Model Rebels The Rise And Fall Of Chinas Richest Village:

Model Rebels Bruce Gilley, 2001-02-18 A portentous tale of rural rebellion unfolds in Bruce Gilley's moving chronicle of a village on the northern China plains during the post 1978 economic reform era. Gilley examines how Daqiu Village led by Yu Zuomin, a charismatic Communist Party secretary and president of the local industrial conglomerate, became the richest village in China and a model for the rural reforms of the 1980s and early 1990s. A growing campaign of political resistance led to increasing tensions between the villagers and the Chinese state, and eventually in an event that made headlines around the world, an armed confrontation between the village and higher authorities backed by paramilitary police brought Yu Zuomin and his village crashing down. **Model Rebels**, 2001 This is the chronicle of a village on the northern China plains during the post 1978 economic reforms. It examines how Daqiu Village led by Yu Zuomin, a Communist Party secretary and president of the local industrial conglomerate, became the richest village in China and a model for the rural reforms of the 1980s and early 1990s.

Politics in China William A. Joseph, 2024-07-19 Politics in China is an authoritative introduction to how the world's second most populous nation and rapidly rising global power is governed today. Written by leading China scholars, each chapter offers an accessible overview of a key topic in Chinese politics. The fourth edition of Politics in China has been thoroughly updated and includes a new chapter on the rise and rule of Xi Jinping. Weapons of the Wealthy Scott B. Radnitz, 2012-07-12 Mass mobilization is among the most dramatic and inspiring forces for political change. When ordinary citizens take to the streets in large numbers, they can undermine and even topple undemocratic governments. As the recent wave of peaceful uprisings in several postcommunist states has shown, however, investigation into how protests are organized can sometimes reveal that the origins and purpose of people power are not as they appear on the surface. In particular, protest can be used as an instrument of elite actors to advance their own interests rather than those of the masses. **Weapons of the Wealthy** focuses on the region of post-Soviet Central Asia to investigate the causes of elite-led protest. In nondemocratic states, economic and political opportunities can give rise to elites who are independent of the regime yet vulnerable to expropriation and harassment from above. In conditions of political uncertainty, elites have an incentive to cultivate support in local communities, which elites can then wield as a weapon against a predatory regime. Scott Radnitz builds on his in-depth fieldwork and analysis of the spatial distribution of protests to demonstrate how Kyrgyzstan's post-independence development laid the groundwork for elite-led mobilization, whereas Uzbekistan's did not. Elites often have the wherewithal and the motivation to trigger protests, as is borne out by Radnitz's more than one hundred interviews with those who participated in, observed, or avoided protests. Even Kyrgyzstan's 2005 Tulip Revolution, which brought about the first peaceful change of power in Central Asia since independence, should be understood as a strategic action of elites rather than

as an expression of the popular will This interpretation helps account for the undemocratic nature of the successor government and the 2010 uprising that toppled it It also serves as a warning for scholars to look critically at bottom up political change

Political Culture and Participation in Rural China Yang Zhong, 2013-06-17 Despite China's rapid urbanisation and industrialisation most Chinese still live in the vast countryside or have rural household registration Although there was significant economic improvement in rural areas in the 1980s the rural economy has been stagnating or deteriorating since then and the book argues that the rural urban income gap is giving rise to the potential for political instability throughout China This book based on extensive original research including interview fieldwork in rural areas examines the nature of political culture and participation in rural China discussing issues such as the support or lack of it for democratic values levels of political interest the ways in which Chinese peasants interact with village and local officials subjective factors that motivate them to vote or not to vote in village elections and rural people's views on market oriented economic reforms local and national government and the Communist Party The book argues that although hitherto peasants riots sit ins and demonstrations have been localised and uncoordinated they are frequent and have the potential to cause serious political crises for China's rulers It concludes by considering the future political development of China's vast countryside

Entrepreneurship in China Keming Yang, 2016-04-29 The emergence of China as a major world economy is of great importance to the global political economy and to international business There has been much research on the macro level of institutional reform but little detailed work on the grassroots level of entrepreneurship in China This innovative book addresses this gap by investigating how an economic system dominated by central plans communist ideologies and suppressing bureaucracies could generate such energy from the bottom of society fuelling the country's economic growth Keming Yang's theory of entrepreneurship is based on two interrelated concepts double entrepreneurship and institutional holes He argues that the two concepts bridge a gap between the neo classical institutionalism of economic development and entrepreneurship studies that emphasize individual choice The rigorous theoretical framework is supported by substantial empirical research offering statistical analyses of survey data as well as detailed case studies This timely book will appeal to an interdisciplinary readership in sociology economics business studies and Chinese and Asian Studies

East Asia and the Trials of Neo-Liberalism Kevin Hewison, Richard Robison, 2013-09-13 A much needed examination of the impact of neo liberalism in East Asia in the years since the 1997 to 1998 Asian Economic Crisis These leading contributors tackle the nature of neo liberalism and the forces and institutions driving it With fresh case studies of Indonesia Thailand South Korea Malaysia China and Vietnam showing how domestic elites are critical to the ways in which the neo liberal agenda is manifested modified and rejected They also engage with the key question of why there has been a dramatic restructuring of state and economic power with some elements of domestic elites having been decimated others reinventing themselves while important new elements have been constituted This book was previously published as a special issue of the leading Journal of

The Right to Rule Bruce Gilley, 2009-03-03 Popular perceptions of a state's legitimacy are inextricably bound to its ability to rule Vast military and material reserves cannot counter the power of a citizen's belief and the more widespread the crisis of a state's legitimacy the greater the threat to its stability Even such established democracies as France and India are losing their moral claims over society while such highly illiberal states as China and Iran enjoy strong showings of public support Through a remarkable fusion of empirical research and theory Bruce Gilley makes clear the link between political consent and political rule Fixing a definition of legitimacy that is both general and particular he is able to study the role of legitimacy as it has been maintained and lost in a diverse selection of societies He begins by detailing the origins of state legitimacy and the methods governments have used to wield it best He then considers the habits of less successful states exploring how the process works across different styles of government Gilley's unique approach merges a broad study of legitimacy and performance in seventy two states with a detailed empirical analysis of the mechanisms of legitimation The results are tested on a case study of Uganda a country that after 1986 began to recover from decades of civil war Considering a range of explanations of other domestic and international phenomena as well Gilley ultimately argues that because of its evident real world importance legitimacy should occupy a central place in political analysis
