

L'ORGANISATION DES FONCTIONS PSYCHIQUES A LA LUEUR DES DONNÉES NEUROPHYSIOLOGIQUES¹

par Marcel MONODER

Laboratoire de Neurophysiologie appliquée (Genève)

Les fonctions psychiques supérieures impliquent l'activité d'un vaste réseau de neurones à la surface du cerveau — l'écorce cérébrale ou *télencéphale* — acquisition relativement récente du point de vue phylogénétique. L'activité de l'écorce cérébrale est conditionnée toutefois par celle de divers appareils sous-corticaux plus anciens. Les plus importants parmi eux sont localisés dans le *diencéphale*, appelé aussi cerveau intermédiaire, parce qu'il est intercalé entre l'écorce cérébrale et les structures sous-jacentes du tronc cérébral (mésencéphale et rhombencéphale avec le bulbe rachidien). Ces segments sous-jacents contiennent le système réticulaire, qui a, lui aussi, le pouvoir d'activer ou de modérer le fonctionnement de l'écorce cérébrale.

Toutes les parties du cerveau sont en relations étroites les unes avec les autres. Les fonctions psychiques sont le produit de leur intégration; toute tentative de classification de ces fonctions est donc artificielle, puisqu'elle isole nécessairement certaines parties du tout. Etant donné qu'un groupement des fonctions psychiques est indispensable, toutefois, du point de vue dialectique, nous proposerons celui qui se rapproche le plus de la hiérarchie que la nature établit elle-même au cours du développement phylogénique et ontogénique du système nerveux central.

- A. *Régulation des fonctions psychiques primordiales.*
 - a) Régulation des activités vigiles et hypniques.
 - b) Régulation des conduites affectives et instinctives.
 - c) Régulation de la conscience.
- B. *Organisation temporo-spatiale des fonctions psychiques supérieures.*
 - a) Sensations et perceptions. Genèse des abstractions.
 - b) Intégration sensorio-motrice. Transformation des abstractions en actes. Les cerveaux-machine et la cybernétique.
 - c) Le substratum des activités intellectuelles et de la mémoire.
- C. *La personnalité. Activités manuelles et langage au service de la vie sociale.*

Young Foucault Elisabetta Basso, 2022-11-22 In the 1950s long before his ascent to international renown Michel Foucault published a scant few works His early writings on psychology psychopathology and anthropology have been dismissed as immature However recently discovered manuscripts from the mid 1950s when Foucault was a lecturer at the University of Lille testify to the significance of the work that the philosopher produced in the years leading up to the archaeological project he launched with *History of Madness* Elisabetta Basso offers a groundbreaking and in depth analysis of Foucault's Lille manuscripts that sheds new light on the origins of his philosophical project She considers the epistemological style and methodology of these writings as well as their philosophical context and the scholarly networks in which Foucault was active foregrounding his relationship to existential psychiatry Young Foucault blurs the boundaries between biography and theory exploring the transformations and at times contradictions that characterize the intellectual trajectory of a philosopher who as Foucault himself put it turned to psychology and from psychology to history Retracing the first steps of the philosopher's intellectual journey Basso shows how Foucault's early writings provide key insights into his archaeological work of the 1960s Assembling a vast array of archival sources including manuscripts reading notes notes for lectures and conferences and correspondence this book develops a new and deeper understanding of Foucault's body of work
