Security As Practice Discourse Analysis And The Bosnian War:

Security As Practice Lene Hansen, 2006 This important text offers a full and detailed account of how to use discourse analysis to study foreign policy It provides a poststructuralist theory of the relationship between identity and foreign policy and an in depth discussion of the methodology of discourse analysis Part I offers a detailed discussion of the concept of identity the intertextual relationship between official foreign policy discourse and oppositional and media discourses and of the importance of genres for authors ability to establish themselves as having authority and knowledge Lene Hansen devotes particular attention to methodology and provides explicit directions for how to build discourse analytical research designs Part II applies discourse analytical theory and methodology in a detailed analysis of the Western debate on the Bosnian war This analysis includes a historical genealogy of the Western construction of the Balkans as well as readings of the official British and American policies the debate in the House of Commons and the US Senate Western media representations academic debates and travel writing and autobiography Providing an introduction to discourse analysis and critical perspectives on international relations this book will be essential reading for students and scholars of international relations discourse analysis and research methodology *Europeanization as Discursive Practice* Senka Neuman

Stanivuković, 2017-09-01 *Europeanization as Discursive Practice* adopts a poststructuralist reading of Europeanization to study the effects of EU accession in the light of political territoriality and consequent state building processes in the EU and Central and Eastern European countries CEECs and the Western Balkans from 1990 2013 Focusing on how domestic actors have framed Europe EU norms in the debates on territorial reforms and the implications of this framing on policy reforms it asks how competing articulations of the EU and its norms construct state territoriality in the given political and policy debates The book argues that the European Union acted as a discursive force and a challenge to the established structures of understanding of territoriality statehood and power With this the author proposes a new research model for the study of Europeanization that goes beyond the neo institutionalist account of the EU s policy norm transfer to member non member states This text will be of key interest to students scholars and practitioners of European integration EU foreign policy enlargement policy and regional policy and territoriality in post socialist spaces **Security, the Environment and**

Emancipation Matt McDonald, 2012-01-30 This book offers an examination of the role of emancipation in the study and practice of security focusing on the issue of environmental change The end of the Cold War created a context in which traditional approaches to security could be systematically questioned This period also saw a concerted attempt in IR to argue that environmental change constituted a threat to security This book argues that such a notion is problematic as it suggests that a universal definition of security is possible which prevents a recognition of security as a site of contestation in which a range of actors articulate alternative visions of who or what is in need of being secured If security is understood and approached in traditional terms as the territorial preservation of the nation state from external threat then it is indeed

difficult to see how environmental issues would benefit from being placed on states security agenda If however security is defined in terms of the emancipation of the most vulnerable individuals from contingent structural oppressions then drawing a relationship between environmental change and security may be beneficial for redressing those environmental issues and prioritising the needs of those most at risk from the manifestations of global environmental change This book takes the limitations of contemporary approaches to the relationship between the environment and security as its starting point and seeks to do two things First it aims to illustrate the ways in which arguments over approaches to environmental issues can be viewed as contestation over the meaning of security in particular political contexts Central here is the composition and assumptions of the dominant security discourse to emerge regarding those issues a framework of meaning for the most important forms of action on behalf of a particular group defining the terms for meaningful contestation and negotiation about security itself within that group As such the book attempts to illustrate the dynamics of competition over the meaning of security with reference to environmental issues particularly focusing on instances of political change in the dominant security discourse through which that issue is approached In the process the author points to the central role of these dominant security discourses in underpinning the most practically significant actions regarding environmental issues such as deforestation and global climate change The book employs methodological tools that enable a focus on how particular frameworks of meaning are constituted and become dominant how they provide a lens through which various issues are approached and how discourses most consistent with redressing environmental change and the suffering of the most vulnerable might come to provide the framework through which security is viewed in particular contexts This book will be of much interest to students of Critical Security Studies geography sociology IR and Political Science in general

Research Methods in Critical Security Studies Mark B. Salter, Can E. Mutlu, Philippe M. Frowd, 2023-05-12 This textbook surveys new and emergent methods for doing research in critical security studies filling a gap in the literature The second edition has been revised and updated This textbook is a practical guide to research design in this increasingly established field Arguing for serious attention to questions of research design and method the book develops accessible scholarly overviews of key methods used across critical security studies such as ethnography discourse analysis materiality and corporeal methods It draws on prominent examples of each method s objects of analysis relevant data and forms of data collection The book s defining feature is the collection of diverse accounts of research design from scholars working within each method each of which is a clear and honest recounting of a specific project s design and development This second edition is extensively revised and expanded Its 33 contributors reflect the sheer diversity of critical security studies today representing various career stages scholarly interests and identities This book is systematic in its approach to research design but keeps a reflexive and pluralist approach to the question of methods and how they can be used The second edition has a new forward looking conclusion examining future research trends and challenges for the field This book will be essential reading for upper

level students and researchers in the field of critical security studies and of much interest to students in International Relations and across the social sciences *The Routledge Handbook of Security Studies* Myriam Dunn Cavelty, Victor Mauer, 2009-12-16 Focusing on contemporary challenges this major new Handbook offers a wide ranging collection of cutting edge essays from leading scholars in the field of Security Studies The field of Security Studies has undergone significant change during the past twenty years and is now one of the most dynamic sub disciplines within International Relations It now encompasses issues ranging from pandemics and environmental degradation to more traditional concerns about direct violence such as those posed by international terrorism and inter state armed conflict A comprehensive volume comprising articles by both established and up and coming scholars the Handbook of Security Studies identifies the key contemporary topics of research and debate today This Handbook is a benchmark publication with major importance both for current research and the future of the field It will be essential reading for all scholars and students of Security Studies War and Conflict Studies and International Relations **Routledge Handbook of Security Studies** Myriam Dunn Cavelty, Thierry Balzacq, 2016-07-01 This revised and updated second edition features over twenty new chapters and offers a wide ranging collection of cutting edge essays from leading scholars in the field of Security Studies The field of Security Studies has undergone significant change during the past 20 years and is now one of the most dynamic sub disciplines within International Relations This second edition has been significantly updated to address contemporary and emerging security threats with chapters on organised crime migration and security cyber security energy security the Syrian conflict and resilience amongst many others Comprising articles by both established and up and coming scholars The Routledge Handbook of Security Studies provides a comprehensive overview of the key contemporary topics of research and debate in the field of Security Studies The volume is divided into four main parts Part I Theoretical Approaches to Security Part II Security Challenges Part III Regional In Security Part IV Security Governance This new edition of the Handbook is a benchmark publication with major importance for both current research and the future of the field It will be essential reading for all scholars and students of Security Studies War and Conflict Studies and International Relations *Environmental Security and Gender* Nicole Detraz, 2014-08-21 Over the past 20 years scholars policymakers and the media have increasingly recognized the links between both traditional and non traditional security issues and the changing condition of the global environment Concepts such as environmental security and resource conflict have been used to hint at these significant linkages While there has been a good deal of scholarly work conducted that seeks to identify the ways that actors link these concepts there has been little examination of the intersection between approaches to environmental security and gender This book explores this intersection to provide an insight into the gendered nature of both global environmental politics and security studies It examines how the issues of security and the environment are linked to theory and practice and the extent to which gender informs these discussions By adopting a feminist environmental security discourse this book provides crucial

redefinitions of key concepts and offers new insights into the ways we understand security environment connections Case studies evaluate if and how environment and security discourses are being used to understand a range of environmental issues and how a feminist environmental security discourse contributes to our understanding of security environment connections This multidisciplinary volume draws on literature from the environmental sciences security studies and sociology to highlight the complex human insecurities that often accompany environmental change As conceptualizations of security continue to shift and broaden to include environmental issues and concerns it is imperative that gender informs the debate

China in the UN Security Council Decision-making on Iraq Suzanne Xiao Yang, 2013 With the rupture of the UN Security Council in March 2003 over the US spearheaded intervention in Iraq the attempts made to subject the use of force to the rule of law had failed Widespread European US disagreement of the role of the UNSC has hindered more effective decisions for China and its European and American counterparts in the Security Council Iraq China and the UN Security Council examines the role of China's policy behaviour in relation to the Iraq intervention in order to develop a better understanding of this fast rising power within the UN It looks at key questions such as What consequences may arise if China's actions are based on a set of values and national interests far removed from those of the major Western powers Could China's attitude disrupt the traditional working and normative practice of the United Nations The book will be of interest to scholars and students of international relations and Chinese Politics

Gender and International Security Laura Sjoberg, 2009-10-16 This book defines the relationship between gender and international security analyzing and critiquing international security theory and practice from a gendered perspective Gender issues have an important place in the international security landscape but have been neglected both in the theory and practice of international security The passage and implementation of UN Security Council Resolution 1325 on Security Council operations the integration of gender concerns into peacekeeping the management of refugees post conflict disarmament and reintegration and protection for non combatants in times of war shows the increasing importance of gender sensitivity for actors on all fronts in global security This book aims to improve the quality and quantity of conversations between feminist security studies and security studies more generally in order to demonstrate the importance of gender analysis to the study of international security and to expand the feminist research program in Security Studies The chapters included in this book not only challenge the assumed irrelevance of gender they argue that gender is not a subsection of security studies to be compartmentalized or briefly considered as a side issue Rather the contributors argue that gender is conceptually empirically and normatively essential to studying international security They do so by critiquing and reconstructing key concepts of and theories in international security by looking for the increasingly complex roles women play as security actors and by looking at various contemporary security issues through gendered lenses Together these chapters make the case that accurate rigorous and ethical scholarship of international security cannot be produced without taking account of women's presence in or the gendering of world politics This book will

be of interest to all students of critical security studies gender studies and International Relations in general Laura Sjoberg is Assistant Professor of Political Science at the University of Florida She has a Phd in International Relations and Gender Studies from the University of Southern California and is the author of *Gender Justice and the Wars in Iraq* 2006 and with Caron Gentry *Mothers Monsters Whores Women s Violence in Global Politics* 2007 *A Changing Environment for Human Security* Linda Sygna, Karen O'Brien, Johanna Wolf, 2013-06-26 Environmental change presents a new context and new opportunities for transformational change This timely book will inspire new ways of understanding the relationship between environmental change and human security A Changing Environment for Human Security Transformative Approaches to Research Policy and Action both supports and informs a call for new transformative approaches to research policy and action The chapters in this book include critical analyses case studies and reflections on contemporary environmental and social challenges with a strong emphasis on those related to climate change Human thoughts and actions have contributed to an environment of insecurity manifested as multiple interacting threats that now represent a serious challenge to humanity Yet humans also have the capacity to collectively transform the economic political social and cultural systems and structures that perpetuate human insecurities These fresh perspectives on global environmental change from an interdisciplinary group of international experts will inspire readers whether students researchers policy makers or practitioners to think differently about environmental issues and sustainability The contributions show that in a changing environment human security is not only a possibility but a choice *Routledge Handbook of Media, Conflict and Security* Piers Robinson, Philip Seib, Romy Frohlich, 2016-11-10 This Handbook links the growing body of media and conflict research with the field of security studies The academic sub field of media and conflict has developed and expanded greatly over the past two decades Operating across a diverse range of academic disciplines academics are studying the impact the media has on governments pursuing war responses to humanitarian crises and violent political struggles and the role of the media as a facilitator of and a threat to both peace building and conflict prevention This handbook seeks to consolidate existing knowledge by linking the body of conflict and media studies with work in security studies The handbook is arranged into five parts Theory and Principles Media the State and War Media and Human Security Media and Policymaking within the Security State New Issues in Security and Conflict and Future Directions For scholars of security studies this handbook will provide a key point of reference for state of the art scholarship concerning the media security nexus for scholars of communication and media studies the handbook will provide a comprehensive mapping of the media conflict field *The International Political Sociology of Security* Trine Villumsen Berling, 2015-02-11 This book builds a theoretical approach to the intractable problem of theory practice in international relations IR and develops tools to study how theory and practice hang together in international security Drawing on Pierre Bourdieu s political sociology the book argues that theory and practice take part in struggles over basic understandings doxa in international fields through what the book calls doxic battles In these battles e g

scientific facts military hardware and social networks are mobilised as weapons in a fight for recognition NATO's transformation and fight for survival and the rapidly growing number of think tanks in European security in the 1990s is taken as an example of these processes The book studies a variety of sources such as funding to science programmes in Europe think tanks and research centres in European security NATO's relations with the EU the WEU and the OSCE and the mobilization of theory at crucial points in the transformation process Theory as Practice and Capital will be of interest to students and scholars of international relations security studies and critical theory

Human and Water Security in Israel and Jordan Philip Jan Schäfer, 2012-10-28 The work aims at answering the question as to how far discourses on human security are present in Jordan and Israel if they converge and if political solutions for the issue of water security could be derived The analysis is based on the assumption that from human security perspective common solutions for urgent problems can be derived more easily than out of a perspective of national security Yet it is acknowledged that according to a new security perspective different security threats are being identified by relevant actors An empirical analysis of written statements and utterances of the respective security elites establishes the methodological tool for the identification of human security discourses in Israel and Jordan Subsequently it is estimated how far water is presented as a matter of national security in Israel and Jordan using the theory of securitization

'Balkanization' and the Euro-Atlantic Processes of the (Western) Balkans Liridona Velu Ashiku, 2024-08-30 This book explores how balkanization as a discourse underpins the policies of the European Union EU and the North Atlantic Treaty Organization NATO toward the Western Balkans It shows how EU and NATO policies have emerged from and led to the constant reinvention of the unity of the West through balkanizing the region and illustrates how this dynamic is maintained by and instrumentalized for the political elites Through a genealogical analysis that stretches from the Balkans Wars to more recent events such as North Macedonia's change of name in 2018 the author shows how Western policies have aimed at recreating the united West on the back of the broken Balkans The book will appeal to scholars and students of Southeast Europe International Relations Political Science Peace and Conflict Studies and History

Critical Approaches to Security Laura J. Shepherd, 2013-01-03 Focusing on critical approaches to security this new textbook offers readers both an overview of the key theoretical perspectives and a variety of methodological techniques With a careful explication of core concepts in each chapter and an introduction that traces the development of critical approaches to security this textbook will encourage all those who engage with it to develop a curiosity about the study and practices of security politics Challenging the assumptions of conventional theories and approaches unsettling that which was previously taken for granted these are among the ways in which such a curiosity works Through its attention to the fact that and the ways in which security matters in global politics this work will both pioneer new ways of studying security and acknowledge the noteworthy scholarship without which it could not have been thought This textbook will be essential reading to advanced undergraduate and postgraduate students of critical security studies and

highly recommended to students of traditional security studies International Relations and Politics

Discourses on Identity in 'First' and 'Other' Serbia Ana Omaljev, 2016-01-26 Serbia is still widely thought of as an unfinished state whose people struggle to establish a compelling identity narrative in answer to the question who are we While existing literature has over analyzed Serbian nationalism the Serbian public sphere remains largely ignored This engaging and timely book fills this gap by giving context to the persistent and overwhelming dialogue between opposing factions on the identity spectrum in Serbia Omaljev s focus on elite discourses provides a fresh perspective on this contentious subject It offers an original understanding of the competing arguments surrounding First and Other Serbia and of the contested visions of Serbian national identity and broader European identity By closely examining the identity vocabulary of Serbian elites and the opposing ways in which these elites view the use of labels such as anti Serbian patriot and traitor this book provides a vital lesson in post conflict nation building and raises important questions about the symbolic representations of political and cultural identities A much needed and compelling intervention in the Serbian identity discourse Omaljev s work is a must read for any researcher on the Western Balkans

Conflict, Security and the Reshaping of Society Alessandro Dal Lago, Salvatore Palidda, 2010-07-13 A PDF version of this book is available for free in open access via www.tandfebooks.com as well as the OAPEN Library platform www.oapen.org It has been made available under a Creative Commons Attribution Non Commercial No Derivatives 3.0 license and is part of the OAPEN UK research project This book is an examination of the effect of contemporary wars such as the War on Terror on civil life at a global level Contemporary literature on war is mainly devoted to recent changes in the theory and practice of warfare particular those in which terrorists or insurgents are involved for example the revolution in military affairs small wars and so on On the other hand today s research on security is focused among other themes on the effects of the war on terrorism and on civil liberties and social control This volume connects these two fields of research showing how war and security tend to exchange targets and forms of action as well as personnel for instance the spreading use of private contractors in wars and of military experts in the struggle for security in modern society This shows how contrary to Clausewitz s belief war should be conceived of as a continuation of politics by other means the opposite statement is also true that politics insofar as it concerns security can be defined as the continuation of war by other means This book will be of much interest to students of critical security studies war and conflict studies terrorism studies sociology and IR in general Salvatore Palidda is Professor of Sociology in the Faculty of Education at the University of Genoa Alessandro Dal Lago is Professor of Sociology of Culture and Communication at the University of Genoa

The Routledge Handbook of European Security Sven Biscop, Richard G. Whitman, 2013 This new Handbook brings together key experts on European security from the academic and policy worlds to examine the European Union EU as an international security actor In the two decades since the end of the Cold War the EU has gradually emerged as an autonomous actor in the field of security aiming to safeguard European security by improving global security However the

EU's development as a security actor has certainly not remained uncontested either by academics or by policy makers some of whom see the rise of the EU as a threat to their national and or transatlantic policy outlook While the focus of this volume is on the politico military dimension security will also be put into the context of the holistic approach advocated by the EU The book is organised into four key sections Part I The EU as an International Security Actor Part II Institutions Instruments and Means Part III Policies Part IV Partners This Handbook will be essential reading for all students of European Security the EU European Politics security studies and IR in general

Selling the War on Terror Jack Holland, 2012-09-10 This book uses a comparative analysis to examine foreign policy discourses and the dynamics of the War on Terror The book considers the three principal members of the Coalition of the Willing in Afghanistan and Iraq the United States Britain and Australia Despite significant cultural historical and political overlap the War on Terror was nevertheless rendered possible in these contexts in distinct ways drawing on different discourses and narratives of foreign policy and identity This volume explores these differences and their origins arguing that they have important implications for the way we understand foreign policy and political possibility The author rejects prevalent interpretations of a War on Terror foreign policy discourse in the singular highlighting that coalition states both demonstrated and relied upon divergent policy framings to make the War on Terror possible The book thus contributes to our understanding of political possibility in the process correcting a tendency to view the War on Terror as a universal and monolithic political discourse This book will be of much interest to students of foreign policy critical security studies terrorism studies discourse analysis and IR in general

Security Community in South Asia Muhammad Shoaib Pervez, 2013 The security relationship between India and Pakistan is generally viewed through a neo realist lens This book explains the rivalry of these countries by looking at the socio cultural norms at two levels and discusses a hypothetical security community that could result in peace in the region
