distribution, trade, employment, and inequality in post-reform China, and the stock share system as an avenue for reforming the Chinese economy. China's Transition from Socialism? Dorothy J. Solinger, 2016-06-16. The essays in this volume address the industrial, commercial, urban, and regional reforms of China's planned economy during the 1980s. The emphasis is on the dominating institutional and bureaucratic presence of the state, even as it sought to loosen the pre-1979 vertically structured centralised command system and to introduce some market principles to stimulate economic activity. The essays fall into four categories: theoretical and policy discussions and debates at the central leadership level; reform of the urban economy and of inter-regional relations; industrial and commercial reforms; and the rise and position of the new entrepreneurial class. Many of the essays draw on interviews with Chinese economic officials in the Central China city of Wuhan, and therefore this is the only study that uses local data on actual operations of reforms from a Chinese city; the other sources are the Chinese press and Chinese official and scholarly journals. In each of the categories, there are pieces from different points in the chronological process of reform. This study begins with the first theoretical discussions among China's economists and top political leaders in the late 1970s and concludes with experiments with bankruptcy and stock markets in the late 1980s. The countervailing heavy presence of the state at both the policy and the practical levels throughout the reform decade is its unifying theme.
