Introduction It is surprising that it had to take scientific researchers to tell a large number of parents out there that it is necessary for them to make sure that their children had a regular dose of sun fresh air water and oxygen in order to keep healthy When I saw this research which was very well publicized I blinked Were there people really in the world who needed scientific research to prove something which was self evident before they would take their families into the lap of nature It is then that I began to analyze the social lifestyles and trends being set for the younger generation with the elder generation as an example The elder generation the parents had begun living a hectic lifestyle where survival of the fittest especially on the financial front was paramount Thus bothering about rest and recuperation in the lap of nature began to take a backseat way back in the 90s This lapse also caused ever growing statistics in tension stress depression obesity a low immunity system vulnerability to a number of diseases Also children began growing up with underdeveloped cognitive abilities and also physicals resilience because they had not learned about the beneficial qualities of Power N to help keep you healthy naturally and give you long term health benefits at the same time Also the parents are not to blame When a child was young if he had

not been taught by his own parents to walk run jog explore go adventuring in the lap of nature you would not expect him to grow up deciding that he had better become a nature loving Wild Kid all of a sudden I have seen a large number of my city bred friends who would shudder at the idea of tiring themselves on nature hikes or go adventuring in woods you know all those insects and snakes and bugs and sabertooth tigers out there shudder shiver *Nature Interpretation for Children and Young People in the Nordic Countries* Nordic Council of Ministers, Paul Hjulmann Seidler, 2013-05-22 This TEMA Nord report is a result of a one year project with all of the Nordic countries participating The primary goal of the project has been to collect develop and mediate a series of good examples of how nature interpretation aimed at children and young people can encourage children's understanding of nature and inspire them to involve themselves with questions on humans nature and thus help contribute to sustainable development Several issues should be considered when planning nature interpretation activities if nature interpretation aims to lead to sustainable development These points of view are concerned especially with how nature interpreters can encourage children and young people to take ownership to be involved with their body and mind and to reflect and put the experience and the activities in nature into a wider context **Young Children and the Environment** Julie M.
